MONSTER BEVERAGE CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Tabular Dollars in Thousands, Except Per Share Amounts) (Unaudited)

1. BASIS OF PRESENTATION

Reference is made to the Notes to Consolidated Financial Statements, in Monster Beverage Corporation and Subsidiaries (the “Company”) Annual Report on Form 10-K for the year ended December 31, 2018 (“Form 10-K”) for a summary of significant accounting policies utilized by the Company and its consolidated subsidiaries and other disclosures, which should be read in conjunction with this Quarterly Report on Form 10-Q (“Form 10-Q”).

The Company’s condensed consolidated financial statements included in this Form 10-Q have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”) and Securities and Exchange Commission (“SEC”) rules and regulations applicable to interim financial reporting. They do not include all the information and footnote disclosures normally included in annual financial statements prepared in accordance with GAAP. The information set forth in these interim condensed consolidated financial statements for the three-months ended March 31, 2019 and 2018, respectively, is unaudited and reflects all adjustments, which include only normal recurring adjustments and which in the opinion of management are necessary to make the interim condensed consolidated financial statements not misleading. Results of operations for periods covered by this report may not necessarily be indicative of results of operations for the full year.

The preparation of financial statements in conformity with GAAP necessarily requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from these estimates.

2. RECENT ACCOUNTING PRONOUNCEMENTS

Recently issued accounting pronouncements not yet adopted

In August 2018, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2018-15, “Intangibles—Goodwill and Other—Internal—Use Software (Topic 350): Customer’s Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That is a Service Contract.” ASU No. 2018-15 aligns the requirements for capitalizing implementation costs incurred in a hosting arrangement that is a service contract with the requirements for capitalizing implementation costs incurred to develop or obtain internal-use software. ASU No. 2018-15 is effective for the Company on a prospective or retrospective basis beginning on January 1, 2020, with early adoption permitted. The Company is currently evaluating the impact of ASU No. 2018-15 on its financial position, results of operations and liquidity.

In August 2018, the FASB issued ASU No. 2018-14, “Compensation—Retirement Benefits—Defined Benefit Plans—General (Topic 715): Disclosure Framework—Changes to the Disclosure Requirements for Defined Benefit Plans.” ASU No. 2018-14 removes certain disclosures that are not considered cost beneficial, clarifies certain required disclosures and requires certain additional disclosures. ASU No. 2018-14 is effective for the Company on a retrospective basis beginning in the year ending December 31, 2020, with early adoption permitted. The Company is currently evaluating the impact of ASU No. 2018-14 on its financial position, results of operations and liquidity.

In August 2018, the FASB issued ASU No. 2018-13, “Fair Value Measurement (Topic 820): Disclosure Framework - Changes to the Disclosure Requirements for Fair Value Measurement.” ASU No. 2018-13 removes certain disclosure requirements related to the fair value hierarchy, modifies existing disclosure requirements related to

MONSTER BEVERAGE CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Tabular Dollars in Thousands, Except Per Share Amounts) (Unaudited)

measurement uncertainty and adds new disclosure requirements. ASU No. 2018-13 disclosure requirements include disclosing the changes in unrealized gains and losses for the period included in other comprehensive income for recurring Level 3 fair value measurements held at the end of the reporting period and the range and weighted average of significant unobservable inputs used to develop Level 3 fair value measurements. ASU No. 2018-13 is effective for the Company beginning on January 1, 2020, with early adoption permitted. Certain disclosures in the new guidance will need to be applied on a retrospective basis and others on a prospective basis. The Company is currently evaluating the impact of ASU No. 2018-13 on its financial position, results of operations and liquidity.

In January 2017, the FASB issued ASU No. 2017-04, “Intangibles and Other (Topic 350): Simplifying the Test for Goodwill Impairment”, which eliminates the requirement to calculate the implied fair value of goodwill, but rather requires an entity to record an impairment charge based on the excess of a reporting unit’s carrying value over its fair value. This amendment is effective for annual or interim goodwill impairment tests in fiscal years beginning after December 15, 2019. Early adoption is permitted. The Company is currently evaluating the impact of ASU No. 2017-04 on its financial position and results of operations.

In June 2016, the FASB issued ASU No. 2016-13, “Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments”. The accounting standard changes the methodology for measuring credit losses on financial instruments and the timing when such losses are recorded. ASU No. 2016-13 is effective for fiscal years, and interim periods within those years, beginning after December 15, 2019. The Company is currently evaluating the impact of ASU No. 2016-13 on its financial position, results of operations and liquidity.

Recently adopted accounting pronouncements

In February 2018, the FASB issued ASU No. 2018-02 (ASU No. 2018-02), “Income Statement - Reporting Comprehensive Income (Topic 220)”, which amended the previous guidance to allow for certain tax effects “stranded” in accumulated other comprehensive income, which are impacted by the Tax Reform Act signed into law on December 22, 2017, to be reclassified from accumulated other comprehensive income into retained earnings. This amendment pertains only to those items impacted by the new tax law and does not apply to any future tax effects stranded in accumulated other comprehensive income. This standard was effective for fiscal years beginning after December 15, 2018, and allowed for early adoption. The adoption of ASU No. 2018-02 did not have an impact on the Company’s financial position, results of operations and liquidity.

In February 2016, the FASB issued ASU No. 2016-02, “Leases (Topic 842)”. This update requires the recognition of lease assets and lease liabilities on the balance sheet for leases classified as operating leases under previous guidance. The accounting for finance leases (capital leases) was substantially unchanged. The original guidance required application on a modified retrospective basis with adjustments to the earliest comparative period presented. In August 2018, the FASB issued ASU No. 2018-11, “Targeted Improvements to ASC 842,” which included an option to not restate comparative periods in transition and elect to use the effective date of ASU No. 2016-02 as the date of initial application, which the Company elected. As a result, the consolidated balance sheet prior to January 1, 2019 was not restated, and continues to be reported under previous guidance that did not require the recognition of operating lease liabilities and corresponding lease assets on the consolidated balance sheet. As a result of the adoption of ASU No. 2016-02 on January 1, 2019, the Company recorded operating lease right-of-use assets of \$26.3 million and operating lease liabilities of \$22.6 million. The adoption of ASU No. 2016-02 had an immaterial impact on the Company’s condensed consolidated statement of income and condensed consolidated statement of cash flows for the three-month period ended March 31, 2019. In addition, the Company elected the package of practical expedients permitted under the transition guidance within the new standard, which allowed the Company to carry forward the historical lease classification, not reassess prior conclusions related to expired or existing contracts that are or that contain leases, and not reassess the accounting for initial direct costs. Additional information and disclosures required by ASU No. 2016-02 are contained in Note 4.

3. REVENUE RECOGNITION

The Company has three operating and reportable segments, (i) Monster Energy® Drinks segment (“Monster Energy® Drinks”), which is primarily comprised of the Company’s Monster Energy® drinks and Reign Total Body Fuel™ high performance energy drinks, (ii) Strategic Brands segment (“Strategic Brands”), which is comprised primarily of the various energy drink brands acquired from The Coca-Cola Company (“TCCC”) in 2015 as well as the Company’s affordable energy brands, and (iii) Other segment (“Other”), which is comprised of certain products sold by American Fruits and Flavors LLC, a wholly-owned subsidiary of the Company, to independent third-party customers (the “AFF Third-Party Products”).

The Company’s Monster Energy® Drinks segment generates net operating revenues by selling ready-to-drink packaged energy drinks primarily to bottlers and full service beverage distributors. In some cases, the Company sells directly to retail grocery and specialty chains, wholesalers, club stores, mass merchandisers, convenience chains, drug stores, foodservice customers and the military.

The Company’s Strategic Brands segment primarily generates net operating revenues by selling “concentrates” and/or “beverage bases” to authorized bottling and canning operations. Such bottlers generally combine the concentrates and/or beverage bases with sweeteners, water and other ingredients to produce ready-to-drink packaged energy drinks. The ready-to-drink packaged energy drinks are then sold to other bottlers and full service distributors and to retail grocery and specialty chains, wholesalers, club stores, mass merchandisers, convenience chains, foodservice customers, drug stores and the military. To a lesser extent, our Strategic Brands segment generates net operating revenues by selling certain ready-to-drink packaged energy drinks to bottlers and full service beverage distributors.

The majority of the Company’s revenue is recognized when it satisfies a single performance obligation by transferring control of its products to a customer. Control is generally transferred when the Company’s products are either shipped or delivered based on the terms contained within the underlying contracts or agreements. Certain of the Company’s bottlers/distributors may also perform a separate function as a co-packer on the Company’s behalf. In such cases, control of the Company’s products passes to such bottlers/distributors when they notify the Company that they have taken possession or transferred the relevant portion of the Company’s finished goods. The Company’s general payment terms are short-term in duration. The Company does not have significant financing components or payment terms. The Company did not have any material unsatisfied performance obligations as of March 31, 2019 or December 31, 2018.

The Company excludes from revenues all taxes assessed by a governmental authority that are imposed on the sale of its products and collected from customers.

Distribution expenses to transport the Company’s products, where applicable, and warehousing expense after manufacture are accounted for within operating expenses.

Promotional and other allowances (variable consideration) recorded as a reduction to net sales, primarily include consideration given to the Company’s bottlers/distributors or retail customers including, but not limited to the following:

- discounts granted off list prices to support price promotions to end-consumers by retailers;
- reimbursements given to the Company’s bottlers/distributors for agreed portions of their promotional spend with retailers, including slotting, shelf space allowances and other fees for both new and existing products;

- the Company's agreed share of fees given to bottlers/distributors and/or directly to retailers for advertising, in-store marketing and promotional activities;
- the Company's agreed share of slotting, shelf space allowances and other fees given directly to retailers;
- incentives given to the Company's bottlers/distributors and/or retailers for achieving or exceeding certain predetermined sales goals;
- discounted or free products;
- contractual fees given to the Company's bottlers/distributors related to sales made directly by the Company to certain customers that fall within the bottlers'/distributors' sales territories; and
- commissions paid to TCCC based on the Company's sales to certain wholly-owned subsidiaries of TCCC (the "TCCC Subsidiaries") and/or to certain companies accounted for by TCCC under the equity method ("the TCCC Related Parties").

The Company's promotional allowance programs with its bottlers/distributors and/or retailers are executed through separate agreements in the ordinary course of business. These agreements generally provide for one or more of the arrangements described above and are of varying durations, ranging from one week to one year. The Company's promotional and other allowances are calculated based on various programs with bottlers/distributors and retail customers, and accruals are established during the year for its anticipated liabilities. These accruals are based on agreed upon terms as well as the Company's historical experience with similar programs and require management's judgment with respect to estimating consumer participation and/or distributor and retail customer performance levels. Differences between such estimated expenses and actual expenses for promotional and other allowance costs have historically been insignificant and are recognized in earnings in the period such differences are determined.

Amounts received pursuant to new and/or amended distribution agreements entered into with certain distributors relating to the costs associated with terminating the Company's prior distributors, are accounted for as revenue ratably over the anticipated life of the respective distribution agreements, generally over 20 years.

The Company also enters into license agreements that generate revenues associated with third-party sales of non-beverage products bearing the Company's trademarks including, but not limited to, clothing, hats, t-shirts, jackets, helmets and automotive wheels.

As of December 31, 2018, the Company had \$356.3 million of deferred revenue, which is included in current and long-term deferred revenue in the Company's condensed consolidated balance sheet. 4. LEASES

The Company leases identified assets comprising real estate and equipment. Real estate leases consist primarily of office and warehouse space and equipment leases consist of vehicles and warehouse equipment. At the inception of a contract, the Company assesses whether the contract is, or contains, a lease. The Company's assessment is based on: (1) whether the contract involves the use of a distinct identified asset, (2) whether the Company obtains the right to substantially all the economic benefit from the use of the asset throughout the term, and (3) whether the Company has the right to direct the use of the asset. At inception of a lease, the Company allocates the consideration in the contract to each lease and non-lease component based on the component's relative stand-alone price to determine the lease payments. Lease and non-lease components are accounted for separately.

Leases are classified as either finance leases or operating leases based on criteria in Accounting Standards Codification ("ASC") 842. The Company's operating leases are generally comprised of real estate and warehouse equipment, and the Company's finance leases are generally comprised of vehicles. Operating leases are included in Other Assets, Accrued Liabilities and Other Liabilities in the condensed consolidated balance sheet. Finance leases are included in Property and Equipment and Accrued Liabilities in the condensed consolidated balance sheet.

Right-of-use (“ROU”) assets and liabilities are recognized at the lease commencement date based on the present value of lease payments over the lease term. As the Company’s leases generally do not provide an implicit rate, the Company uses its incremental borrowing rate based on the information available at the lease commencement date if the implicit rate cannot be determined. ROU assets also include any lease payments made and exclude lease incentives. Lease terms may include options to extend or terminate the lease when it is reasonably certain that the Company will exercise that option.

Certain of the Company’s real estate leases contain variable lease payments, including payments based on an index or rate. Variable lease payments based on an index or rate are initially measured using the index or rate in effect at the lease commencement date. Additional payments based on the change in an index or rate, or payments based on a change in the Company’s portion of the operating expenses, including real estate taxes and insurance, are recorded as a period expense when incurred.

Lease expense for operating leases, consisting of lease payments, is recognized on a straight-line basis over the lease term. Included in lease expense are any variable lease payments incurred in the period that were not included in the initial lease liability. Lease expense for finance leases consists of the amortization of the ROU asset on a straight-line basis over the asset’s estimated useful life and interest expense calculated using the amortized cost basis.

The Company’s leases have remaining lease terms of less than one year to 15 years, some of which include options to extend the leases for up to five years, and some of which include options to terminate the leases within one year. The Company has elected not to recognize ROU assets and lease liabilities for short-term operating leases that have a term of 12 months or less. The effect of short-term leases on the Company’s ROU assets and lease liabilities was not material.

The components of lease cost for the three-months ended March 31, 2019 was as follows:

Operating leases:	
Lease cost	\$ 1,115
Variable Lease cost	165
Operating Lease cost	<u>1,280</u>

6. FAIR VALUE OF CERTAIN FINANCIAL ASSETS AND LIABILITIES

ASC 820 provides a framework for measuring fair value and requires disclosures regarding fair value measurements. ASC 820 defines fair value as the price that would be received on the sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. ASC 820 also establishes a fair value hierarchy that requires an entity to maximize the use of observable inputs, where available. The three levels of inputs required by the standard that the Company uses to measure fair value are summarized below.

- **Level 1:** Quoted prices in active markets for identical assets or liabilities.
- **Level 2:** Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the related assets or liabilities.
- **Level 3:** Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

ASC 820 requires the use of observable market inputs (quoted market prices) when measuring fair value and requires a Level 1 quoted price to be used to measure fair value whenever possible.

The Company's valuation of its Level 2 investments, which include municipal securities, commercial paper, certificates of deposit, VRDNs, U.S. treasuries and U.S. government agency securities, is based on other observable inputs, specifically a market approach which utilizes valuation models, pricing systems, mathematical tools and other relevant information for the same or similar securities. The Company's valuation of its Level 2 foreign currency exchange contracts is based on quoted market prices of the same or similar instruments, adjusted for counterparty risk. There were no transfers between Level 1 and Level 2 measurements during the three-months ended March 31, 2019 or the year-ended December 31, 2018, and there were no changes in the Company's valuation techniques.

7. DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

The Company is exposed to foreign currency exchange rate risks related primarily to its foreign business operations. During the three-months ended March 31, 2019 and the year-ended December 31, 2018, the Company entered into forward currency exchange contracts with financial institutions to create an economic hedge to specifically manage a portion of the foreign exchange risk exposure associated with certain consolidated subsidiaries' non-functional currency denominated assets and liabilities. All foreign currency exchange contracts of the Company that were outstanding as of March 31, 2019 have terms of one month or less. The Company does not enter into forward currency exchange contracts for speculation or trading purposes.

The Company has not designated its foreign currency exchange contracts as hedge transactions under ASC 815. Therefore, gains and losses on the Company's foreign currency exchange contracts are recognized in interest and other income, net, in the condensed consolidated statements of income, and are largely offset by the changes in the fair value of the underlying economically hedged item.

The notional amount and fair value of all outstanding foreign currency derivative instruments in the condensed consolidated balance sheets consist of the following at:

Total amortization expense recorded was \$2.9 million and \$3.1 million for the three-months ended March 31, 2019 and 2018, respectively.

11. DISTRIBUTION AGREEMENTS

In the normal course of business, amounts received pursuant to new and/or amended distribution agreements entered into with certain distributors, relating to the costs associated with terminating agreements with the Company's prior distributors, are accounted for as deferred revenue and are recognized as revenue ratably over the anticipated life of the respective distribution agreement, generally 20 years. Revenue recognized was \$14.2 million and \$11.2 million for the three-months ended March 31, 2019 and 2018, respectively.

During the three-months ended March 31, 2019, the Company agreed to the assignment of Kalil Bottling Group's distribution territories to TCCC network bottlers. The Company incurred no distributor termination costs and received no deferred revenue in connection with this assignment. As of April 6, 2019, with the transition of Big Geyser Inc.'s distribution territory to TCCC network bottlers, all distribution territories in the U.S. have been transitioned to TCCC network bottlers.

Legal Proceedings

Litigation — The Company, certain affiliates of the Company and TCCC are parties to various agreements setting forth, among other things, provisions relating to TCCC's 18.8% equity holding in the Company and the terms on which the Company's energy drink products are distributed globally by members of TCCC's distribution network. Among other provisions, the agreements restrict TCCC from competing in the energy drink category, with certain exceptions including an exception relating to the Coca-Cola brand.

TCCC has developed three energy drink products that it believes it may market under the exception relating to the Coca-Cola brand. The Company believes that the exception does not apply. By mutual agreement, the issue was submitted to AAA arbitration on October 31, 2018 for a determination of whether TCCC is permitted to manufacture, market, sell or distribute these products. The matter has since proceeded to a hearing before the arbitrators. Due to the nature of the relief sought, no reasonably possible range of losses, if any, can be estimated.

The Company is currently a defendant in a number of personal injury lawsuits, claiming that the death or other serious injury of the plaintiffs was caused by consumption of Monster Energy® brand energy drinks. The plaintiffs in these lawsuits allege strict product liability, negligence, fraudulent concealment, breach of implied warranties and wrongful death. The Company believes that each complaint is without merit and plans a vigorous defense. The Company also believes that any damages, if awarded, would not have a material adverse effect on the Company's financial position or results of operations.

Furthermore, from time to time in the normal course of business, the Company is named in other litigation, including consumer class actions, intellectual property litigation and claims from prior distributors. Although it is not possible to predict the ultimate outcome of such litigation, based on the facts known to the Company, management believes that such litigation in aggregate will likely not have a material adverse effect on the Company's financial position or results of operations.

The Company evaluates, on a quarterly basis, developments in legal proceedings and other matters that could cause an increase or decrease in the amount of the liability that is accrued, if any, or in the amount of any related insurance reimbursements recorded. As of March 31, 2019, the Company's condensed consolidated balance sheet includes accrued loss contingencies of approximately \$0.02 million.

Stock Options

Under the Company's stock-based compensation plans, all stock options granted as of March 31, 2019 were granted at prices based on the fair value of the Company's common stock on the date of grant. The Company records compensation expense for stock options based on the estimated fair value of the options on the date of grant using the Black-Scholes-Merton option pricing formula with the assumptions included in the table below. The Company uses historical data to determine the exercise behavior, volatility and forfeiture rate of the options.

The following weighted-average assumptions were used to estimate the fair value of options granted during:

	Three-Months Ended March 31,	
	2019	2018
Dividend yield	0.0%	0.0%
Expected volatility	30.2%	34.9%
Risk-free interest rate	2.4%	2.8%
Expected term	6.0 years	6.0 years

Expected Volatility: The Company uses historical volatility as it provides a reasonable estimate of the expected volatility. Historical volatility is based on the most recent volatility of the stock price over a period of time equivalent to the expected term of the option.

Risk-Free Interest Rate: The risk-free interest rate is based on the U.S. treasury zero-coupon yield curve in effect at the time of grant for the expected term of the option.

Expected Term: The Company's expected term represents the weighted-average period that the Company's stock options are expected to be outstanding. The expected term is based on the expected time to post-vesting exercise of options by employees. The Company uses historical exercise patterns of previously granted options to derive employee behavioral patterns used to forecast expected exercise patterns.

18. SEGMENT INFORMATION

The Company has three operating and reportable segments, (i) Monster Energy® Drinks segment, which is primarily comprised of the Company's Monster Energy® drinks and Reign Total Body Fuel™ high performance energy drinks, (ii) Strategic Brands segment, which is comprised primarily of the various energy drink brands acquired from TCCC in 2015 as well as the Company's affordable energy brands, and (iii) Other segment, which is comprised of the AFF Third-Party Products.

The Company's Monster Energy® Drinks segment primarily generates net operating revenues by selling ready-to-drink packaged drinks primarily to bottlers and full service beverage distributors. In some cases, the Company sells directly to retail grocery and specialty chains, wholesalers, club stores, mass merchandisers, convenience chains, foodservice customers and the military.

The Company's Strategic Brands segment primarily generates net operating revenues by selling "concentrates" and/or "beverage bases" to authorized bottling and canning operations. Such bottlers generally combine the concentrates and/or beverage bases with sweeteners, water and other ingredients to produce ready-to-drink packaged energy drinks. The ready-to-drink packaged energy drinks are then sold to other bottlers, full service distributors or retailers, including, retail grocery and specialty chains, wholesalers, club stores, mass merchandisers, convenience chains, foodservice customers, drug stores and the military. To a lesser extent, the Company's Strategic Brands segment generates net operating revenues by selling certain ready-to-drink packaged energy drinks to bottlers and full service beverage distributors.

Generally, the Monster Energy® Drinks segment generates higher per case net operating revenues, but lower per case gross profit margin percentages than the Strategic Brands segment.

Net sales were \$946.0 million for the three-months ended March 31, 2019, an increase of approximately \$95.1 million, or 11.2% higher than net sales of \$850.9 million for the three-months ended March 31, 2018. Net sales for the three-months ended March 31, 2019 were positively impacted by approximately \$28.2 million as a result of a price increase that became effective on November 1, 2018 on certain of our Monster Energy® brand energy drinks in the United States and Canada. Net changes in foreign currency exchange rates had an unfavorable impact on net sales of approximately \$22.0 million for the three-months ended March 31, 2019.

Net sales for the Monster Energy® Drinks segment were \$870.4 million for the three-months ended March 31, 2019, an increase of approximately \$89.9 million, or 11.5% higher than net sales of \$780.5 million for the three-months ended March 31, 2018. Net sales for the Monster Energy® Drinks segment increased primarily due to increased sales by volume of our Monster Energy® brand energy drinks as a result of increased domestic and international consumer demand and sales of our Reign Total Body Fuel™ brand high performance energy drinks, introduced in March 2019. Net changes in foreign currency exchange rates had an unfavorable impact on net sales for the Monster Energy® Drinks segment of approximately \$18.2 million for the three-months ended March 31, 2019.

Net sales for the Strategic Brands segment were \$70.3 million for the three-months ended March 31, 2019, an increase of approximately \$4.5 million, or 6.9% higher than net sales of \$65.8 million for the three-months ended March 31, 2018. The increase in the average net sales per case was primarily attributable to a price increase that became effective on November 1, 2018 on certain of our Monster Energy® brand energy drinks in the United States.

Gross profit as a percentage of net sales was 60.6% for both the three-months ended March 31, 2019 and March 31, 2018. During the three-months ended March 31, 2019, gross profit as a percentage of net sales was positively impacted by the sales price increase discussed above, which was offset by geographical sales mix and an increase in certain input costs.

Operating Expenses. Total operating expenses were \$262.1 million for the three-months ended March 31, 2019, an increase of approximately \$26.7 million, or 11.4% higher than total operating expenses of \$235.3 million for the three-months ended March 31, 2018. The increase in operating expenses was primarily due to increased payroll expenses of \$8.6 million (of which \$1.9 million was related to an increase in stock-based compensation), increased expenditures of \$6.0 million for sponsorships and endorsements, increased expenditures of \$5.3 million for professional service fees, including legal and accounting costs, and increased expenditures of \$3.7 million in costs associated with distributor terminations.

The increase in operating income for the Monster Energy® Drinks segment was primarily the result of the \$89.9 million increase in net sales of our Monster Energy® Drinks segment for the three-months ended March 31, 2019.

Operating income for the Strategic Brands segment was \$45.6 million for the three-months ended March 31, 2019, an increase of approximately \$3.0 million, or 7.0% higher than operating income of \$42.6 million for the three-months ended March 31, 2018.

The decrease in the effective tax rate was primarily attributable to an increase in the deductions for equity compensation, as well as the increase in profits earned by certain foreign subsidiaries in lower tax jurisdictions than the United States.

Net Income. Net income was \$261.5 million for the three-months ended March 31, 2019, an increase of \$45.4 million, or 21.0% higher than net income of \$216.1 million for the three-months ended March 31, 2018. ***Gross sales are used internally by management as an indicator of and to monitor operating performance, including sales performance of particular products, salesperson performance, product growth or declines and overall Company performance. The use of gross sales allows evaluation of sales performance before the effect of any promotional items, which can mask certain performance issues. We therefore believe that the presentation of gross sales provides a useful measure of our operating performance. The use of gross sales is not a measure that is recognized under GAAP and should not be considered as an alternative to net sales, which is determined in accordance with GAAP, and should not be used alone as an indicator of operating performance in place of net sales. Additionally, gross sales may not be comparable to similarly titled measures used by other companies, as gross sales has been defined by our internal reporting practices. In addition, gross sales may not be realized in the form of cash receipts as promotional payments and allowances may be deducted from payments received from certain customers.*

The following table reconciles the non-GAAP financial measure of gross sales with the most directly comparable GAAP financial measure of net sales:

(In thousands)	Three-Months Ended		Percentage Change 19 vs. 18
	March 31,		
	2019	2018	
Gross sales, net of discounts and returns	\$ 1,090,426	\$ 990,639	10.1%
Less: Promotional and other allowances***	144,435	139,718	3.4%
Net Sales	<u>\$ 945,991</u>	<u>\$ 850,921</u>	11.2%

****Although the expenditures described in this line item are determined in accordance with GAAP and meet GAAP requirements, the presentation thereof does not conform to GAAP presentation requirements. Additionally, our definition of promotional and other allowances may not be comparable to similar items presented by other companies. Promotional and other allowances primarily include consideration given to our bottlers/distributors or retail customers including, but not limited to the following: (i) discounts granted off list prices to support price promotions to end-consumers by retailers; (ii) reimbursements given to our bottlers/distributors for agreed portions of their promotional spend with retailers, including slotting, shelf space allowances and other fees for both new and existing products; (iii) our agreed share of fees given to bottlers/distributors and/or directly to retailers for advertising, in-store marketing and promotional activities; (iv) our agreed share of slotting, shelf space allowances and other fees given directly to retailers, club stores and/or wholesalers; (v) incentives given to our bottlers/distributors and/or retailers for achieving or exceeding certain predetermined sales goals; (vi) discounted or free products; (vii) contractual fees given to our bottlers/distributors related to sales made by us direct to certain customers that fall within the bottlers'/distributors' sales territories; and (viii) certain commissions paid based on sales to our bottlers/distributors. The presentation of promotional and other allowances facilitates an evaluation of their impact on the determination of net sales and the spending levels incurred or correlated with such sales. Promotional and other allowances constitute a material portion of our marketing activities. Our promotional allowance programs with our numerous bottlers/distributors and/or retailers are executed through separate agreements in the ordinary course of business. These agreements generally provide for one or more of the arrangements described above and are of varying durations, ranging from one week to one year. The primary drivers of our promotional and other allowance activities for the three-months ended March 31, 2019 and 2018 were (i) to increase sales volume and trial, (ii) to address market conditions, and (iii) to secure shelf and display space at retail.*

Sales

The table below discloses selected quarterly data regarding sales for the three-months ended March 31, 2019 and 2018, respectively. Data from any one or more quarters or periods is not necessarily indicative of annual results or continuing trends.

Sales of beverages are expressed in unit case volume. A “unit case” means a unit of measurement equal to 192 U.S. fluid ounces of finished beverage (24 eight-ounce servings). Unit case volume means the number of unit cases (or unit case equivalents) of finished products or concentrates as if converted into finished products sold by us.

Our quarterly results of operations reflect seasonal trends that are primarily the result of increased demand in the warmer months of the year. It has been our experience that beverage sales tend to be lower during the first and fourth quarters of each calendar year. However, our experience with our energy drink products suggests they may be less seasonal than the seasonality of traditional beverages. In addition, our continued growth internationally may further reduce the impact of seasonality on our business. Quarterly fluctuations may also be affected by other factors including the introduction of new products, the opening of new markets where temperature fluctuations are more pronounced, the addition of new bottlers, customers and distributors, changes in the sales mix of our products and changes in advertising and promotional expenses.

Purchases of inventories, increases in accounts receivable and other assets, acquisition of property and equipment (including real property, personal property and coolers), leasehold improvements, advances for or the purchase of equipment for our bottlers, acquisition and maintenance of trademarks, payments of accounts payable, income taxes payable and purchases of our common stock are expected to remain our principal recurring use of cash.

Cash and cash equivalents, short-term and long-term investments. At March 31, 2019, we had \$618.3 million in cash and cash equivalents and \$263.7 million in short-term investments. We have historically invested these amounts in U.S. treasury bills, U.S. government agency securities and municipal securities, commercial paper, certificates of deposit, variable rate demand notes and money market funds meeting certain criteria. We maintain our investments for cash management purposes and not for purposes of speculation. Our risk management policies emphasize credit quality (primarily based on short-term ratings by nationally recognized statistical organizations) in selecting and maintaining our investments. We regularly assess market risk of our investments and believe our current policies and investment practices adequately limit those risks. However, certain of these investments are subject to general credit, liquidity, market and interest rate risks. These market risks associated with our investment portfolio may have an adverse effect on our future results of operations, liquidity and financial condition.

Of our \$618.3 million of cash and cash equivalents held at March 31, 2019, \$368.0 million was held by our foreign subsidiaries. No short-term or long-term investments were held by our foreign subsidiaries at March 31, 2019. We do not currently intend, nor do we foresee a need, to repatriate undistributed earnings of our foreign subsidiaries other than to repay certain intercompany debt owed to our U.S. operations.

We believe that cash available from operations, including our cash resources and access to credit, will be sufficient for our working capital needs, including purchase commitments for raw materials and inventory, increases in accounts receivable, payments of tax liabilities, expansion and development needs, purchases of capital assets, purchases of equipment, purchases of real property and purchases of shares of our common stock, through at least the next 12 months. Based on our current plans, at this time we estimate that capital expenditures are likely to be less than \$100.0 million through March 31, 2020. However, future business opportunities may cause a change in this estimate.
