Industry Overview

The “alternative” beverage category combines non-carbonated, ready-to-drink iced teas, lemonades, juice cocktails, single-serve juices and fruit beverages, ready-to-drink dairy and coffee drinks, energy drinks, sports drinks and single-serve still waters (flavored, unflavored and enhanced) with “new age” beverages, including sodas that are considered natural, sparkling juices and flavored sparkling beverages. According to Beverage Marketing Corporation, domestic U.S. wholesale sales in 2018 for the “alternative” beverage category of the market are estimated at approximately \$55.5 billion, representing an increase of approximately 6.7% over estimated domestic U.S. wholesale sales in 2017 of approximately \$52.0 billion.

Reportable Segments

We have three operating and reportable segments: (i) Monster Energy® Drinks segment (“Monster Energy® Drinks”), which is comprised of our Monster Energy® drinks, (ii) Strategic Brands segment (“Strategic Brands”), which is comprised primarily of the various energy drink brands acquired from The Coca-Cola Company (“TCCC”) in 2015 as well as our Predator® energy drinks and (iii) Other segment (“Other”), which is comprised of certain products sold by American Fruits and Flavors LLC (“AFF”) (a wholly-owned subsidiary of the Company) to independent third-party customers (“AFF Third-Party Products”). Corporate and unallocated amounts that do not specifically relate to a reportable segment have been allocated to “Corporate and unallocated.”

Our Monster Energy® Drinks segment primarily generates net operating revenues by selling ready-to-drink packaged energy drinks primarily to bottlers and full service beverage distributors. In some cases, we sell directly to retail grocery and specialty chains, wholesalers, club stores, mass merchandisers, convenience chains, drug stores, foodservice customers and the military.

Our Strategic Brands segment primarily generates net operating revenues by selling “concentrates” and/or “beverage bases” to authorized bottling and canning operations. Such bottlers generally combine the concentrates and/or beverage bases with sweeteners, water and other ingredients to produce ready-to-drink packaged energy drinks. The ready-to-drink packaged energy drinks are then sold to other bottlers, full service distributors or retailers, including, retail grocery and specialty chains, wholesalers, club stores, mass merchandisers, convenience chains, foodservice customers, drug stores and the military. To a lesser extent, our Strategic Brands segment generates net operating revenues by selling certain ready-to-drink packaged energy drinks to bottlers and full service beverage distributors.

Generally, the Monster Energy® Drinks segment generates higher per case net operating revenues, but lower per case gross profit margin percentages than the Strategic Brands segment.

For certain risks with respect to our energy drinks see “Part I, Item 1A – Risk Factors” below.

Corporate History

In the 1930s, Hubert Hansen and his sons started a business selling fresh non-pasteurized juices in Los Angeles, California. In 1977, Tim Hansen, one of the grandsons of Hubert Hansen, perceived a demand for shelf stable pasteurized natural juices and juice blends and formed Hansen Foods, Inc. (“HFI”). HFI expanded its product line from juices to include Hansen’s Natural Soda® brand sodas. In 1990, California Co-Packers Corporation (d/b/a Hansen Beverage Company) (“CCC”) acquired certain assets of HFI, including the right to market the Hansen’s® brand name. In 1992, Hansen Natural Corporation acquired the Hansen’s® brand natural soda and apple juice business from CCC. Under our ownership, the Hansen’s® beverage business significantly expanded to include a wide range of beverages within the growing “alternative” beverage category including, in particular, energy drinks. In 2012, we changed our name from Hansen Natural Corporation to Monster Beverage Corporation. In 2015, we acquired the Strategic Brands from TCCC and disposed of our non-energy drink business. In 2016, we completed our acquisition of flavor supplier and long-time business partner AFF.

2018 Product Introductions

During 2018, we continued to expand our existing portfolio of drinks and further develop our distribution markets. During 2018, we introduced the following products:

Products – Other Segment

AFF Third-Party Products:

AFF sells a limited number of products to independent third-party customers.

Other Products

We continue to evaluate and, where considered appropriate, introduce additional products, flavors and types of beverages to complement our existing product lines. We may also evaluate, and where considered appropriate, introduce additional types of consumer products we consider to be complementary to our existing products and/or to which our brand names are able to add value.

Products – Packaging

Our products are packaged in a variety of different package types and sizes including, but not limited to, aluminum cans, aluminum Cap Cans, sleek aluminum cans, aluminum cans with re-sealable ends as well as glass bottles and polyethylene terephthalate (PET) plastic bottles.

Manufacture and Distribution

We do not directly manufacture finished goods, but instead outsource the manufacturing process to third-party bottlers and contract packers.

AFF develops and manufactures the primary flavors for our Monster Energy® Drinks segment. We also purchase flavors, concentrates, sweeteners, juices, dietary ingredients, cans, bottles, caps, labels, trays, boxes and other ingredients for our beverage products from ingredient suppliers, which are delivered to our various third-party bottlers and co-packers. In some cases, certain common supplies may be purchased by our various third-party bottlers and co-packers. Depending on the product, the third-party bottlers or co-packers add filtered water and/or other ingredients (including dietary ingredients) for the manufacture and packaging of the finished products into our approved containers in accordance with our recipes and formulas. Depending on the beverage, the bottler/packer may also add carbonation to the products as part of the production process.

For our Strategic Brands segment, we primarily purchase concentrates and/or beverage bases from ingredient suppliers, which are then sold to certain of our various third-party bottlers/distributors. The third-party bottlers/distributors are responsible for the manufacture and packaging of the finished products, including the procurement of all other required ingredients and packaging materials. For certain limited products in the Strategic Brands segment, we may purchase flavors, concentrates, sweeteners, juices, dietary ingredients, cans, bottles, caps, labels, trays, boxes and other ingredients for our Strategic Brand products from our suppliers, which are delivered to our various third-party bottlers and co-packers. In some cases, certain common supplies may be purchased by our various third-party bottlers and co-packers. Depending on the product, the third-party bottlers or co-packers add filtered water and/or other ingredients (including dietary ingredients), for the manufacture and packaging of the finished products into our approved containers in accordance with our recipes and formulas. Depending on the beverage, the bottler/co-packer may also add carbonation to the products as part of the production process.

Co-Packing Arrangements

All of our finished goods are manufactured by various third-party bottlers and co-packers situated throughout the United States and abroad, under separate arrangements with each party. The majority of our co-packaging arrangements are generally on a month-to-month basis or are terminable upon request and do not generally obligate us to produce any minimum quantities of products within specified periods.

In some instances, subject to agreement, certain equipment may be purchased exclusively by us and/or jointly with our co-packers, and installed at their facilities to enable them to produce certain of our products. In certain cases, such equipment remains our property and is returned to us upon termination of the packing arrangements with such co-packers, unless we are reimbursed by the co-packer at the then book value or via a per-case credit over a pre-determined number of cases that are produced at the facilities concerned.

For our Monster Energy® Drinks segment, we are generally responsible for arranging for the purchase and delivery to our third-party bottlers and co-packers of the containers in which our beverage products are packaged.

Our products are packaged in a number of locations, both domestically and internationally, which enables us to produce products closer to the markets where they are sold, with the objective of reducing freight costs as well as transportation-related product damages. As distribution volumes increase in both our domestic and international markets, we will continue to source additional packing arrangements closer to such markets to further reduce freight costs.

Our ability to estimate demand for our products is imprecise, particularly with new products, and may be less precise during periods of rapid growth, particularly in new markets. If we materially underestimate demand for our products and/or are unable to secure sufficient ingredients or raw materials including, but not limited to, aluminum cans, aluminum Cap Cans, sleek aluminum cans, aluminum cans with re-sealable ends, PET plastic bottles, caps, glass bottles, labels, flavors, juice concentrates, coffee, tea, dietary ingredients, other ingredients and certain sweeteners, and/or procure adequate packing arrangements and/or obtain adequate or timely shipment of our products, we might not be able to satisfy demand on a short-term basis. (See “Part I, Item 1A – Risk Factors”).

Our production arrangements are generally of short duration or are terminable upon request. For certain of our products, including certain of our Monster Energy® brand energy drinks, our Java Monster® product line, our Espresso Monster® product line, our Caffé Monster® product line, our Monster Hydro® product line, our Muscle Monster® product line, our Juice Monster® product line and certain of our other products, there are limited co-packing facilities in our domestic and international markets with adequate capacity and/or suitable equipment to package our products. We believe a short disruption or delay in production would not significantly affect our revenues; however, as alternative co-packing facilities in our domestic and international markets with adequate long-term capacity may not be available for such products, either at commercially reasonable rates and/or within a reasonably short time period, if at all, a lengthy disruption or delay in production of any of such products could significantly affect our revenues.

We continue to actively seek alternative and/or additional co-packing facilities around the world (including in Africa, Asia, Australia, Central and South America, China, Europe, India, Mexico, the Middle East and the United States) with adequate capacity and capability for the production of our various products to minimize transportation costs and transportation-related damages as well as to mitigate the risk of a disruption in production and/or importation.

Distribution Agreements

During 2018, we continued to expand distribution of our products in both our domestic and international markets.

Distribution levels vary by product and geographic location. Net sales outside the United States were \$1.09 billion, \$909.3 million and \$733.7 million for the years ended December 31, 2018, 2017 and 2016, respectively.

Monster Energy® Distribution Agreements

We have entered into agreements with various bottlers/distributors providing for the distribution of our products during initial terms of up to twenty years, which may be renewed thereafter for additional terms ranging from one to five years, subject to certain terms and conditions which may vary depending on the form of the agreement. Such agreements remain in effect for their then-current term as long as our products are being distributed, but are subject to specified termination rights held by each party, which may include by way of example, and depending on the form of agreement, termination upon: mutual agreement; material breach of the agreement by, or an insolvency of, either party; deadlock; change of control; changes in legal or regulatory conditions and termination of certain related agreements. Additionally, we are entitled to terminate certain distribution agreements at any time without cause upon payment of a termination fee, including a limited number of distribution agreements with TCCC network bottlers that were entered into prior to 2015.

Certain of our material distribution arrangements for our Monster Energy® brand energy drinks, as amended from time to time, are described below:

- (a) Amended and Restated Distribution Coordination Agreement with TCCC, pursuant to which we have designated, and in the future may designate, subject to TCCC's approval, territories in Canada and the United States in which bottlers from TCCC's network of wholly or partially-owned and independent bottlers will distribute and sell, or continue to distribute and sell, our Monster Energy® brand energy drinks.
- (b) Amended and Restated Distribution Agreement with Coca-Cola Refreshments ("CCR"), pursuant to which CCR distributes, directly and through certain sub-distributors, our Monster Energy® brand energy drinks in a large portion of the United States. As of March 1, 2018, all of the territory previously falling under the Amended and Restated Distribution Agreement with CCR has been assigned by CCR to various TCCC network bottlers in the United States, including CCBCC Operations, LLC and Reyes Coca-Cola Bottling.
- (c) Amended and Restated International Distribution Coordination Agreement with TCCC, pursuant to which we have designated, and in the future may designate, countries, or territories within countries, in which we wish to appoint TCCC network bottlers to distribute and sell our Monster Energy® brand energy drinks, subject to TCCC's approval.
- (d) Additionally, we have entered into distribution agreements for certain of our Monster Energy® products with various TCCC network bottlers, both in the United States and internationally.

As of December 31, 2018, all distribution territories in the U.S. have been transitioned to TCCC network bottlers, except for those territories serviced by Big Geysler, Inc. and the Kalil Bottling Group.

Strategic Brands Distribution Agreements

We have entered into distribution coordination agreements with TCCC pursuant to which we have designated, and in the future may designate, subject to TCCC's approval, territories in which TCCC network bottlers will distribute our Strategic Brands energy drinks.

We have entered into agreements with various TCCC network bottlers, both in the United States and internationally, providing for the distribution and sale of our Strategic Brands energy drinks.

Raw Materials and Suppliers

The principal raw materials used in the manufacturing of our products are aluminum cans, aluminum Cap Cans, sleek aluminum cans, aluminum cans with re-sealable ends, PET plastic bottles, glass bottles, caps, as well as flavors, juice concentrates, glucose, sugar, sucralose, milk, cream, protein, coffee, tea, dietary ingredients and other packaging materials, the costs of which are subject to fluctuations.

AFF is the primary flavor supplier for our Monster Energy® brand energy drinks. We also purchase flavors from other suppliers as well as juices, dietary ingredients, glucose, sugar, sucralose, other sweeteners and other ingredients from independent suppliers located in the United States and abroad.

For our Strategic Brands energy drinks, we purchase flavors, concentrates and/or beverage bases from flavor suppliers including TCCC in the United States and abroad, and may purchase certain other ingredients from independent suppliers located in the United States and abroad.

With regard to our Java Monster®, Espresso Monster®, Caffè Monster® and Muscle Monster® product lines, the dairy, protein and retort co-packing industries are subject to shortages and increased demand from time to time, which may result in production disruption and/or higher prices.

For certain flavors purchased from third-party suppliers and used in a limited number of our Monster Energy® brand energy drinks and/or our Strategic Brands energy drinks, these third-party flavor suppliers own the proprietary rights to certain of their flavor formulas. We do not have possession of the list of such flavor ingredients or formulas used in the production of certain of our products and certain of our blended concentrates, and we may be unable to obtain comparable flavors or concentrates from alternative suppliers on short notice. Our third-party flavor suppliers generally do not make such flavors and/or blended concentrates available to other third-party customers.

We have identified alternative suppliers for many of the ingredients contained in many of our beverages. However, industry-wide shortages of certain flavors, fruits and fruit juices, coffee, tea, dairy-based products, dietary ingredients and sweeteners have been, and could from time to time in the future be, encountered, which could interfere with and/or delay production of certain of our products.

We continually endeavor to develop back-up sources of supply for certain of our flavors and concentrates purchased from third-party suppliers, as well as to negotiate arrangements with our existing suppliers, which would enable us to obtain access to certain of such concentrates or flavor formulas under certain circumstances. We have been partially successful in these endeavors. Additionally, in a limited number of cases, contractual restrictions and/or the necessity to obtain regulatory approvals and licenses may limit our ability to enter into agreements with alternative suppliers, manufacturers and/or distributors.

Competition

The beverage industry is highly competitive. The principal areas of competition are pricing, packaging, development of new products and flavors as well as promotional and marketing strategies. Our products compete with a wide range of drinks produced by a relatively large number of companies, many of which have substantially greater financial, marketing and distribution resources than we do.

Important factors affecting our ability to compete successfully include brand and product image, taste and flavor of products, trade and consumer promotions, rapid and effective development of new and unique cutting edge products, attractive and different packaging, brand exposure and marketing as well as pricing. We also rely on our bottlers and full service beverage distributors to allocate more attention to our products than those of our competitors, provide stable and reliable distribution and secure adequate shelf space in retail outlets. Competitive pressures in the “alternative,” energy, coffee and “functional” beverage categories could cause our products to maintain or to lose market share or we could experience price erosion, which could have a material adverse effect on our business and results of operations.

We have experienced and continue to experience competition from new entrants in the energy drink and energy shot categories. A number of companies who market and distribute iced teas, coffees, juice cocktails and enhanced waters in larger volume packages, such as 16- and 20-ounce glass and plastic bottles (including Bai, Sobe Life Water, BODYARMOR, Vitamin Water, CORE, Snapple, Arizona, Fuse, Ocean Spray, Honest Tea, Gold Peak Tea, Starbucks) and 12- and 16-ounce cans (such as Mountain Dew Kickstart), have added dietary supplements to their products with a view to marketing their products as “functional” or energy beverages or as having “functional” benefits. We believe that many of those products contain lower levels of dietary ingredients, principally deliver refreshment and are positioned differently from our energy or “functional” drinks.

We are also subject to increasing levels of regulatory issues including in relation to the registration and/or taxation of our products in certain new international markets, which may put us at a competitive disadvantage. (See “Government Regulation” below for additional information).

We compete not only for consumer preference, but also for maximum marketing and sales efforts by multi-brand licensed bottlers, brokers and distributors, many of which have a principal affiliation with competing companies and brands. Our products compete with all liquid refreshments and in many cases with products of much larger and in some cases better financed competitors, including the products of numerous nationally and internationally known producers such as TCCC, PepsiCo, Inc. (“PepsiCo”), Keurig Dr. Pepper Inc. (“KDP”) and Red Bull GmbH. We also compete with companies that are smaller or primarily local in operation. Our products also compete with private-label brands such as those carried by grocery store chains, convenience store chains and club stores.

Domestically, our energy drinks compete directly with Red Bull, Rockstar, Amp, Venom, VPX Redline, Rip It, Xenergy, 5-Hour Energy Shots, MiO Energy, Stacker 2, VPX Bang, V8 + Energy, Uptime, hi*ball, CELSIUS, C4 and many other brands. PepsiCo also markets and/or distributes additional products in that market segment such as Pepsi Max, Mountain Dew and Mountain Dew Kickstart. Internationally, our energy drinks compete with Red Bull, Rockstar, V-Energy, Lucozade and numerous local and private-label brands that usually differ from country to country, such as HELL, Shock, Tiger, Boost, TNT, Shark, Dragon, Score, Sting, Hot 6, Battery, Bullit, Flash Up, Black, Non-Stop, Bomba, Sementex, Vive 100, Dark Dog, Speed, Guarana, M-150, Lipovitan, Bacchus, Volt, Bolt, Mr. Big, Boom, Raptor, Amp, Fusion, Hi-Tiger, Eastroc Super Drink, Carabao, Power Horse, XL, Crazy Tiger, Effect, Missile, Nocco, Adrenaline Rush and a host of other international brands.

Our Java Monster®, Caffé Monster® and Espresso Monster® product lines compete directly with Starbucks Frappuccino, Starbucks Doubleshot, Starbucks Doubleshot Energy Plus Coffee and other Starbucks coffee drinks, Rockstar Roasted, Dunkin Donuts, Gold Peak, Stok, High Brew, McCafé, hi*ball and International Delight.

Our Muscle Monster® product line competes directly with Muscle Milk, Core Power, Premier Protein, Kellogg's Special K Protein, Bolthouse Farms Protein, EAS AdvantEDGE, EAS Myoplex, and Gatorade G Series 03 Recover.

Our Monster Hydro® product line competes directly with Vitamin Water, Sparkling Ice, Bai, Propel, Vita Coco, Lucozade and BODYARMOR.

Sales and Marketing

Our sales and marketing strategy for all our beverages is to focus our efforts on developing brand awareness through image-enhancing programs and product sampling. We use our branded vehicles and other promotional vehicles at events where we offer samples of our products to consumers. We utilize “push-pull” methods to enhance shelf and display space exposure in sales outlets (including racks, coolers and barrel coolers), advertising, in-store promotions and in-store placement of point-of-sale materials to encourage demand from consumers for our products. We also support our brands with prize promotions, price promotions, competitions, endorsements from selected public and sports figures, sports personality endorsements, sampling and sponsorship of selected athletes, teams, series, bands, esports, causes and events. In-store posters, outdoor posters, social media, concerts, print, radio and television advertising (directly and through our sponsorships and endorsements) and coupons may also be used to promote our brands.

We believe that one of the keys to success in the beverage industry is differentiation, making our brands and products visually appealing and distinctive from other beverages on the shelves of retailers. We review our products and packaging on an ongoing basis and, where practical, endeavor to make them different and unique. The labels and graphics for many of our products are redesigned and refreshed from time to time to maximize their visibility and identification, wherever they may be placed in stores, which we continue to reevaluate from time to time.

Where appropriate, we partner with our bottlers/distributors and/or retailers to assist our marketing efforts.

We increased expenditures for our sales and marketing programs by approximately 1.1% in 2018 compared to 2017. As of December 31, 2018, we employed 2,203 employees in sales and marketing activities, of which 1,424 were employed on a full-time basis.

Customers

Our customers are primarily full service beverage bottlers/distributors, retail grocery, drug and specialty chains, wholesalers, club stores, mass merchandisers, convenience chains, foodservice customers and the military. Percentages of our gross sales to our various customer types for the years ended December 31, 2018, 2017 and 2016 are reflected below. Such information includes sales made by us directly to the customer types concerned, which include our full service beverage bottlers/distributors in the United States. Such full service beverage bottlers/distributors in turn sell certain of our products to some of the same customer types listed below. We limit our description of our customer types to include only our sales to our full service bottlers/distributors without reference to such bottlers/distributors' sales to their own customers.

[Table of Contents](#)

	2018	2017	2016
U.S. full service bottlers/distributors	61%	63%	65%
International full service bottlers/distributors	31%	28%	25%
Club stores and mass merchandisers	6%	7%	8%
Retail grocery, specialty chains and wholesalers	1%	1%	1%
Other	1%	1%	1%

Our customers include Coca-Cola Refreshments USA, Inc., Coca-Cola Refreshments Canada Company (Coca-Cola Canada Bottling Limited from September 28, 2018), Coca-Cola Bottling Company, CCBCC Operations, LLC, United Bottling Contracts Company, LLC, Reyes Coca-Cola Bottling, Great Lakes Coca-Cola Bottling, Coca-Cola Southwest Beverages LLC, Coca-Cola of Northern New England, Swire Coca-Cola (USA), Liberty Coca-Cola Beverages and certain other TCCC independent bottlers (collectively the “TCCC North American Bottlers”), Coca-Cola European Partners, Coca-Cola Hellenic, Coca-Cola FEMSA, Coca-Cola Amatil, Swire Coca-Cola (China), COFCO Coca-Cola, Coca-Cola Beverages Africa, Coca-Cola İçecek and certain other TCCC network bottlers, Asahi Soft Drinks, Co., Ltd., Kalil Bottling Group, Wal-Mart, Inc. (including Sam’s Club), Costco Wholesale Corporation and Big Geysler, Inc. A decision by any large customer to decrease amounts purchased from us or to cease carrying our products could have a material negative effect on our financial condition and consolidated results of operations.

TCCC, through certain consolidated subsidiaries (the “TCCC Subsidiaries”), accounted for approximately 3%, 18% and 41% of our net sales for the years ended December 31, 2018, 2017 and 2016, respectively. As part of TCCC’s North America Refranchising initiative (the “North America Refranchising”), the territories of certain TCCC Subsidiaries have been transitioned to certain independent TCCC bottlers/distributors and bottlers/distributors which TCCC accounts for under the equity method (the “TCCC Related Parties”). Accordingly, our percentage of net sales to the TCCC Subsidiaries significantly decreased for the year ended December 31, 2018.

CCBCC Operations, LLC accounted for approximately 13%, 13% and 9% of our net sales for the years ended December 31, 2018, 2017 and 2016, respectively.

Reyes Coca-Cola Bottling accounted for approximately 12%, 6% and 2% of the Company’s net sales for the years ended December 31, 2018, 2017 and 2016, respectively.

Coca-Cola European Partners accounted for approximately 10%, 9% and 9% of the Company’s net sales for the years ended December 31, 2018, 2017 and 2016, respectively.

Seasonality

Sales of ready-to-drink beverages are somewhat seasonal, with the second and third calendar quarters accounting for the highest sales volumes. We believe that the volume of sales in the beverage industry is affected by weather conditions. However, the energy drink category appears to be less seasonal than traditional beverages. Quarterly fluctuations may also be affected by other factors including the introduction of new products, the opening of new markets, particularly internationally, where temperature fluctuations may be more pronounced, the addition of new bottlers and distributors, changes in the mix of the sales of our finished products and increased or decreased advertising and promotional expenses.

Intellectual Property

We presently have more than 10,400 registered trademarks and pending applications in various countries worldwide, and we apply for new trademarks on an ongoing basis. We regard our trademarks, service marks, copyrights, domain names, trade dress and other intellectual property as very important to our business. We consider Monster® (registered outside of the United States in certain jurisdictions), Monster Energy®, M®, Monster Energy Ultra®, Unleash the Beast!®, Mutant®, Monster Rehab®, Java Monster®, Muscle Monster®, Punch Monster®, Juice Monster®, Monster Hydro®, Espresso Monster®, Caffé Monster®, Monster Energy MAXX®, BU®, Nalu®, NOS®, Full Throttle®, Burn®, Mother®, Ultra Energy®, Play® and Power Play(stylized)®, Relentless®, Predator® and BPM® to be our core trademarks. We also own the intellectual property of our most important flavors for certain of our Monster Energy® Brand energy drinks in perpetuity.

BU®, Nalu®, Burn®, Mother®, Play®, Power Play(stylized)®, Relentless®, Ultra Energy® and BPM® are registered outside of the United States in certain jurisdictions.

We protect our trademarks by applying for registrations and registering our trademarks with the United States Patent and Trademark Office and with government agencies in other countries around the world, particularly where our products are distributed and sold. We assert copyright ownership of the statements, graphics and content appearing on the packaging of our products and in our marketing materials. We aggressively pursue individuals and/or entities seeking to profit from the unauthorized use of our trademarks and copyrights, including, without limitation, wholesalers, street vendors, retailers, online auction site sellers and website operators. In addition to initiating civil actions against these individuals and entities, we work with law enforcement officials where appropriate.

Depending upon the jurisdiction, trademarks are valid as long as they are in use and/or their registrations are properly maintained and they have not been found to have become generic. Registrations of trademarks can generally be renewed as long as the trademarks are in use.

We also enforce and protect our trademark rights against third parties infringing or disparaging our trademarks by opposing registration of conflicting trademarks and initiating litigation as necessary.

Government Regulation

The production, distribution and sale in the United States of many of our products are subject to various U.S. federal and state regulations, including but not limited to: the Federal Food, Drug and Cosmetic Act (“FD&C Act”); the Occupational Safety and Health Act; various environmental statutes; the Safe Drinking Water and Toxic Enforcement Act of 1986 (“California Proposition 65”) and a number of other federal, state and local statutes and regulations applicable to the production, transportation, sale, safety, advertising, marketing, labeling and ingredients of such products. Outside the United States, the production, distribution and sale of many of our products are also subject to numerous statutes and regulations.

We also may in the future be affected by other existing, proposed and potential future regulations or regulatory actions, including those described below, any of which could adversely affect our business, financial condition and results of operations. See “Part I, Item 1A – Risk Factors – Changes in government regulation, or failure to comply with existing regulations, could adversely affect our business, financial condition and results of operations” below for additional information.

Furthermore, legislation may be introduced in the United States and other countries at the federal, state and municipal level in respect of each of the subject areas discussed below. Public health officials and health advocates are increasingly focused on the public health consequences associated with obesity, especially as it affects children, and are seeking legislative change to reduce the consumption of sweetened beverages. There also has been an increased focus on caffeine content in beverages, as discussed below.

Product Formulation, Labeling and Advertising. Globally, we are subject to a number of regulations applicable to the formulation, labeling and advertising of our products. In California, we are subject to California Proposition 65, a law which requires that a specified warning be provided before exposing California consumers to any product that contains in excess of threshold amounts of a substance listed by California as having been found to cause cancer or reproductive toxicity. California Proposition 65 does not require a warning if the manufacturer of a product can demonstrate that the use of the product in question exposes consumers to an average daily quantity of a listed substance that is below that threshold amount, which is determined either by scientific criteria set forth in applicable regulations or via a “safe harbor” threshold that may be established by the state, or the substance is naturally occurring, is the result of necessary cooking, or is subject to another applicable exception. If we are required to add warning labels to any of our products or place warnings in certain locations where our products are sold, it will be difficult to predict whether, or to what extent, such a warning would have an adverse impact on sales of our products in those locations or elsewhere.

In addition, in May 2016, the U.S. Food and Drug Administration (the “FDA”) revised regulations with respect to serving size information and nutrition labeling on food and beverage products, including a new requirement to disclose the amount of added sugars in such products. These changes will go into effect on January 1, 2020. Further, in December 2018, the U.S. Department of Agriculture promulgated regulations requiring that, by January 1, 2022, the labels of certain bioengineered foods must include a disclosure that the food is bioengineered. We may incur significant costs to alter our existing packaging materials to comply with these and other new regulations. Additionally, these new regulations may impact, reduce and/or otherwise affect the purchase and consumption of our products by consumers.

Further, the City of San Francisco enacted an ordinance that would require health warnings on advertisements for certain sugar-sweetened beverages, though enforcement has been delayed due to a lawsuit challenging the ordinance. In January 2019, the U.S. Court of Appeals for the Ninth Circuit, sitting en banc, granted a preliminary injunction blocking enforcement of the ordinance, concluding that a First Amendment challenge to the ordinance was likely to succeed on the merits.

In July 2012, we received a subpoena from the Attorney General for the State of New York in connection with an investigation relating to the advertising, marketing, promotion, ingredients, usage and sale of our Monster Energy® brand energy drinks. We cannot predict the outcome of this inquiry and what effect, if any, it may have on our business, financial condition or results of operations.

Other countries, such as the member states of the Gulf Cooperation Council, Yemen, Colombia, Brazil, and the Dominican Republic, are also considering new labeling requirements, which may require us to amend our labels and warning statements. The United Kingdom Government has also suggested that it may review food labeling laws following the United Kingdom’s departure from the European Union (“Brexit”).

Age and Other Restrictions on Energy Drink Products. Proposals to limit or restrict the sale and/or advertising of energy drinks to minors and/or persons below a specified age, and/or restrict the venues in which energy drinks can be sold, and/or to restrict the use of the Supplemental Nutrition Assistance Program (formerly food stamps) to purchase energy drinks have been raised and/or enacted in certain U.S. states, counties, municipalities and/or in certain foreign countries. For example, Latvia, Lithuania and Turkey prohibit the sale of energy drinks to persons under the age of 18; Canada prohibits the promotion of energy drinks to children 12 years and under; Latvia and Scotland prohibit the sale of energy drinks in educational establishments; and Turkey prohibits the sale or advertising of energy drinks in “collective consumption areas.” Latin American countries such as Chile, Colombia, and Brazil are considering age and other sales restrictions on energy drinks, as are other European countries such as the United Kingdom, Sweden, Norway, Romania and Bulgaria.

Excise Taxes on Energy Drinks. Legislation that would impose an excise tax on sweetened beverages has been proposed in the U.S. Congress, in some state legislatures, and by some local governments, with excise taxes generally ranging between \$0.01 and \$0.02 per ounce of sweetened beverage. Berkeley, California became the first jurisdiction to pass such a measure, and a general tax of \$0.01 per ounce on certain sweetened drinks, including energy drinks, became effective on January 1, 2015. Other U.S. jurisdictions (including Albany, Oakland and San Francisco, California; Boulder, Colorado; and Philadelphia, Pennsylvania and Seattle, Washington) have passed similar measures, some of which have been challenged in litigation. The imposition of such taxes on our products would increase the cost of certain of our products or, to the extent levied directly on consumers, make certain of our products less affordable. Excise taxes on sweetened beverages already are in effect in certain foreign countries where we do business, such as France and Mexico. Similar measures have been enacted but are not yet enforced in, for example, Ireland, South Africa and the United Kingdom. Other countries, including Brazil, are considering similar measures. In addition, legislation has been proposed in certain jurisdictions that would specifically impose excise taxes on energy drinks. For example, Estonia and Ukraine are considering proposals that would impose an excise tax on energy drinks. Such targeted legislation has been passed in other countries. For instance, Hungary has instituted an excise tax to which our products are subject. Bahrain, Saudi Arabia and the United Arab Emirates began applying a selective tax of 100% on energy drinks in 2017, and there are indications that similar measures may be enacted in other Gulf Cooperation Council countries.

Limits on Caffeine Content. Legislation has been proposed to limit the amount of caffeine that may be contained in beverages, including energy drinks. Some jurisdictions where we do business have prescribed limited caffeine content for beverages. For example, on January 1, 2013, new requirements took effect in Canada that limited the amount of caffeine contained in any beverage in a single-serving can or bottle to less than 180 milligrams, and imposed limits on the concentration levels for caffeine. We adjusted the caffeine levels in certain of our Monster Energy® products that are sold in Canada to address these regulations, although the majority of our products were unaffected. Caffeine limit restrictions or restrictions on combining caffeine with other ingredients have also been implemented or proposed in other jurisdictions, including Turkey, India and Pakistan's Punjab region. Such restrictions could require reformulations of certain of our products. However, we may not be able to satisfactorily reformulate our products in all jurisdictions that adopt similar legislation.

Limitations on Container Size. We package our products in a variety of different package types and sizes including, for certain of our Monster Energy® brand energy drinks, aluminum cans larger than 16 fluid ounces. Certain jurisdictions, such as the member states of the Gulf Cooperation Council, Yemen, Costa Rica and the Dominican Republic, are considering container size limitations on energy drinks and other beverages which may require us to change the size of our products sold in these countries. Other countries, like England, have considered and rejected proposed can size limitations although it is open to such markets to revisit these and other similar proposals.

Compliance with Environmental Laws

Our facilities in the United States are subject to federal, state and local environmental laws and regulations. Our operations in other countries are subject to similar laws and regulations that may be applicable in such countries. Compliance with these provisions has not had, nor do we expect such compliance to have, any material adverse effect upon our capital expenditures, net income or competitive position.

Container Deposits. Various municipalities, states and foreign countries require that a deposit be charged for certain non-refillable beverage containers. The precise requirements imposed by these measures vary by jurisdiction. Other deposit, recycling or product stewardship proposals have been, and may in the future be, introduced in certain U.S. states, counties, municipalities and in certain foreign countries.

In California, we are required to collect redemption values from our customers and to remit such redemption values to the State of California Department of Resources Recycling and Recovery based upon the number of cans and bottles of certain carbonated and non-carbonated products sold. In certain other states and countries where our products are sold, we are also required to collect deposits from our customers and to remit such deposits to the respective jurisdictions based upon the number of cans and bottles of certain carbonated and non-carbonated products sold in such states.

Employees

As of December 31, 2018, we employed a total of 3,142 employees, of which 2,354 were employed on a full-time basis. Of our 3,142 employees, we employed 939 in administrative and operational capacities and 2,203 persons in sales and marketing capacities.

Available Information

As a public company, we are required to file our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, proxy statements on Schedule 14A and other information (including any amendments) with the Securities and Exchange Commission (the “SEC”). You can find the Company’s SEC filings at the SEC’s website, which contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC, at <http://www.sec.gov>.

Our Internet address is www.monsterbevcorp.com. Information contained on our website is not part of this annual report on Form 10-K. Our SEC filings (including any amendments) will be made available free of charge on www.monsterbevcorp.com, as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC. In addition, you may request a copy of these filings (excluding exhibits) at no cost by writing to, or telephoning us, at the following address or telephone number:

ITEM 1A. RISK FACTORS

In addition to the other information in this report, you should carefully consider the following risks. If any of the following risks actually occur, our business, financial condition and/or operating results could be materially adversely affected. The risk factors summarized below are not the only risks we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial may also materially adversely affect our business, financial condition and/or operating results.

The Company and TCCC have extensive commercial arrangements and, as a result, the Company’s future performance is substantially dependent on the success of its relationship with TCCC.

We have transitioned certain third parties’ rights to distribute the Company’s products in most territories in the U.S. to members of TCCC’s distribution network, which largely consists of independent bottlers/distributors. In addition, TCCC has become our preferred distribution partner globally with members of TCCC’s network distributing our products internationally, including in Africa, Asia, Canada, Central and South America, Europe, Mexico and the Middle East. As we continue our international expansion, we expect TCCC’s distribution network to continue as our preferred distribution partner globally. As a result, we have reduced our distributor diversification and are now substantially dependent on TCCC’s domestic and international distribution platforms.

[Table of Contents](#)

TCCC has a substantial equity investment in the Company. The Company, TCCC and certain affiliates are parties to various agreements in which TCCC and certain affiliates have agreed, subject to certain exceptions, not to compete in the energy drink category in certain territories prior to the termination of the applicable distribution coordination agreement with TCCC. The Company's distribution agreements with TCCC distributors also provide, subject to certain exceptions, that the applicable distributor will not distribute competitive energy drink products. While we believe that these agreements incentivize TCCC to take steps to ensure that our products receive the appropriate attention in the TCCC distribution system, there can be no assurance of this as disagreements as to the interpretation of the provisions in such agreements may arise and TCCC is a much larger company with many strategic priorities. In addition, TCCC does not control all members of its distribution system, many of which are independent companies that make their own business decisions that may not always align with TCCC's interests. Moreover, it is possible that we may fail to recognize the expected benefits of the new distribution arrangements regardless of TCCC's priorities or the priorities of the members of TCCC's distribution system. In any such case, our operating results could suffer and the value of the Company's common shares could be adversely affected.

On October 31, 2018, the Company and TCCC mutually agreed to submit an issue to the American Arbitration Association ("AAA") in order to obtain clarification of an exception to a provision under various agreements preventing TCCC from competing in the energy drink category. TCCC has developed three energy products that it believes it may market under such exception, relating to the Coca-Cola brand. We expect a decision will be reached during the second quarter of 2019. In addition, TCCC has indicated that it has suspended the proposed launch of such products until April 2019. While we believe that the exception does not apply to this situation, there can be no assurances that the arbitration will resolve in our favor. As the relief sought is limited, no reasonable possible range of losses, if any, can be estimated. In addition, if TCCC proceeds with the launch of such products, there can be no assurances that we will not encounter difficulties in maintaining our current revenues, market share or position in the energy drink category in such territories, which could adversely affect our business and operating results.

We derive virtually all of our revenues from energy drinks, and competitive pressure in the energy drink category could adversely affect our business and operating results.

Our focus is in the energy drink category, and our business is vulnerable to adverse changes impacting the energy drink category and business, which could adversely impact our business and the trading price of our common stock.

Virtually all of our sales are derived from our energy drinks, including our Monster Energy® brand energy drinks and our Strategic Brand energy drinks acquired from TCCC in 2015. Our Monster Energy® brand energy drinks and Strategic Brands represented 91.7% and 7.5% of net sales, respectively, for the year ended December 31, 2018. Any decrease in the sales of our Monster Energy® brand and other energy drinks could significantly adversely affect our future revenues and net income. Historically, we have experienced substantial competition from new entrants in the energy drink category as well as from the energy shot category. Domestically, our energy drinks compete directly with Red Bull, Rockstar, Amp, Venom, VPX Redline, Xenergy, MiO Energy, Rip It, Starbucks Doubleshot, Starbucks Doubleshot Energy Plus Coffee, Rockstar Roasted, 5-Hour Energy Shots, Stacker 2, VPX Bang, V8+ Energy, UPTIME, hi*ball, CELSIUS, C4 and many other brands. In addition, certain large companies, such as PepsiCo, market and/or distribute products in that market segment, such as Pepsi Max, Mountain Dew and Mountain Dew Kickstart. Internationally, our energy drinks compete with Red Bull, Rockstar, V-Energy, Lucozade and numerous local and private-label brands that usually differ from country to country, such as HELL, Shock, Tiger, Boost, Speed, TNT, Shark, Hot 6, Shark Energy, Dragon, Score, Sting, Battery, Bullit, Flash Up, Black, Non-Stop, Bomba, Semtex, Vive 100, Dark Dog, Guaraná, M-150, Lipovitan, Bacchus, Volt, Bolt, Mr. Big, Boom, Raptor, Amp, Fusion, Hi-Tiger,

Eastroc Super Drink, Carabao, Power Horse, XL, Crazy Tiger, Effect, Missile, NOCCO, Adrenaline Rush and a host of other international brands. Our Java Monster®, Espresso Monster® and Caffè Monster® product lines compete directly with Starbucks Frappuccino, Starbucks Doubleshot, Starbucks Doubleshot Energy Plus Coffee and other Starbucks coffee drinks, Rockstar Roasted, Dunkin Donuts, Gold Peak Tea, Stok, High Brew, McCafé, hi*ball and International Delight. Our Muscle Monster® product line competes directly with Muscle Milk, Core Power, Premier Protein, Kellogg's Special K Protein, Bolthouse Farms Protein, EAS AdvantEDGE, EAS Myoplex, Gatorade G Series 03 Recover, 5-Hour and PowerBar. Our Monster Hydro® product line competes directly with Vitamin Water, Sparkling Ice, Bai, Propel, Vita Coco, Lucozade and BODYARMOR. Competitive pressures in the energy drink category could impact our revenues, cause price erosion and/or lower market share, any of which could have a material adverse effect on our business and results of operations.

The Company, in several markets, owns multiple potentially competing brands in the energy drink category.

The Strategic Brands acquired from TCCC in 2015 represented 7.5% of consolidated net sales for the year ended December 31, 2018. In several markets our Monster Energy® brand energy drinks and Strategic Brands compete with each other. Although we continue to integrate the Strategic Brands with our broader energy drink portfolio, we may encounter difficulties managing different and potentially competing brands in such shared markets, which could adversely impact our business and results of operations.

TCCC is a significant shareholder of the Company and may have interests that are different from the Company's other shareholders (including current shareholders of the Company).

As of February 20, 2019, TCCC owned common shares of the Company representing approximately 19% of the total number of the Company's outstanding common shares. TCCC has also nominated two directors to the Company's board of directors. The number of directors that TCCC is entitled to nominate is subject to reduction in certain circumstances. In March 2018, we entered into an agreement extending TCCC's right to nominate two directors to serve until June 2019.

TCCC's ownership could also have an effect on the Company's ability to engage in a change in control transaction. TCCC is obligated for a period of time to vote all of its common shares of the Company in excess of 20% of the outstanding common shares in the same proportion as all common shares not owned by TCCC with respect to a proposal for a change of control. However, if TCCC were to oppose such a change-in-control transaction, a bidder would be required to secure the support of holders of 62.5% of the Company's common shares not owned by TCCC (assuming that TCCC increased its ownership to 20% of the Company's common shares) to achieve a vote of a majority of the Company's outstanding shares for a change-in-control transaction. In addition, TCCC would have a bidding advantage if the Company's board of directors were to seek to sell the Company in the future because TCCC would not need to pay a control premium on the shares it owns at such time. TCCC and the Company would also be permitted to terminate TCCC's distribution coordination agreements with the Company after a change in control of the Company. In such event, TCCC would receive a termination fee if TCCC terminated the distribution coordination agreements following a change in control of the Company involving certain TCCC competitors, or if the Company terminated following a change in control of the Company involving any third-party.

The interests of TCCC may be different from or conflict with the interests of the Company's other shareholders and, as a result, TCCC's influence may result in the delay or prevention of potential actions or transactions, including a potential change of management or control of the Company, even if such action or transaction may be beneficial to the Company's other shareholders. Moreover, TCCC's ownership of a significant amount of the Company's outstanding common shares could result in downward pressure on the trading price of the Company's common shares if TCCC were to sell a large portion of its shares (when permitted to sell) or as a result of the perception that such a sale might occur.

Changes in government regulation, or failure to comply with existing regulations, could adversely affect our business, financial condition and results of operations.

Legislation has been proposed and/or adopted at the U.S. federal, state and/or municipal level and proposed and/or adopted in certain foreign jurisdictions to restrict the sale of energy drinks (including, prohibiting the sale of energy drinks at certain establishments or pursuant to certain governmental programs), limit the content of caffeine and other ingredients in beverages, require certain product labeling disclosures and/or warnings, impose excise taxes, limit product size or impose age restrictions for the sale of energy drinks. For a discussion of certain of such legislation, see “Part I, Item 1 – Business – Government Regulation.” Furthermore, additional legislation may be introduced in the United States and other countries at the federal, state, local and municipal level in respect of each of the foregoing subject areas. Public health officials and health advocates are increasingly focused on the public health consequences associated with obesity, especially as it affects children, and are seeking legislative change to reduce the consumption of sweetened beverages. There also has been an increased focus on caffeine content in beverages. To the extent any such legislation is enacted in one or more jurisdictions where a significant amount of our products are sold, individually or in the aggregate, it could result in a reduction in demand for, or availability of, our energy drinks, and adversely affect our business, financial condition and results of operations.

The production, distribution and sale in the United States of many of our products are also currently subject to various federal and state regulations, including, but not limited to: the FD&C Act; the Occupational Safety and Health Act; various environmental statutes; data privacy laws; California Proposition 65; and various other federal, state and local statutes and regulations applicable to the production, transportation, sale, safety, advertising, labeling and ingredients of such products. Outside the United States, the production, distribution and sale of many of our products are also subject to numerous statutes and regulations. If a regulatory authority finds that a current or future product, its label, or a production run is not in compliance with any of these regulations, we may be fined, or such products may have to be recalled, reformulated and/or have the packaging changed, which could adversely affect our business, financial condition and results of operations.

We cannot predict the effect of inquiries from and/or actions by attorneys general, other government agencies and/or quasi-government agencies into the production, advertising, marketing, promotion, labeling, ingredients, usage and/or sale of our energy drink products.

We are subject to the risks of investigations and/or enforcement actions by state attorneys general and/or other government and/or quasi-governmental agencies relating to the advertising, marketing, promotion, ingredients, usage and/or sale of our energy drinks. If an inquiry by a state attorney general or other government or quasi-government agency finds that our products and/or the advertising, marketing, promotion, ingredients, usage and/or sale of such products are not in compliance with applicable laws or regulations, we may become subject to fines, product reformulations, container changes, changes in the usage or sale of our energy drink products and/or changes in our advertising, marketing and promotion practices, each of which could have an adverse effect on our business, financial condition or results of operations.

In addition, from time to time, government and/or quasi-governmental agencies may investigate the safety of caffeine and energy drinks. For example, in January 2013, the Company received and responded to inquiries from U.S. legislators in response to FDA’s investigation into the safety of caffeine in food products, particularly its effects on children and adolescents. These legislators ultimately released a report in January 2015, recommending, inter alia, that the energy drink industry not market to consumers under the age of 18 and not market their products for hydration, and that the FDA develop and release definitions and guidance for this market sector. In addition, other organizations, such as the European Food Safety Authority, have also published reports, studies, articles and opinions on caffeine and energy drinks.

Litigation regarding our products, and related unfavorable media attention, could expose us to significant liabilities and reduce demand for our products.

We have been and are currently named as a defendant in personal injury lawsuits which allege that consumption of our products has been responsible for wrongful deaths and/or injuries. We do not believe that our products are responsible for such wrongful deaths and/or injuries, and we intend to vigorously defend such lawsuits.

Several other lawsuits have been filed against us claiming that certain statements made in our advertisements and/or on the labels of our products were false and/or misleading or otherwise not in compliance with food standards under local law, and/or that our products are not safe. Putative class action lawsuits have also recently been filed against certain of our competitors asserting that certain claims in their advertisements amount to false advertising. We do not believe any statements made by us in our promotional materials or set forth on our product labels are false or misleading or noncompliant with local law, or that our products are in any way unsafe and we vigorously defend these lawsuits.

Any of the foregoing matters or other litigation, the threat thereof, or unfavorable media attention arising from pending or threatened product-related litigation could consume significant financial and managerial resources and result in decreased demand for our products, significant monetary awards against us and injury to our reputation.

Criticism of our energy drink products and/or criticism or a negative perception of energy drinks generally, could adversely affect us.

An unfavorable report on the health effects of caffeine, or criticism or negative publicity regarding the caffeine content and/or any other ingredients in our products or energy drinks generally, including product safety concerns, could have an adverse effect on our business, financial condition and results of operations. Articles critical of the caffeine content and/or other ingredients in energy drinks and/or articles indicating certain health risks of energy drinks have been published in recent years. We believe the overall growth of the energy drink market in the U.S. may have been negatively impacted by the ongoing negative publicity and comments that continue to appear in the media questioning the safety of energy drinks, and suggesting limitations on their ingredients (including caffeine), and/or the levels thereof, and/or imposing minimum age restrictions for consumers. In early 2018, certain retailers in the United Kingdom announced the introduction of voluntary retailer measures to prevent the sale of energy drinks to individuals under the age of 16. If reports, studies or articles critical of caffeine and/or energy drinks continue to be published or are published in the future, or additional voluntary measures are taken, they could adversely affect the demand for our products.

Increased competition could hurt our business.

The beverage industry is highly competitive. The principal areas of competition are pricing, packaging, development of new products, flavors, product positioning as well as promotion and marketing strategies. Our products compete with a wide range of drinks produced by a relatively large number of manufacturers, some of which have substantially greater financial, marketing and distribution resources than we do.

[Table of Contents](#)

Important factors affecting our ability to compete successfully include the taste and flavor of our products, trade and consumer promotions, rapid and effective development of new and unique cutting edge products, attractive and different packaging, branded product advertising and pricing. Our products compete with all liquid refreshments and in some cases with products of much larger and substantially better financed competitors, including the products of numerous nationally and internationally known producers such as TCCC, PepsiCo, Red Bull GmbH and KDP. We also compete with companies that are smaller or primarily national or local in operations. Our products also compete with private-label brands such as those carried by grocery store chains, convenience store chains and club stores. The rapid growth in sales through e-commerce retailers, e-commerce websites, mobile commerce applications and subscription services, may result in a shift away from physical retail operations to digital channels.

Due to competition in the beverage industry, there can be no assurance that we will not encounter difficulties in maintaining our current revenues, market share or position in the beverage industry. If our revenues decline, our business, financial condition and results of operations could be adversely affected.

Our inability to innovate successfully and to provide new cutting edge products could adversely affect our business and financial results.

Our ability to compete in the highly competitive beverage industry and to achieve our business growth objectives depends, in part, on our ability to develop new flavors, products and packaging. The success of our innovation, in turn, depends on our ability to identify consumer trends and cater to consumer preferences. If we are not successful in our innovation activities, our business, financial condition and results of operation could be adversely affected.

Uncertainty in the financial markets and other adverse changes in general economic or political conditions in any of the major countries in which we do business could adversely affect our industry, business and results of operations.

Global economic uncertainties, including foreign currency exchange rates, affect businesses such as ours in a number of ways, making it difficult to accurately forecast and plan our future business activities. There can be no assurance that economic improvements will occur, or that they would be sustainable, or that they would enhance conditions in markets relevant to us. In addition, we cannot predict the duration and severity of disruptions in any of our markets or the impact they may have on our customers or business, as our expansion outside of the United States has increased our exposure to any developments or crises in African, Asian, European and other international markets. Unfavorable economic conditions and financial uncertainties in our major international markets, including uncertainties surrounding the United Kingdom's impending withdrawal from the European Union, commonly referred to as "Brexit," and increases in tariffs that may result, and unstable political conditions, including civil unrest and governmental changes, in certain of our other international markets could undermine global consumer confidence and reduce consumers' purchasing power, thereby reducing demand for our products.

Changes in consumer preferences may reduce demand for some of our products.

The beverage industry is subject to changing consumer preferences and shifts in consumer preferences may adversely affect us. There is increasing awareness of and concern for the health consequences of obesity. This may reduce demand for our non-diet beverages, which could reduce our revenues and adversely affect our results of operations. Recently, concerns have emerged regarding diet sodas and in particular, aspartame, which is contained in certain of our Strategic Brands energy drinks.

Consumers are seeking greater variety in their beverages. Our future success will depend, in part, upon our continued ability to develop and introduce different and innovative beverages that appeal to consumers. In order to retain and expand our market share, we must continue to develop and introduce different and innovative beverages and be competitive in the areas of taste, quality and price, although there can be no assurance of our ability to do so. There is no assurance that consumers will continue to purchase our products in the future. Product lifecycles for some beverage brands, products and/or

packages may be limited to a few years before consumers' preferences change. The beverages we currently market are in varying stages of their product lifecycles, and there can be no assurance that such beverages will become or remain profitable for us. We may be unable to achieve volume growth through product and packaging initiatives. We may also be unable to penetrate new markets. Additionally, as shopping patterns are being affected by the digital evolution, with customers embracing shopping by way of mobile device applications, e-commerce retailers and e-commerce websites or platforms, we may be unable to address or anticipate changes in consumer shopping preferences. If our revenues decline, our business, financial condition and results of operations could be adversely affected.

Our continued expansion outside of the United States exposes us to uncertain conditions and other risks in international markets.

We have continued expanding our operations internationally into a variety of new markets, including launches in China and various African and Middle Eastern countries. Our gross sales to customers outside of the United States were approximately 31%, 28% and 25% of consolidated gross sales for the years ended December 31, 2018, 2017 and 2016, respectively. As our growth strategy includes further expanding our international business, if we are unable to continue to expand distribution of our products outside the United States, our growth rate could be adversely affected. In many international markets, we have limited operating experience and in some areas we have no operating experience. It is costly to establish, develop and maintain international operations and develop and promote our brands in international markets. Our percentage gross profit margins in many international markets are expected to be less than the comparable percentage gross profit margins obtained in the United States. We face and will continue to face substantial risks associated with having foreign operations, including: economic and/or political instability in our international markets; unfavorable foreign currency exchange rates; restrictions on or costs relating to the repatriation of foreign profits to the United States, including possible taxes and/or withholding obligations on any repatriations; and tariffs and/or trade restrictions. These risks could have a significant impact on our ability to sell our products on a competitive basis in international markets and could have a material adverse effect on our business, financial condition and results of operations. Also, our operations outside of the United States are subject to risks relating to appropriate compliance with legal and regulatory requirements in local jurisdictions, potential difficulties in staffing and managing local operations, higher product damages, particularly when products are shipped long distances, potentially higher incidence of fraud and/or corruption, credit risk of local customers and distributors and potentially adverse tax consequences.

Global or regional catastrophic events could impact our operations and affect our ability to grow our business.

Because of our increasingly global presence, our business could be affected by unstable political conditions, civil unrest, large-scale terrorist acts, especially those directed against the United States or other major industrialized countries where our products are distributed, the outbreak or escalation of armed hostilities, major natural disasters or widespread outbreaks of infectious diseases. Such events could impact the production and/or distribution of our products. In addition, such events could disrupt global or regional economic activity, which could affect consumer purchasing power, thereby reducing demand for our products. If we are unable to grow our business internationally as a result of these factors, our growth rate could decline.

Fluctuations in foreign currency exchange rates may adversely affect our operating results.

We are exposed to foreign currency exchange rate risk with respect to our sales, expenses, profits, assets and liabilities denominated in currencies other than the U.S. dollar. We may enter into forward currency exchange contracts with financial institutions to create an economic hedge to specifically manage a portion of the foreign exchange risk exposure associated with certain consolidated subsidiaries' non-functional currency denominated assets and liabilities. We have not used instruments to hedge against all foreign currency risks and are therefore not protected against all foreign currency fluctuations. As a result, our reported earnings may be affected by changes in foreign currency exchange rates. Moreover, any favorable impacts to profit margins or financial results from fluctuations in foreign currency exchange rates are likely to be unsustainable over time. Foreign currency transaction losses were \$4.0 million, \$3.3 million and \$9.7 million for the years ended December 31, 2018, 2017 and 2016, respectively.

Default by or failure of one or more of our counterparty financial institutions could cause us to incur significant losses.

As part of any hedging activities that we may conduct, we may enter into transactions involving derivative financial instruments, including forward contracts, commodity futures contracts, option contracts, collars and swaps, with various financial institutions. We also have significant amounts of cash, cash equivalents and other investments on deposit or in accounts with banks or other financial institutions both in the United States and abroad, exposing us to risk of default by or failure of such counterparty financial institutions. This risk of counterparty default or failure is greater during periods of economic downturn or uncertainty in financial markets. If one of our counterparties became insolvent or filed for bankruptcy, our ability to recover losses incurred due to the default or to retrieve assets deposited or held in accounts with such counterparty may be limited by the counterparty's liquidity or applicable laws governing insolvency and bankruptcy proceedings. Default by or failure of one or more of our counterparties could cause us to incur significant losses and negatively impact our results of operations and financial condition.

We rely on bottlers and other contract packers to manufacture our products. If we are unable to maintain good relationships with our bottlers and contract packers and/or their ability to manufacture our products becomes constrained or unavailable to us, our business could suffer.

Our acquisition of AFF in 2016 brought our primary flavor supplier in-house for the majority of our Monster Energy® brand energy drinks. However, we also procure flavors from other independent flavor suppliers. We do not manufacture finished goods, but instead outsource manufacturing of our finished goods to bottlers and other contract packers. As a result, in the event of a disruption and/or delay, we may be unable to procure alternative packing facilities at commercially reasonable rates and/or within a reasonably short time period. In addition, there are limited alternative packing facilities in our domestic and international markets with adequate capacity and/or suitable equipment for many of our products, including certain of our Monster Energy® brand energy drinks, our Muscle Monster® product line, our Java Monster® product line, our Espresso Monster® product line, our Monster Hydro® product line and certain of our other products. For example, in the second half of 2016 and into the fourth quarter of 2017, sales of our Java Monster® and Muscle Monster® product lines were adversely impacted by production capacity constraints resulting from production and maintenance issues with certain of our co-packers. While this short-term disruption in production did not significantly affect our revenues, a lengthy disruption or delay in the production of any of our products could significantly adversely affect our revenues from such products because alternative co-packing facilities in the United States and abroad with adequate long-term capacity may not be available for such products either at commercially reasonable rates and/or costs and/or within a reasonably short time period, if at all. In addition, recently there has been a consolidation of co-packers. If we are unable to maintain good relationships with our largest co-packers, or if our costs of co-packing increase, our business, financial condition and results of operations could be adversely affected.

[Table of Contents](#)

We rely on bottlers and distributors to distribute our products. If we are unable to maintain good relationships with our existing bottlers and distributors and/or secure such bottlers and distributors, our business could suffer.

Many of our bottlers/distributors are affiliated with and manufacture and/or distribute other soda, carbonated and non-carbonated brands and other beverage products (both alcoholic and non-alcoholic). In many cases, such products compete directly with our products.

Unilateral decisions could be taken by our bottlers/distributors, convenience and gas chains, grocery chains, specialty chain stores, club stores and other customers to discontinue carrying certain or all of our products that they are carrying at any time, which could cause our business to suffer.

The TCCC North American Bottlers, Coca-Cola European Partners, Coca-Cola Hellenic, Coca-Cola FEMSA, Coca-Cola Amatil, Swire Coca-Cola (China), COFCO Coca-Cola, Coca-Cola Beverages Africa and Coca-Cola İçecek are our primary domestic and international distributors of our products. As a result, if we are unable to maintain good relationships with the TCCC North American Bottlers, Coca-Cola European Partners, Coca-Cola Hellenic, Coca-Cola FEMSA, Coca-Cola Amatil, Swire Coca-Cola (China), COFCO Coca-Cola, Coca-Cola Beverages Africa and/or Coca-Cola İçecek, or if the TCCC North American Bottlers, Coca-Cola European Partners, Coca-Cola Hellenic, Coca-Cola FEMSA, Coca-Cola Amatil, Swire Coca-Cola (China), COFCO Coca-Cola, Coca-Cola Beverages Africa and/or Coca-Cola İçecek do not effectively focus on marketing, promoting, selling and distributing our products, sales of our products could be adversely affected.

TCCC, through the TCCC Subsidiaries, accounted for approximately 3%, 18% and 41% of our net sales for the years ended December 31, 2018, 2017 and 2016, respectively. A decision by certain TCCC North American Bottlers (including CCBCC Operations, LLC and Reyes Coca-Cola Bottling), Coca-Cola European Partners, Coca-Cola Hellenic, Coca-Cola FEMSA, Coca-Cola Amatil, Swire Coca-Cola (China), COFCO Coca-Cola, Coca-Cola Beverages Africa, Coca-Cola İçecek, Wal-Mart, Inc. (including Sam's Club), or any other large customer to decrease the amount purchased from us or to cease carrying our products could have a material adverse effect on our financial condition and consolidated results of operations.

The marketing efforts of our distributors are important for our success. If our brands prove to be less attractive to our existing bottlers and distributors, if we fail to attract additional bottlers and distributors, and/or our bottlers/distributors do not market, promote and distribute our products effectively, our business, financial condition and results of operations could be adversely affected.

Increases in costs and/or shortages of raw materials and/or ingredients and/or fuel and/or costs of co-packing could harm our business.

The principal raw materials used by us are aluminum cans, sleek aluminum cans, aluminum Cap Cans, aluminum cans with re-sealable ends, PET plastic bottles, glass bottles, caps, flavors, juice concentrates, glucose, sugar, sucralose, milk, cream, protein, coffee, tea, dietary ingredients and other packaging materials, the costs and availability of which are subject to fluctuations. For certain flavors purchased from third-party suppliers and used in a limited number of our Monster Energy® brand energy drinks and/or our Strategic Brands energy drinks, these third-party flavor suppliers own the proprietary rights to certain of their flavor formulas. We do not have possession of the list of such flavor ingredients or formulas used in the production of certain of our products and certain of our blended concentrates, and we may be unable to obtain comparable flavors or concentrates from alternative suppliers on short notice. Our third-party flavor suppliers generally do not make such flavors and/or blended concentrates available to other third party customers. We have identified alternative suppliers for certain of the ingredients contained in many of our beverages. However, industry-wide shortages of certain flavors, fruits and fruit juices, coffee, tea, dairy-based products, dietary ingredients and sweeteners have been, and could from

time to time in the future be, encountered, which could interfere with and/or delay production of certain of our products. In addition, certain of our co-packing arrangements allow such co-packers to increase their fees based on certain of their own cost increases. We are uncertain whether the prices of any of the above or any other raw materials or ingredients, certain of which have recently risen, will continue to rise or may rise in the future. We are unsure whether we will be able to pass any of such increases on to our customers. Although we generally do not use hedging agreements or alternative instruments to manage the risks associated with securing sufficient ingredients or raw materials, from time to time, we, through our aluminum can suppliers, enter into purchase agreements for the purchase of aluminum, as well as enter into purchase agreements for portions of our annual anticipated requirements for certain of our other raw materials such as glucose, sugar and sucralose. In 2018, the United States imposed tariffs on steel and aluminum as well as on goods imported from China and certain other countries. Additional tariffs imposed by the United States on a broader range of imports, or further retaliatory trade measures taken by China or other countries in response, could result in an increase in supply chain costs.

In addition, some of these raw materials, including certain sizes of cans, are available from limited suppliers.

Our failure to accurately estimate demand for our products could adversely affect our business and financial results.

We may not correctly estimate demand for our existing products and/or new products. Our ability to estimate demand for our products is imprecise, particularly with regard to new products, and may be less precise during periods of rapid growth, particularly in new markets. If we materially underestimate demand for our products or are unable to secure sufficient ingredients or raw materials including, but not limited to, aluminum cans, aluminum Cap Cans, sleek aluminum cans, aluminum cans with re-sealable ends, PET plastic bottles, glass bottles, caps, labels, sucralose, flavors, dietary ingredients, juice concentrates, certain sweeteners, coffee, tea, protein and packaging materials or experience difficulties with our co-packing arrangements, including production shortages or quality issues, we might not be able to satisfy demand on a short-term basis. Moreover, industry-wide shortages of certain juice concentrates, dietary ingredients and sweeteners have been and could, from time to time in the future, be experienced, resulting in production fluctuations and/or product shortages. We generally do not use hedging agreements or alternative instruments to manage this risk. Such shortages could interfere with and/or delay production of certain of our products and could have a material adverse effect on our business and financial results.

If we do not maintain sufficient inventory levels, if we are unable to deliver our products to our customers in sufficient quantities, and/or if our customers' or retailers' inventory levels are too high, our operating results could be adversely affected.

If we do not accurately anticipate the future demand for a particular product or the time it will take to obtain new inventory, our inventory levels may be inadequate and our results of operations may be negatively impacted. If we fail to meet our shipping schedules, we could damage our relationships with distributors and/or retailers, increase our distribution costs and/or cause sales opportunities to be delayed or lost. In order to be able to deliver our products on a timely basis, we need to maintain adequate inventory levels of the desired products. If the inventory of our products held by our distributors and/or retailers is too high, they will not place orders for additional products, which could unfavorably impact our future sales and adversely affect our operating results.

The costs of packaging supplies are subject to price increases from time to time, and we may be unable to pass all or some of such increased costs on to our customers.

Many of our packaging supply contracts allow our suppliers to alter the costs they charge us for packaging supplies based on changes in the costs of the underlying commodities that are used to produce those packaging supplies, such as aluminum for cans and pulp and paper for cartons and/or trays. These changes in the prices we pay for our packaging supplies occur at certain predetermined times that vary by product and supplier. In some cases, we are able to fix the prices of certain packaging supplies and/or

[Table of Contents](#)

commodities for a reasonable period. In other cases, we bear the risk of increases in the costs of these packaging supplies, including the underlying costs of the commodities that comprise these packaging supplies. We do not use derivative instruments to manage this risk. If the costs of these packaging supplies increase, we may be unable to pass these costs along to our customers through corresponding adjustments to the prices we charge, which could have a material adverse effect on our results of operations.

Our intellectual property rights are critical to our success, and the loss of such rights could materially adversely affect our business.

We own numerous trademarks that are very important to our business. We also own the copyright in, and to, a portion of the content on the packaging of our products. We regard our trademarks, copyrights and similar intellectual property as critical to our success and attempt to protect such intellectual property through registration and enforcement actions. However, there can be no assurance that other parties will not infringe or misappropriate our trademarks, copyrights and similar proprietary rights. If we lose some or all of our intellectual property rights, our business may be materially adversely affected.

Negative publicity (whether or not warranted) concerning product safety or quality, human and workplace rights, obesity or other issues could damage our brand image and corporate reputation, and may cause our business to suffer.

Our success depends on our ability to build and maintain the brand image for our existing products, new products and brand extensions and maintain our corporate reputation. There can be no assurance that our advertising, marketing and promotional programs and our commitment to product safety and quality and human rights will have the desired impact on our products' brand image and on consumer preference and demand. Product safety, quality and/or ingredient content issues, efficacy or lack thereof (real or imagined), or allegations of product contamination, even if false or unfounded, could tarnish the image of the affected brands and may cause consumers to choose other products. Furthermore, our brand image or perceived product quality could be adversely affected by litigation, unfavorable reports in the media (internet or elsewhere), studies in general and regulatory or other governmental inquiries (in each case whether involving our products or those of our competitors) and proposed or new legislation affecting our industry. In addition, from time to time, there are public policy endeavors that are either directly related to our products and packaging or to our business. These public policy debates can occasionally be the subject of backlash from advocacy groups that have a differing point of view and could result in adverse media and consumer reaction, including product boycotts. Similarly, our sponsorship relationships could subject us to negative publicity as a result of actual or alleged misconduct by individuals or entities associated with organizations we sponsor or support. Likewise, campaigns by activists connecting us, or our supply chain, with human and workplace rights issues could adversely impact our corporate image and reputation. We have made a number of commitments to respect human rights, including through our Human Rights Policy, Supplier Code of Conduct, Code of Business Conduct and Ethics and our grievance procedures. Allegations, even if untrue, that we are not respecting one or more of the 30 human rights found in the United Nations Universal Declaration of Human Rights; actual or perceived failure by our suppliers or other business partners to comply with applicable labor and workplace rights laws, including child labor laws, or their actual or perceived abuse or misuse of migrant workers; and adverse publicity surrounding obesity and health concerns related to our products, water usage, environmental impact, labor relations or the like could negatively affect our Company's overall reputation and brand image, which in turn could have a negative impact on our products' acceptance by consumers.

[Table of Contents](#)

If we encounter product recalls, our business may suffer and we may incur material losses.

We may be required from time to time to recall products entirely or from specific co-packers, markets or batches if such products become contaminated, damaged, mislabeled or otherwise materially non-compliant with applicable regulatory requirements. Material product recalls could adversely affect our profitability and our brand image. We do not maintain recall insurance.

If we are not able to retain the full-time services of senior management, there may be an adverse effect on our operations and/or our operating performance until we find suitable replacements.

Our business is dependent, to a large extent, upon the services of our senior management. We do not maintain key person life insurance on any members of our senior management. The loss of services of either Rodney Sacks, Chairman and Chief Executive Officer, Hilton Schlosberg, Vice-Chairman, President and Chief Financial Officer, or any other key members of our senior management could adversely affect our business until suitable replacements can be found. There may be a limited number of personnel with the requisite skills to serve in these positions, and we may be unable to locate or employ such qualified personnel on acceptable terms.

Climate change may negatively affect our business.

There is concern that a gradual increase in global average temperatures due to increased carbon dioxide and other greenhouse gases in the atmosphere could cause significant changes in weather patterns around the globe and an increase in the frequency and severity of natural disasters. While warmer weather has historically been associated with increased sales of our products, changing weather patterns could result in decreased agricultural productivity in certain regions, which may limit availability and/or increase the cost of certain key ingredients, juice concentrates, and dietary and other ingredients used in our products and could impact the food security of communities around the world. Increased frequency or duration of extreme weather conditions could also impair production capabilities, disrupt our supply chain (including, without limitation, the availability of, and/or result in higher prices for, juice concentrates, natural flavors and dietary and other ingredients) and/or impact demand for our products. Natural disasters and extreme weather conditions, such as hurricanes, wildfires, earthquakes or floods, may affect our operations and the operation of our supply chain and unfavorably impact the demand for, or our consumers' ability to purchase, our products. The predicted effects of climate change may also result in challenges regarding availability and quality of water, or less favorable pricing for water, which could adversely impact our business and results of operations. In addition, public expectations for reductions in greenhouse gas emissions could result in increased energy, transportation and raw material costs, and may require us to make additional investments in facilities and equipment. As a result, the effects of climate change could have a long-term adverse impact on our business and results of operations. Sales of our products may also be influenced to some extent by weather conditions in the markets in which we operate. Weather conditions may influence consumer demand for certain of our beverages, which could have an effect on our operations, either positively or negatively.

Potential changes in accounting standards or practices and/or taxation may adversely affect our financial results.

We cannot predict the impact that future changes in accounting standards or practices may have on our financial results. New accounting standards could be issued that change the way we record revenues, expenses, assets and liabilities. These changes in accounting standards could adversely affect our reported earnings. Increases in direct and indirect income tax rates could affect after-tax income. Equally, increases in indirect taxes (including environmental taxes pertaining to the disposal of beverage containers and/or indirect taxes on beverages generally or energy drinks in particular) could affect our products' affordability and reduce our sales.

Fluctuations in our effective tax rate could adversely affect our financial condition and results of operations.

We are subject to income and other taxes in both the U.S. and certain foreign jurisdictions. Therefore, we may be subjected to audits for multiple tax years in various jurisdictions at once. At any given time, events may occur which change our expectation about how any such tax audits will be resolved and thus, there could be variability in our quarterly and/or annual tax rates, because these events may change our plans for uncertain tax positions. On December 22, 2017, the President of the United States signed into law the Tax Cuts and Jobs Act (the “Tax Reform Act”) which imposes broad and complex changes to the U.S. tax code. We completed our analysis of the Tax Reform Act during 2018 and adjusted the 2017 provisional estimate to the final amounts in accordance with Staff Accounting Bulletin No. 118.

Volatility of stock price may restrict sale opportunities.

Our stock price is affected by a number of factors, including stockholder expectations, financial results, the introduction of new products by us and our competitors, general economic and market conditions, estimates and projections by the investment community and public comments by other parties as well as many other factors including litigation, many of which are beyond our control. We do not provide guidance on our future performance, including, but not limited to, our revenues, margins, product mix, operating expenses or net income. We may be unable to achieve analysts’ net revenue and/or earnings forecasts, which are based on their own projected revenues, sales volumes and sales mix of many product types and/or new products, certain of which are more profitable than others, as well as their own estimates of gross margin and operating expenses. There can be no assurance that we will achieve any such projected levels or mixes of product sales, revenues, gross margins, operating profits and/or net income. As a result, our stock price is subject to significant volatility, and stockholders may not be able to sell our stock at attractive prices. In addition, periods of volatility in the market price of our stock could result in the initiation of securities class action litigation against us. During the fiscal year ended December 31, 2018, the high of our stock price was \$70.22 and the low was \$47.61.

Provisions in our organizational documents and control by insiders may prevent changes in control even if such changes would be beneficial to other stockholders.

Our organizational documents may limit changes in control. Furthermore, as of February 20, 2019, Mr. Sacks and Mr. Schlosberg together may be deemed to beneficially own and/or exercise voting control over approximately 9.8% of our outstanding common stock. As of February 20, 2019, TCCC owned approximately 19% of our common stock. Consequently, Mr. Sacks, Mr. Schlosberg and TCCC could exercise significant control over matters submitted to a vote of our stockholders, including electing directors, amending organizational documents and disapproving extraordinary transactions such as a takeover attempt, even though such actions may be favorable to the other common stockholders.

Our cash flow may not be sufficient to fund our long-term goals.

Although we currently have sufficient cash to support our planned operating activities in the current year, we may be unable to generate sufficient cash flow to support our capital expenditure plans and general operating activities in the future. In addition, the terms and/or availability of our credit facility and/or the activities of our debtors and/or creditors could affect the financing of our future growth.

[Table of Contents](#)

Our investments in marketable securities are subject to risks which may cause losses and affect the liquidity of these investments.

At December 31, 2018, we had \$637.5 million in cash and cash equivalents and \$320.7 million in short-term investments. We have historically invested these amounts in U.S. treasuries, certificates of deposit, commercial paper, government agencies and municipal securities (which may have an auction reset feature), variable rate demand notes and money market funds meeting certain criteria. Certain of these investments are subject to general credit, liquidity, market and interest rate risks. These risks associated with our investment portfolio may have an adverse effect on our future results of operations, liquidity and financial condition.

We may be required to record a significant charge to earnings if our goodwill or intangible assets become impaired.

Under GAAP, we are required to review our intangible assets for impairment when events or changes in circumstances indicate the carrying value may not be recoverable. Factors that may be considered a change in circumstances indicating that the carrying value of our intangible assets may not be recoverable include, declining or slower than anticipated growth rates for certain of our existing products, a decline in stock price and market capitalization, and slower growth rates in our industry.

We may be required to record a significant charge to earnings in our financial statements during the period in which we determine that our intangible assets have been impaired. Any such charge would adversely impact our results of operations. As of December 31, 2018, our goodwill totaled approximately \$1.33 billion and other intangible assets totaled approximately \$1.05 billion.

If we fail to maintain effective disclosure controls and procedures and internal control over financial reporting on a consolidated basis, our stock price and investor confidence in the Company could be materially and adversely affected.

We are required to maintain both disclosure controls and procedures as well as internal control over financial reporting that are effective for the purposes described in “Part II, Item 9A – Controls and Procedures.” If we fail to maintain such controls and procedures, our business, results of operations, financial condition and/or the value of our stock could be materially harmed.

Litigation, legal proceedings, arbitrations, government and regulatory inquiries and/or proceedings could expose us to significant liabilities and thus negatively affect our financial results.

We are a party, from time to time, to various litigation claims and legal proceedings, arbitrations, government and regulatory inquiries and/or proceedings, including, but not limited to, intellectual property, fraud, unfair business practices, false advertising, product liability, breach of contract claims, securities actions and shareholder derivative actions. Material legal proceedings are described more fully in, “Part I, Item 3 – Legal Proceedings” and in “Part II, Item 8, Note 11” to our consolidated financial statements contained in this Form 10-K.

Defending these proceedings can result in significant ongoing expenditures and the diversion of our management’s time and attention from the operation of our business, which could have a negative effect on our business operations. Our failure to successfully defend or settle any litigation or legal proceedings could result in liabilities that, to the extent not covered by our insurance, could have a material adverse effect on our financial condition, revenue and profitability, and could cause the market value of our common stock to decline.

We must continually maintain, protect and/or upgrade our information technology systems, including, protecting us from internal and external cybersecurity threats.

Information technology enables us to operate efficiently, interface with customers, maintain financial accuracy and efficiency and accurately produce our financial statements. If we do not appropriately allocate and effectively manage the resources necessary to build and sustain the proper technology infrastructure, we could be subject to transaction errors, processing inefficiencies, the loss of customers, business disruptions, and/or the loss of and/or damage to intellectual property through security breaches, including internal and external cybersecurity threats. Cybersecurity attacks are evolving and include, but are not limited to, malicious software (malware and virus), attempts to gain unauthorized access to networks, computer systems and data and other forms of electronic security breaches that could lead to disruptions in business systems, an inability to process customer orders and/or lost customer orders, unauthorized release of confidential or otherwise protected information and corruption of data. We believe that we have adopted appropriate measures including ongoing cybersecurity risk assessments to mitigate potential risks to our technology and our operations from these information technology-related disruptions. However, given the unpredictability of the timing, nature and scope of such disruptions, we could potentially be subject to operational interruption, damage to our brand image and private data exposure. Moreover, if our data management systems, including our SAP enterprise resource planning system, do not effectively collect, store, process and report relevant data for the operation of our business (whether due to equipment malfunction or constraints, software deficiencies, cybersecurity attack and/or human error), our ability to effectively plan, forecast and execute our business plan and comply with applicable laws and regulations will be impaired, perhaps materially. Any such impairment could materially and adversely affect our financial condition, results of operations, cash flows and the timeliness with which we report our internal and external operating results.

ITEM 2. PROPERTIES

Our principal properties include our corporate headquarters as well as our Southern California warehouse and distribution center.

Our owned corporate headquarters are located at 1 Monster Way, Corona, California 92879, consisting of (i) an approximately 141,000 square-foot, free-standing, six-story building (ENERGY STAR certified), (ii) an approximately 147,625 square-foot three-story parking structure and storage facility, which houses our approximately 14,000 square-foot quality control laboratory, and (iii) an adjacent approximately 75,426 square foot, free-standing, three-story building (pursuing ENERGY STAR certification).

Our owned Southern California warehouse is located in Rialto, California, consisting of an approximately 1,000,000 square-foot building which is LEED certified.

In addition, we lease many smaller office and/or warehouse spaces, both domestically and in certain international locations.

ITEM 3. LEGAL PROCEEDINGS

The Company, TCCC and certain affiliates are parties to various agreements setting forth, among other things, provisions relating to TCCC's equity holding in the Company and the terms on which the Company's energy products are distributed globally by members of TCCC's distribution network. Among other provisions, the agreements restrict TCCC from competing in the energy drink category in certain territories prior to the termination of the applicable distribution coordination agreement with TCCC, with certain exceptions.

TCCC has developed three energy products that it believes it may market under the exception relating to the Coca-Cola brand. The Company believes that the exception does not apply to this situation. By mutual agreement to obtain clarification, the issue was submitted to AAA arbitration on October 31, 2018. We expect a decision will be reached during the second quarter of 2019. TCCC has indicated that it has suspended the proposed launch of such products until April 2019. As the relief sought is limited, no reasonable possible range of losses, if any, can be estimated.

The Company is currently a defendant in a number of personal injury lawsuits, claiming that the death or other serious injury of the plaintiffs was caused by consumption of Monster Energy® brand energy drinks. The plaintiffs in these lawsuits allege strict product liability, negligence, fraudulent concealment, breach of implied warranties and wrongful death. The Company believes that each complaint is without merit and plans a vigorous defense. The Company also believes that any damages, if awarded, would not have a material adverse effect on the Company's financial position or results of operations.

Furthermore, from time to time in the normal course of business, the Company is named in other litigation, including consumer class actions, intellectual property litigation and claims from prior distributors. Although it is not possible to predict the ultimate outcome of such litigation, based on the facts known to the Company, management believes that such litigation in the aggregate will likely not have a material adverse effect on the Company's financial position or results of operations.

The Company evaluates, on a quarterly basis, developments in legal proceedings and other matters that could cause an increase or decrease in the amount of the liability that is accrued, if any, or in the amount of any related insurance reimbursements recorded. As of December 31, 2018, the Company's consolidated balance sheet includes accrued loss contingencies of approximately \$0.06 million.

Such shares are included in the common stock in treasury in the accompanying consolidated balance sheet at December 31, 2018. As a result of purchases of our common stock in January 2019 and February 2019, as of February 26, 2019, \$20.6 million remained available for repurchase under the August 2018 Repurchase Plan.

During the year ended December 31, 2018, 34,976 shares of common stock were purchased from employees in lieu of cash payments for options exercised or withholding taxes due for a total amount of \$2.1 million. While such purchases are considered common stock repurchases, they are not counted as purchases against our authorized share repurchase programs. Such shares are included in common stock in treasury in the accompanying consolidated balance sheet at December 31, 2018.

The following tabular summary reflects the Company's repurchase activity during the quarter ended December 31, 2018:

ITEM 7. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following Management’s Discussion and Analysis of Financial Condition and Results of Operations (“MD&A”) is provided as a supplement to – and should be read in conjunction with – our financial statements and the accompanying notes (“Notes”) included in Part II, Item 8 of this Form 10-K. This discussion contains forward-looking statements that are based on management’s current expectations, estimates and projections about our business and operations. Our actual results may differ materially from those currently anticipated and expressed in such forward-looking statements. See “Forward-Looking Statements” and “Part I, Item 1A – Risk Factors.”

This overview provides our perspective on the individual sections of MD&A. MD&A includes the following sections:

- *Our Business* – a general description of our business, the value drivers of our business, and opportunities and risks facing our Company, stock repurchases, acquisitions and divestitures;
- *Results of Operations* – an analysis of our consolidated results of operations for the three years presented in our financial statements;
- *Sales* – details of our sales measured on a quarterly basis in both dollars and cases;
- *Inflation* – information about the impact that inflation may or may not have on our results;
- *Liquidity and Capital Resources* – an analysis of our cash flows, sources and uses of cash and contractual obligations;
- *Accounting Policies and Pronouncements* – a discussion of accounting policies that require critical judgments and estimates including newly issued accounting pronouncements;
- *Forward-Looking Statements* – cautionary information about forward-looking statements and a description of certain risks and uncertainties that could cause our actual results to differ materially from the Company’s historical results or our current expectations or projections; and
- *Market Risks* – information about market risks and risk management. (See “Forward-Looking Statements” and “Part II, Item 7A – Qualitative and Quantitative Disclosures About Market Risks”).

Our net sales of \$3.81 billion for the year ended December 31, 2018 represented record annual net sales. Net sales of our Monster Energy® brand energy drinks were \$3.49 billion for the year ended December 31, 2018. Net sales of our Strategic Brands were \$285.8 million for the year ended December 31, 2018.

Net sales for the year ended December 31, 2018 were negatively impacted by approximately \$42.2 million as a result of the adoption of Accounting Standards Codification (“ASC”) 606. Under ASC 606, commissions paid to TCCC, based on sales to certain of the Company’s TCCC bottlers/distributors that TCCC consolidates, or to the TCCC Related Parties, are included as a reduction to net sales. Prior to January 1, 2018, commissions based on sales to the TCCC Related Parties, were included in operating expenses.

Net changes in foreign currency exchange rates had a favorable impact on net sales in the Monster Energy® Drinks segment of approximately \$14.6 million for the year ended December 31, 2018. Net changes in foreign currency exchange rates had a favorable impact on net sales in the Strategic Brands segment of approximately \$0.2 million for the year ended December 31, 2018.

Our growth strategy includes expanding our international business. Gross sales to customers outside the United States amounted to \$1.36 billion, \$1.09 billion and \$888.7 million for the years ended December 31, 2018, 2017 and 2016, respectively. Such sales were approximately 31%, 28% and 25% of gross sales for the years ended December 31, 2018, 2017 and 2016, respectively.

Our customers are primarily full service beverage bottlers/distributors, retail grocery and specialty chains, wholesalers, club stores, mass merchandisers, convenience chains, foodservice customers and the military. Percentages of our gross sales to our various customer types for the years ended December 31, 2018, 2017 and 2016 are reflected below. Such information includes sales made by us directly to the customer types concerned, which include our full service beverage bottlers/distributors in the United States. Such full service beverage bottlers/distributors in turn sell certain of our products to some of the same customer types listed below. We limit our description of our customer types to include only our sales to our full service bottlers/distributors without reference to such bottlers/distributors’ sales to their own customers.

	2018	2017	2016
U.S. full service bottlers/distributors	61%	63%	65%
International full service bottlers/distributors	31%	28%	25%
Club stores and mass merchandisers	6%	7%	8%
Retail grocery, specialty chains and wholesalers	1%	1%	1%
Other	1%	1%	1%

Our customers include Coca-Cola Refreshments USA, Inc., Coca-Cola Refreshments Canada Company (Coca-Cola Canada Bottling Limited from September 28, 2018), Coca-Cola Bottling Company, CCBCC Operations, LLC, United Bottling Contracts Company, LLC, Reyes Coca-Cola Bottling, Great Lakes Coca-Cola Bottling, Coca-Cola Southwest Beverages LLC, Coca-Cola of Northern New England, Swire Coca-Cola, USA, Liberty Coca-Cola Beverages, Coca-Cola European Partners, Coca-Cola Hellenic, Coca-Cola FEMSA, Coca-Cola Amatil, Swire Coca-Cola (China), COFCO Coca-Cola, Coca-Cola Beverages Africa, Coca-Cola İçecek and certain other TCCC network bottlers, Asahi Soft Drinks, Co., Ltd., Kalil Bottling Group, Wal-Mart, Inc. (including Sam’s Club), Costco Wholesale Corporation and Big Geyser, Inc. A decision by any large customer to decrease amounts purchased from us or to cease carrying our products could have a material negative effect on our financial condition and consolidated results of operations.

TCCC, through certain consolidated subsidiaries (the “TCCC Subsidiaries”), accounted for approximately 3%, 18% and 41% of our net sales for the years ended December 31, 2018, 2017 and 2016, respectively. As part of TCCC’s North America Refranchising initiative (the “North America Refranchising”), the territories of certain TCCC Subsidiaries have been transitioned to certain independent TCCC bottlers/distributors and/or TCCC Related Parties. Accordingly, our percentage of net sales to the TCCC Subsidiaries significantly decreased for the year ended December 31, 2018.

CCBCC Operations, LLC accounted for approximately 13%, 13% and 9% of our net sales for the years ended December 31, 2018, 2017 and 2016, respectively.

Reyes Coca-Cola Bottling accounted for approximately 12%, 6% and 2% of the Company’s net sales for the years ended December 31, 2018, 2017 and 2016, respectively.

Coca-Cola European Partners accounted for approximately 10%, 9% and 9% of the Company’s net sales for the years ended December 31, 2018, 2017 and 2016, respectively.

We continue to incur expenditures in connection with the development and introduction of new products and flavors.

Value Drivers of our Business

We believe that the key value drivers of our business include the following:

- *International Growth* – The introduction, development and sustained profitability of our Monster Energy® brand internationally remains a key value driver for our corporate growth. One or more of our products are distributed in approximately 155 countries and territories worldwide.
- *Profitable Growth* – We believe “functional” value-added brands supported by marketing and innovation and targeted to a diverse consumer base, drive profitable growth. We continue to broaden our family of products to provide more alternatives to consumers. We are focused on increasing the profit margins for both our Monster Energy® Drinks segment and our Strategic Brands segment, and believe that tailored branding, packaging, pricing and distribution channel strategies help achieve profitable growth. We are implementing these strategies with a view to continuing profitable growth.
- *Cost Management* – The principal focus of cost management will continue to be on reducing input procurement and production costs on a per-case basis, including raw material costs and co-packing fees, as well as reducing freight costs by securing additional co-packing facilities strategically localized. Another key area of focus is to decrease promotional allowances, selling and general and administrative costs, including sponsorships, sampling, promotional and marketing expenses, as a percentage of net sales.
- *Efficient Capital Structure* – Our capital structure is designed to optimize our working capital in order to finance expansion, both domestically and internationally. We believe that with our strong capital position, our ability to raise funds, if necessary, at a relatively low effective cost of borrowings, provides a competitive advantage. The reduction of accounts receivable and inventory days on hand will remain an area of focus.

We believe that, subject to increases in the costs of certain raw materials being contained, these value drivers, when implemented and/or achieved in the United States and internationally, will result in: (1) improving or maintaining our product gross profit margins; (2) providing additional leverage over time through reduced expenses as a percentage of net operating revenues; and (3) enhancing our cost of capital. The ultimate measure of success is and will be reflected in our current and future results of operations.

Gross and net sales, gross profit, operating income, net income and net income per share represent key measurements of the above value drivers. These measurements will continue to be a key management focus in 2019 and beyond (See “Part II, Item 7 – Results of Operations – Results of Operations for the Year Ended December 31, 2018, Compared to the Year Ended December 31, 2017”).

As of December 31, 2018, the Company had working capital of \$1.20 billion compared to \$1.53 billion as of December 31, 2017. The decrease in working capital was primarily the result of the \$1.34 billion of repurchases of our common stock during the year ended December 31, 2018. For the year ended December 31, 2018, our net cash provided by operating activities was approximately \$1.16 billion as compared to \$987.7 million for the year ended December 31, 2017. Principal uses of cash flows in 2018, were purchases of investments, repurchase of our common stock, development of our Monster Energy® brand internationally and acquisitions of property and equipment. These principal uses of cash flows are expected to be and remain our principal recurring use of cash and working capital funds in the future (See “Part II, Item 7 – Liquidity and Capital Resources”).

Opportunities, Challenges and Risks

Looking forward, our management has identified certain challenges and risks for the beverage industry and the Company, including our significant commercial relationship with TCCC and TCCC’s status as a significant shareholder of the Company, in each case as described above under “Part I, Item 1A – Risk Factors.”

In addition, legislation has been proposed and/or adopted at the U.S., state, county and/or municipal level and proposed and/or adopted in certain foreign jurisdictions to restrict the sale of energy drinks (including prohibiting the sale of energy drinks at certain establishments or pursuant to certain governmental programs), limit caffeine content, require certain product labeling disclosures and/or warnings, impose taxes, limit product sizes or impose age restrictions for the sale of energy drinks. In addition, articles critical of the caffeine content in energy drinks and their perceived benefits and articles indicating certain health risks of energy drinks have been published. The proposal and/or adoption of such legislation and the publication of such articles, or the future proposal and/or adoption of similar legislation or publication of similar articles, may adversely affect our Company. In addition, uncertainty and/or volatility in our domestic and/or our international economic markets could negatively affect both the stability of our industry and our Company. Furthermore, our growth strategy includes expanding our international business, which exposes us to risks inherent in conducting international operations, including the risks associated with foreign currency exchange rate fluctuations. Consumer discretionary spending also represents a challenge to the successful marketing and sale of our products. Increases in consumer and regulatory awareness of the health problems arising from obesity and inactive lifestyles continue to represent a challenge. We recognize that obesity is a complex and serious public health problem. Our commitment to consumers begins with our broad product line and a wide selection of diet, light and low calorie beverages within our energy drink product lines. We continuously strive to meet changing consumer needs through beverage innovation, choice and variety. (See “Part I, Item 1A – Risk Factors”).

[Table of Contents](#)

Our historical success is attributable, in part, to our introduction of different and innovative beverages which have been positively accepted by consumers. Our future success will depend, in part, upon our continued ability to develop and introduce different and innovative beverages that meet consumer preferences, although there can be no assurance of our ability to do so. In order to retain and expand our market share, we must continue to develop and introduce different and innovative beverages and be competitive in the areas of price, quality, method of distribution, brand image and intellectual property protection. The beverage industry is subject to changing consumer preferences that may adversely affect us if we misjudge such preferences.

In addition, other key challenges and risks that could impact our Company's future financial results include, but are not limited to:

- the risks associated with the realization of benefits from our relationship with TCCC;
- the relationship risks associated with the arbitration with TCCC;
- the outcome of our arbitration proceedings with TCCC, including TCCC developing and distributing additional energy products;
- changes in consumer preferences and demand for our products;
- economic uncertainty in the United States, Europe and other countries in which we operate;
- the risks associated with foreign currency exchange rate fluctuations;
- maintenance of our brand image, product quality and corporate reputation;
- increasing concern over various environmental, human rights and health matters, including obesity, caffeine consumption and energy drinks generally, and changes in regulation and consumer preferences in response to those concerns;
- profitable expansion and growth of our family of brands in the competitive market place (See "Part I, Item 1 – Business – Competition" and "Part I, Item 1 – Business – Sales and Marketing");
- costs of establishing and promoting our brands internationally;
- increase in costs of raw materials used by us;
- restrictions on imports and sources of supply, duties or tariffs, changes in related government regulations and disruptions in the timely import or export of our products and/or ingredients due to port strikes, related labor issues or other importation impediments;
- protection of our existing intellectual property portfolio of trademarks and copyrights and the continuous pursuit to develop and protect new and innovative trademarks and copyrights for our expanding product lines;
- limitations on available quantities of certain package containers such as the aluminum 24-ounce Cap Can;
- limitations on co-packing availability, particularly for retort production;
- the impact of Brexit on our business in Europe and the United Kingdom; and
- the imposition of additional regulation, including regulation restricting the sale of energy drinks, limiting caffeine content in beverages, requiring product labeling and/or warnings, imposing excise taxes and/or sales taxes, and/or limiting product size and/or age restrictions.

See "Part I, Item 1A – Risk Factors" for additional information about risks and uncertainties facing our Company.

We believe that the following opportunities exist for us:

- domestic and international growth potential of our products;
- growth potential of the energy drink category, both domestically and internationally;
- planned and future new product and product line introductions with the objective of increasing sales and/or contributing to higher profitability;
- the introduction of new package formats designed to generate strong revenue growth;
- package, pricing and channel opportunities to increase profitable growth;
- effective strategic positioning to capitalize on industry growth;
- broadening distribution/expansion opportunities in both domestic and international markets;

[Table of Contents](#)

- launching and/or relaunching our products and new products into new domestic and international markets and channels; and
- continued focus on reducing our cost base.

¹ Includes \$44.3 million, \$43.4 million and \$40.3 million for the years ended December 31, 2018, 2017 and 2016, respectively, related to the recognition of deferred revenue.

² Net sales were negatively impacted by approximately \$42.2 million for the year ended December 31, 2018 as a result of the adoption of ASC 606.

³ Includes \$26.6 million, \$35.4 million and \$79.8 million for the years ended December 31, 2018, 2017 and 2016, respectively, related to distributor termination costs.

⁴ Without the adoption of ASC 606, an additional \$42.2 million of commissions would have been included in operating expenses for the year ended December 31, 2018 (such commissions are included as a reduction to net sales).

*Gross profit may not be comparable to that of other entities since some entities include all costs associated with their distribution process in cost of sales, whereas others exclude certain costs and instead include such costs within another line item such as operating expenses. We include out-bound freight and warehouse costs in operating expenses rather than in cost of sales.

Results of Operations for the Year Ended December 31, 2018 Compared to the Year Ended December 31, 2017.

Net Sales. Net sales were \$3.81 billion for the year ended December 31, 2018, an increase of approximately \$438.1 million, or 13.0% higher than net sales of \$3.37 billion for the year ended December 31, 2017. Net sales for the year ended December 31, 2018 were negatively impacted by approximately \$42.2 million as a result of the adoption of ASC 606. Net changes in foreign currency exchange rates had a favorable impact on net sales of approximately \$14.8 million for the year ended December 31, 2018.

Net sales for the Monster Energy® Drinks segment were \$3.50 billion for the year ended December 31, 2018, an increase of approximately \$450.8 million, or 14.8% higher than net sales of \$3.05 billion for the year ended December 31, 2017. Net sales for the Monster Energy® Drinks segment for the year ended December 31, 2018 were negatively impacted by approximately \$17.4 million as a result of the adoption of ASC 606. Net changes in foreign currency exchange rates had a favorable impact on net sales for the Monster Energy® Drinks segment of approximately \$14.6 million for the year ended December 31, 2018. Net sales for the Monster Energy® Drinks segment increased primarily due to increased sales by volume of our Monster Energy® brand energy drinks as a result of increased domestic and international consumer demand.

Net sales for the Strategic Brands segment were \$285.8 million for the year ended December 31, 2018, a decrease of approximately \$14.0 million, or 4.7% lower than net sales of \$299.8 million for the year ended December 31, 2017. Net sales for the Strategic Brands segment for the year ended December 31, 2018 were negatively impacted by approximately \$24.9 million as a result of the adoption of ASC 606. Net changes in foreign currency exchange rates had a favorable impact on net sales for the Strategic Brands segment of approximately \$0.2 million for the year ended December 31, 2018.

Net sales for the Other segment were \$22.9 million for the year ended December 31, 2018, an increase of approximately \$1.3 million, or 6.1% higher than net sales of \$21.6 million for the year ended December 31, 2017.

Case sales, in 192-ounce case equivalents, were 410.9 million cases for the year ended December 31, 2018, an increase of approximately 50.9 million cases or 14.1% higher than case sales of 360.0 million cases for the year ended December 31, 2017. The overall average net sales per case (excluding net sales of AFF Third-Party Products of \$22.9 million and \$21.6 million for the years ended December 31, 2018 and 2017, respectively, as these sales do not have unit case equivalents) decreased to \$9.21 for the year ended December 31, 2018, which was 1.0% lower than the average net sales per case of \$9.30 for the year ended December 31, 2017, due to the adoption of ASC 606. Without the adoption of ASC 606, the overall average net sales per case increased to \$9.31 for the year ended December 31, 2018, as compared to average net sales per case of \$9.30 for the year ended December 31, 2017.

Gross Profit. Gross profit was \$2.30 billion for the year ended December 31, 2018, an increase of approximately \$157.7 million, or 7.4% higher than the gross profit of \$2.14 billion for the year ended December 31, 2017. The increase in gross profit dollars was primarily the result of the \$455.1 million increase in net sales of our Monster Energy® brand energy drinks for the year ended December 31, 2018.

Gross profit as a percentage of net sales decreased to 60.3% for the year ended December 31, 2018 from 63.5% for the year ended December 31, 2017. Gross profit as a percentage of net sales, excluding the impact of ASC 606, was 60.7% for the year ended December 31, 2018.

The decrease in gross profit as a percentage of net sales was primarily attributable to (i) increases in certain input costs, principally aluminum cans, freight in and other input costs; (ii) domestic product sales mix (iii) geographical sales mix, as a result of our international sales increasing as a percentage of total net sales (our foreign operations generally have lower gross profit margins); (iv) the \$42.2 million of commissions accounted for as a reduction to net sales due to the adoption of ASC 606; and (v) increases in promotional allowances as a percentage of gross sales.

Operating Expenses. Total operating expenses were \$1.01 billion for the year ended December 31, 2018, an increase of approximately \$72.9 million, or 7.8% higher than total operating expenses of \$938.9 million for the year ended December 31, 2017. The increase in operating expenses was primarily due to increased out-bound freight and warehouse costs of \$38.5 million, increased payroll expenses of \$28.6 million (of which \$4.8 million was related to an increase in stock-based compensation), increased expenditures of \$14.8 million for sponsorships and endorsements, and increased expenditures of \$12.1 million for other marketing expenses. The increase in operating expenses was partially offset by the \$8.8 million decrease in costs associated with distributor terminations. Commissions included in operating expenses were \$16.7 million, or 65.1% lower than commissions included in operating expenses of \$47.7 million for the year ended December 31, 2017. Without the adoption of ASC 606, an additional \$42.2 million of commissions would have been included in operating expenses for the year ended December 31, 2018 (such commissions are included as a reduction to net sales).

Operating Income. Operating income was \$1.28 billion for the year ended December 31, 2018, an increase of approximately \$84.8 million, or 7.1% higher than operating income of \$1.20 billion for the year ended December 31, 2017. Operating income as a percentage of net sales decreased to 33.7% for the year ended December 31, 2018 from 35.6% for the year ended December 31, 2017. Operating income was \$180.8 million and \$139.3 million for the years ended December 31, 2018 and 2017, respectively, in connection with our operations in EMEA, Asia Pacific and South America.

Operating income for the Monster Energy® Drinks segment was \$1.37 billion for the year ended December 31, 2018, an increase of approximately \$106.5 million, or 8.4% higher than operating income of \$1.26 billion for the year ended December 31, 2017. The increase in operating income for the Monster Energy® Drinks segment was primarily the result of the \$455.1 million increase in net sales of our Monster Energy® brand energy drinks for the year ended December 31, 2018.

Operating income for the Strategic Brands segment was \$176.5 million for the year ended December 31, 2018, an increase of approximately \$2.1 million, or 1.2% higher than operating income of \$174.5 million for the year ended December 31, 2017.

Operating income for the Other segment was \$5.4 million for the year ended December 31, 2018, a decrease of approximately \$0.2 million, or 4.0% lower than operating income of \$5.6 million for the year ended December 31, 2017.

Other Income (expense), net. Other non-operating income, net, was \$9.7 million for the year ended December 31, 2018, as compared to other non-operating income, net, of \$2.8 million for the year ended December 31, 2017. Foreign currency transaction (losses)/gains were (\$4.0) million and (\$3.3) million for the years ended December 31, 2018 and 2017, respectively. Interest income was \$13.8 million and \$6.8 million for the years ended December 31, 2018 and 2017, respectively.

Provision for Income Taxes. Provision for income taxes was \$300.3 million for the year ended December 31, 2018, a decrease of \$80.7 million, or 21.2% lower than the provision for income taxes of \$380.9 million for the year ended December 31, 2017. The effective combined federal, state and foreign tax rate decreased to 23.2% from 31.7% for the years ended December 31, 2018 and 2017, respectively. The decrease in the effective tax rate was primarily due to the reduction in the U.S. federal statutory tax rate as a result of the Tax Reform Act signed into law on December 22, 2017 (before considering the potential impact of further clarification of certain matters related to the Tax Reform Act), and to a reduction in certain foreign income that is subject to U.S. taxation. The decrease in the provision for income taxes was partially offset by the elimination of the domestic production deduction following the Tax Reform Act as well as a decrease in the stock based compensation tax deduction.

Net Income. Net income was \$993.0 million for the year ended December 31, 2018, an increase of \$172.3 million, or 21.0% higher than net income of \$820.7 million for the year ended December 31, 2017. The increase in net income was primarily due to the \$157.7 million increase in gross profit and the \$80.7 million decrease in the provision for income taxes. The increase in net income was partially offset by the increase in operating expenses of \$72.9 million.

Results of Operations for the Year Ended December 31, 2017 Compared to the Year Ended December 31, 2016.

Net Sales. Net sales were \$3.37 billion for the year ended December 31, 2017, an increase of approximately \$319.7 million, or 10.5% higher than net sales of \$3.05 billion for the year ended December 31, 2016. The increase in net sales of our Monster Energy® brand energy drinks represented approximately \$287.4 million of the overall increase in net sales. Net sales of our Monster Energy® brand energy drinks increased partially due to increased sales by volume as a result of increased domestic and international consumer demand. Net sales of our Strategic Brands were \$299.8 million for the year ended December 31, 2017, an increase of \$27.3 million, or 10.0% higher than net sales of \$272.5 million for the year ended December 31, 2016. Net sales of our AFF Third-Party Products were \$21.6 million for the year ended December 31, 2017, an increase of \$4.6 million, or 27.0% higher than net sales of \$17.0 million (effectively from April 1, 2016 to December 31, 2016) for the year ended December 31, 2016. No other individual product line contributed either a material increase or decrease to net sales for the year ended December 31, 2017.

Net changes in foreign currency exchange rates had an unfavorable impact on net sales in the Monster Energy® Drinks segment of approximately \$7.6 million for the year ended December 31, 2017. Net changes in foreign currency exchange rates had a favorable impact on net sales in the Strategic Brands segment of approximately \$3.7 million for the year ended December 31, 2017.

Case sales, in 192-ounce case equivalents, were 360.0 million cases for the year ended December 31, 2017, an increase of approximately 39.0 million cases or 12.2% higher than case sales of 321.0 million cases for the year ended December 31, 2016. The overall average net sales per case (excluding net sales of AFF Third-Party Products of \$21.6 million and \$17.0 million for the years ended December 31, 2017 and 2016, respectively, as these sales do not have unit case equivalents) decreased to \$9.30 for the year ended December 31, 2017, which was 1.6% lower than the average net sales per case of \$9.45 for the year ended December 31, 2016. The lower average net sales price per case was primarily attributable to the changes in geographic sales mix.

Net sales for the Monster Energy® Drinks segment were \$3.05 billion for the year ended December 31, 2017, an increase of approximately \$287.7 million, or 10.4% higher than net sales of \$2.76 billion for the year ended December 31, 2016.

Net sales for the Strategic Brands segment were \$299.8 million for the year ended December 31, 2017, an increase of approximately \$27.3 million, or 10.0% higher than net sales of \$272.5 million for the year ended December 31, 2016.

Net sales for the Other segment were \$21.6 million for the year ended December 31, 2017, an increase of approximately \$4.6 million, or 27.0% higher than net sales of \$17.0 million (effectively from April 1, 2016 to December 31, 2016) for the year ended December 31, 2016.

Gross Profit. Gross profit was \$2.14 billion for the year ended December 31, 2017, an increase of approximately \$195.7 million, or 10.1% higher than the gross profit of \$1.94 billion for the year ended December 31, 2016. Gross profit as a percentage of net sales decreased to 63.5% for the year ended December 31, 2017 from 63.7% for the year ended December 31, 2016. The increase in gross profit dollars was primarily the result of the \$287.4 million increase in net sales of our Monster Energy® brand energy drinks as well as an approximately \$58.3 million increase in raw material cost savings for the year ended December 31, 2017 from our acquisition of AFF in 2016 (the “AFF Transaction”). The decrease in gross profit as a percentage of net sales was primarily attributable to geographical sales mix (our foreign operations generally have lower gross profit margins) and to certain increases in other costs, which were partially offset by raw material cost savings from the AFF Transaction and changes in domestic product sales mix.

Operating Expenses. Total operating expenses were \$938.9 million for the year ended December 31, 2017, an increase of approximately \$82.2 million, or 9.6% higher than total operating expenses of \$856.7 million for the year ended December 31, 2016. The increase in operating expenses was primarily due to increased payroll expenses of \$40.5 million (of which \$6.4 million was related to an increase in stock-based compensation), increased expenditures of \$26.6 million for sponsorships and endorsements, increased expenditures of \$15.9 million for commissions, increased out-bound freight and warehouse costs of \$11.1 million, increased expenditures of \$9.9 million for allocated trade development and increased expenditures of \$8.3 million for merchandise displays. The increase in operating expenses was partially offset by the \$44.3 million decrease in costs associated with distributor terminations and to decreased expenditures of \$13.9 million for professional service fees, including legal and accounting costs.

Operating Income. Operating income was \$1.20 billion for the year ended December 31, 2017, an increase of approximately \$113.4 million, or 10.5% higher than operating income of \$1.09 billion for the year ended December 31, 2016. Operating income as a percentage of net sales was 35.6% for both the years ended December 31, 2017 and 2016. Operating income was \$139.3 million and \$101.7 million for the years ended December 31, 2017 and 2016, respectively, in connection with our operations in Africa, Asia, Australia, Europe, the Middle East and South America.

Operating income for the Monster Energy® Drinks segment was \$1.26 billion for the year ended December 31, 2017, an increase of approximately \$116.2 million, or 10.1% higher than operating income of \$1.15 billion for the year ended December 31, 2016. The increase in operating income for the Monster Energy® Drinks segment was primarily the result of the \$287.4 million increase in net sales of our Monster Energy® brand energy drinks as well as an approximately \$58.3 million increase in raw material cost savings for the year ended December 31, 2017 from the AFF Transaction.

Operating income for the Strategic Brands segment was \$174.5 million for the year ended December 31, 2017, an increase of approximately \$11.3 million, or 7.0% higher than operating income of \$163.1 million for the year ended December 31, 2016. The increase in operating income for the Strategic Brands segment was primarily due to an increase in net sales.

Operating income for the Other segment was \$5.6 million for the year ended December 31, 2017, an increase of approximately \$3.3 million, or 143.3% higher than operating income of \$2.3 million for the year ended December 31, 2016.

Other Income (Expense), net. Other non-operating income (expense), net, was \$2.8 million for the year ended December 31, 2017, as compared to other non-operating income (expense), net, of (\$5.7) million for the year ended December 31, 2016. Foreign currency transaction losses were \$3.3 million and \$9.7 million for the years ended December 31, 2017 and 2016, respectively. Interest income, net, was \$6.8 million and \$4.0 million for the years ended December 31, 2017 and 2016, respectively.

Provision for Income Taxes. Provision for income taxes was \$380.9 million for the year ended December 31, 2017, an increase of \$13.9 million, or 3.8% higher than the provision for income taxes of \$367.0 million for the year ended December 31, 2016. The effective combined federal, state and foreign tax rate decreased to 31.7% from 34.0% for the years ended December 31, 2017 and 2016, respectively. The decrease in the effective tax rate was primarily due to the increase in profits earned by foreign subsidiaries in lower tax jurisdictions relative to the United States as well as to the increase in equity compensation deductions, due in part to the increase in the related excess tax benefits recorded in net income. The decrease in the effective tax rate was partially offset by the recognition of \$39.8 million of tax expense related to the revaluation of the U.S. net deferred tax asset at December 31, 2017, from 35% to the newly enacted U.S. corporate income tax rate of 21% due to the Tax Reform Act enacted on December 22, 2017.

Net Income. Net income was \$820.7 million for the year ended December 31, 2017, an increase of \$108.0 million, or 15.2% higher than net income of \$712.7 million for the year ended December 31, 2016. The increase in net income was primarily due to the \$195.7 million increase in gross profit. The increase in net income was partially offset by the increase in operating expenses of \$82.2 million and the increase in the provision for income taxes of \$13.9 million.

Non-GAAP Financial Measures

*Gross Sales**.* Gross sales were \$4.43 billion for the year ended December 31, 2018, an increase of approximately \$568.2 million, or 14.7% higher than gross sales of \$3.86 billion for the year ended December 31, 2017.

Gross sales of our Monster Energy® brand energy drinks were \$4.02 billion for the year ended December 31, 2018, an increase of \$560.9 million, or 16.2% higher than gross sales of \$3.46 billion for the year ended December 31, 2017. Gross sales of our Monster Energy® brand energy drinks increased partially due to increased sales by volume as a result of increased domestic and international consumer demand.

Gross sales of our Strategic Brands were \$327.1 million for the year ended December 31, 2018, an increase of \$8.6 million, or 2.7% higher than gross sales of \$318.5 million for the year ended December 31, 2017.

Gross sales of our AFF Third-Party Products were \$22.9 million for the year ended December 31, 2018, an increase of \$1.3 million, or 6.1% higher than gross sales of \$21.6 million for the year ended December 31, 2017.

No other individual product line contributed either a material increase or decrease to gross sales for the year ended December 31, 2018.

Promotional and other allowances, as described in the footnote below, were \$622.3 million for the year ended December 31, 2018, an increase of \$130.0 million, or 26.4% higher than promotional and other allowances of \$492.3 million for the year ended December 31, 2017. Promotional and other allowances as a percentage of gross sales increased to 14.0% from 12.7% for the years ended December 31, 2018 and 2017, respectively, partially due to an increase in commissions of \$42.2 million included in net sales, related to the adoption of ASC 606 described above.

Net changes in foreign currency exchange rates had a favorable impact on gross sales in the Monster Energy® Drinks segment of approximately \$21.6 million for the year ended December 31, 2018. Net changes in foreign currency exchange rates had a favorable impact on gross sales in the Strategic Brands segment of approximately \$0.2 million for the year ended December 31, 2018.

*Gross Sales**.* Gross sales were \$3.86 billion for the year ended December 31, 2017, an increase of approximately \$375.9 million, or 10.8% higher than gross sales of \$3.49 billion for the year ended December 31, 2016. The increase in gross sales of our Monster Energy® brand energy drinks represented approximately \$345.1 million of the overall increase in gross sales. Gross sales of our Monster Energy® brand energy drinks increased partially due to increased sales by volume as a result of increased domestic and international consumer demand.

Gross sales of our Strategic Brands were \$318.5 million for the year ended December 31, 2017, an increase of \$23.8 million, or 8.1% higher than gross sales of \$294.6 million for the year ended December 31, 2016.

Gross sales of our AFF Third-Party Products were \$21.6 million for the year ended December 31, 2017, an increase of \$4.4 million, or 25.7% higher than gross sales of \$17.2 million for the year ended December 31, 2016.

No other individual product line contributed either a material increase or decrease to gross sales for the year ended December 31, 2017.

Promotional and other allowances, as described in the footnote below, were \$492.3 million for the year ended December 31, 2017, an increase of \$56.3 million, or 12.9% higher than promotional and other allowances of \$436.1 million for the year ended December 31, 2016. Promotional and other allowances as a percentage of gross sales increased to 12.7% from 12.5% for the years ended December 31, 2017 and 2016, respectively.

Net changes in foreign currency exchange rates had an unfavorable impact on gross sales in the Monster Energy® Drinks segment of approximately \$11.9 million for the year ended December 31, 2017. Net changes in foreign currency exchange rates had a favorable impact on gross sales in the Strategic Brands segment of approximately \$3.7 million for the year ended December 31, 2017.

***Gross sales are used internally by management as an indicator of and to monitor operating performance, including sales performance of particular products, salesperson performance, product growth or declines and overall Company performance. The use of gross sales allows evaluation of sales performance before the effect of any promotional items, which can mask certain performance issues. We therefore believe that the presentation of gross sales provides a useful measure of our operating performance. The use of gross sales is not a measure that is recognized under GAAP and should not be considered as an alternative to net sales, which is determined in accordance with GAAP, and should not be used alone as an indicator of operating performance in place of net sales. Additionally, gross sales may not be comparable to similarly titled measures used by other companies, as gross sales has been defined by our internal reporting practices. In addition, gross sales may not be realized in the form of cash receipts as promotional payments and allowances may be deducted from payments received from certain customers.*

The following table reconciles the non-GAAP financial measure of gross sales with the most directly comparable GAAP financial measure of net sales:

In thousands				Percentage	Percentage
				Change	Change
	2018	2017	2016	18 vs. 17	17 vs. 16
Gross sales, net of discounts and returns	\$ 4,429,522	\$ 3,861,368	\$ 3,485,463	14.7%	10.8%
Less: Promotional and other allowances***	622,339	492,323	436,070	26.4%	12.9%
Net Sales	<u>\$ 3,807,183</u>	<u>\$ 3,369,045</u>	<u>\$ 3,049,393</u>	13.0%	10.5%

***Although the expenditures described in this line item are determined in accordance with GAAP and meet GAAP requirements, the presentation thereof does not conform to GAAP presentation requirements. Additionally, our definition of promotional and other allowances may not be comparable to similar items presented by other companies. Promotional and other allowances primarily include consideration given to our bottlers/distributors or retail customers including, but not limited to the following: (i) discounts granted off list prices to support price promotions to end-consumers by retailers; (ii) reimbursements given to our bottlers/distributors for agreed portions of their promotional spend with retailers, including slotting, shelf space allowances and other fees for both new and existing products; (iii) our agreed share of fees given to bottlers/distributors and/or directly to retailers for advertising, in-store marketing and promotional activities; (iv) our agreed share of slotting, shelf space allowances and other fees given directly to retailers, club stores and/or wholesalers; (v) incentives given to our bottlers/distributors and/or retailers for achieving or exceeding certain predetermined sales goals; (vi) discounted or free products; (vii) contractual fees given to our bottlers/distributors related to sales made by us direct to certain customers that fall within the bottlers'/distributors' sales territories; and (viii) certain commissions paid based on sales to our bottlers/distributors. The presentation of promotional and other allowances facilitates an evaluation of their impact on the determination of net sales and the spending levels incurred or correlated with such sales. Promotional and other allowances constitute a material portion of our marketing activities. Our promotional allowance programs with our numerous bottlers/distributors and/or retailers are executed through separate agreements in the ordinary course of business. These agreements generally provide for one or more of the arrangements described above and are of varying durations, ranging from one week to one year. The primary drivers of our promotional and other allowance activities for the years ended December 31, 2018, 2017 and 2016 were (i) to increase sales volume and trial, (ii) to address market conditions, and (iii) to secure shelf and display space at retail.

Sales

The table set forth below discloses selected quarterly data regarding sales for the past five years. Data from any one or more quarters is not necessarily indicative of annual results or continuing trends.

Sales of beverages are expressed in unit case volume. A “unit case” means a unit of measurement equal to 192 U.S. fluid ounces of finished beverage (24 eight-ounce servings). Unit case volume means the number of unit cases (or unit case equivalents) of finished products or concentrates, as if converted into finished products, sold by us.

Our quarterly results of operations reflect seasonal trends that are primarily the result of increased demand in the warmer months of the year. It has been our experience that beverage sales tend to be lower during the first and fourth quarters of each calendar year. In addition, our experience with our energy drink products suggests they are less seasonal than the seasonality expected from traditional beverages. Quarterly fluctuations may also be affected by other factors including the introduction of new products, the opening of new markets where temperature fluctuations are more pronounced, the addition of new bottlers/distributors and customers, changes in the sales mix of our products and changes in and/or increased advertising and promotional expenses. (See “Part I, Item 1 – Business – Seasonality”).

²Without the adoption of ASC 606, the overall average net sales per case increased to \$9.31 for year ended December 31, 2018, as compared to average net sales per case of \$9.30 for the year ended December 31, 2017.

Inflation

We do not believe that inflation had a significant impact on our results of operations for the years ended December 31, 2018, 2017 or 2016.

Liquidity and Capital Resources

Cash flows provided by operating activities. Cash provided by operating activities was \$1.16 billion for the year ended December 31, 2018, as compared with cash provided by operating activities of \$987.7 million for the year ended December 31, 2017.

For the year ended December 31, 2018, cash provided by operating activities was primarily attributable to net income earned of \$993.0 million and adjustments for certain non-cash expenses, consisting of \$57.1 million of stock-based compensation and \$57.0 million of depreciation and other amortization. For the year ended December 31, 2018, cash provided by operating activities also increased due to a \$98.7 million decrease in prepaid income taxes, an \$11.7 million increase in accrued promotional allowances, an \$18.1 million increase in accrued liabilities, a \$10.0 million decrease in distributor receivables, a \$9.9 million increase in accounts payable, a \$5.5 million increase in accrued compensation and a \$1.9 million increase in income taxes payable. For the year ended December 31, 2018, cash used in operating activities was primarily attributable to a \$48.4 million increase in accounts receivable, a \$26.1 million increase in inventories, a \$20.0 million decrease in deferred revenue and a \$6.7 million increase in prepaid expenses and other current assets.

For the year ended December 31, 2017, cash provided by operating activities was primarily attributable to net income earned of \$820.7 million and adjustments for certain non-cash expenses, consisting of \$52.3 million of stock-based compensation and \$48.9 million of depreciation and other amortization. For the year ended December 31, 2017, cash provided by operating activities also increased due to a \$125.0 million decrease in the TCCC Transaction receivables, a \$67.9 million decrease in deferred income taxes, a \$29.6 million increase in accounts payable, a \$21.1 million increase in accrued promotional allowances, an \$11.8 million decrease in accounts receivable, a \$4.5 million increase in

[Table of Contents](#)

accrued compensation and a \$4.7 million decrease in distributor receivables. For the year ended December 31, 2017, cash used in operating activities was primarily attributable to a \$71.3 million increase in prepaid income taxes, an \$88.9 million increase in inventories, a \$19.9 million decrease in deferred revenue, a \$8.2 million decrease in accrued distributor terminations, a \$4.5 million decrease in accrued liabilities, a \$3.6 million decrease in income taxes payable and a \$2.4 million increase in prepaid expenses and other current assets.

Cash flows provided by (used in) investing activities. Net cash provided by investing activities was \$273.0 million for the year ended December 31, 2018 as compared to cash used in investing activities of \$531.5 million for the year ended December 31, 2017.

For both the years ended December 31, 2018 and 2017, cash provided by investing activities was primarily attributable to sales of available-for-sale investments. For both the years ended December 31, 2018 and 2017, cash used in investing activities was primarily attributable to purchases of available-for-sale investments. For both the years ended December 31, 2018 and 2017, cash used in investing activities also included the acquisitions of fixed assets consisting of vans and promotional vehicles, coolers and other equipment to support our marketing and promotional activities, production equipment, furniture and fixtures, office and computer equipment, real property, computer software, equipment used for sales and administrative activities, certain leasehold improvements, improvements to real property and acquisition, defense and maintenance of trademarks. We expect to continue to use a portion of our cash in excess of our requirements for operations for purchasing short-term and long-term investments, leasehold improvements, the acquisition of capital equipment (specifically, vans, trucks and promotional vehicles, coolers, other promotional equipment, merchandise displays, warehousing racks as well as items of production equipment required to produce certain of our existing and/or new products and to develop our brand in international markets) and for other corporate purposes. From time to time, we may also use cash to purchase additional real property related to our beverage business and/or acquire compatible businesses.

Cash flows used in financing activities. Cash used in financing activities was \$1.32 billion for the year ended December 31, 2018 as compared to cash used in financing activities of \$311.1 million for the year ended December 31, 2017. The cash flows used in financing activities for both the years ended December 31, 2018 and 2017 was primarily the result of the repurchases of our common stock. The cash flows provided by financing activities for both the years ended December 31, 2018, and 2017 was primarily attributable to the issuance of our common stock.

Purchases of inventories, increases in accounts receivable and other assets, acquisition of property and equipment (including real property, personal property and coolers), leasehold improvements, advances for or the purchase of equipment for our bottlers, acquisition and maintenance of trademarks, payments of accounts payable, income taxes payable and purchases of our common stock are expected to remain our principal recurring use of cash.

Cash and cash equivalents, short-term and long-term investments – As of December 31, 2018, we had \$637.5 million in cash and cash equivalents and \$320.7 million in short-term investments. We have historically invested these amounts in U.S. treasuries, U.S. government agency securities and municipal securities (which may have an auction reset feature), certificates of deposit, commercial paper, variable rate demand notes and money market funds meeting certain criteria. We maintain our investments for cash management purposes and not for purposes of speculation. Our risk management policies emphasize credit quality (primarily based on short-term ratings by nationally recognized statistical rating organizations) in selecting and maintaining our investments. We regularly assess market risk of our investments and believe our current policies and investment practices adequately limit those risks. However, certain of these investments are subject to general credit, liquidity, market and interest rate risks. These risks associated with our investment portfolio may have an adverse effect on our future results of operations, liquidity and financial condition.

[Table of Contents](#)

Of our \$637.5 million of cash and cash equivalents held at December 31, 2018, \$341.8 million was held by our foreign subsidiaries. No short-term or long-term investments were held by our foreign subsidiaries at December 31, 2018. We do not currently intend, nor do we foresee a need, to repatriate undistributed earnings of our foreign subsidiaries, other than to repay certain intercompany debt owed to our U.S. operations.

We believe that cash available from operations, including our cash resources and our revolving line of credit, will be sufficient for our working capital needs, including purchase commitments for raw materials and inventory, increases in accounts receivable, payments of tax liabilities, expansion and development needs, purchases of shares of our common stock, as well as purchases of capital assets, equipment and properties, through at least the next 12 months. Based on our current plans, at this time we estimate that capital expenditures (exclusive of common stock repurchases) are likely to be approximately \$100.0 million through December 31, 2019. However, future business opportunities may cause a change in this estimate.

The following represents a summary of the Company's contractual commitments and related scheduled maturities as of December 31, 2018:

Obligations	Payments due by period (in thousands)				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
Contractual Obligations ¹	\$ 190,186	\$ 99,004	\$ 75,149	\$ 16,033	\$ -
Capital Leases	836	836	-	-	-

	<u>\$ 268,767</u>	<u>\$ 153,571</u>	<u>\$ 80,508</u>	<u>\$ 19,828</u>	<u>\$ 14,860</u>

¹Contractual obligations include our obligations related to sponsorships and other commitments.

²Purchase commitments include obligations made by us and our subsidiaries to various suppliers for raw materials used in the production of our products. These obligations vary in terms, but are generally satisfied within one year.

In addition, \$5.0 million of unrecognized tax benefits have been recorded as liabilities as of December 31, 2018. It is expected that any change in the amount of unrecognized tax benefit within the next 12 months will not be significant. In addition, \$0.9 million of potential penalties and interest have been recorded as liabilities as of December 31, 2018.

Accounting Policies and Pronouncements

Critical Accounting Policies

Our consolidated financial statements are prepared in accordance with GAAP. GAAP requires us to make estimates and assumptions that affect the reported amounts in our consolidated financial statements. The following summarizes our most significant accounting and reporting policies and practices:

Business Combinations – Business acquisitions are accounted for in accordance with Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) 805 “Business Combinations”. FASB ASC 805 requires the reporting entity to identify the acquirer, determine the acquisition date, recognize and measure the identifiable tangible and intangible assets acquired, the liabilities assumed and any non-controlling interest in the acquired entity, and recognize and measure

goodwill or a gain from the purchase. The acquiree's results are included in the Company's consolidated financial statements from the date of acquisition. Assets acquired and liabilities assumed are recorded at their fair values and the excess of the purchase price over the amounts assigned is recorded as goodwill. Adjustments to fair value assessments are recorded to goodwill over the measurement period (not longer than twelve months). The acquisition method also requires that acquisition-related transaction and post-acquisition restructuring costs be charged to expense and requires the Company to recognize and measure certain assets and liabilities including those arising from contingencies and contingent consideration in a business combination.

Cash and Cash Equivalents – The Company considers all highly liquid investments with an original maturity of three months or less from date of purchase to be cash equivalents. Throughout the year, the Company has had amounts on deposit at financial institutions that exceed the federally insured limits. The Company has not experienced any loss as a result of these deposits and does not expect to incur any losses in the future.

Investments – The Company's investments in debt securities are classified as either held-to-maturity, available-for-sale or trading, in accordance with FASB ASC 320. Held-to-maturity securities are those securities that the Company has the positive intent and ability to hold until maturity. Trading securities are those securities that the Company intends to sell in the near term. All other securities not included in the held-to-maturity or trading category are classified as available-for-sale. Held-to-maturity securities are recorded at amortized cost which approximates fair market value. Trading securities are carried at fair value with unrealized gains and losses charged to earnings. Available-for-sale securities are carried at fair value with unrealized gains and losses recorded within accumulated other comprehensive loss as a separate component of stockholders' equity. FASB ASC 820 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. FASB ASC 820 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs, where available. Under FASB ASC 320-10-35, a security is considered to be other-than-temporarily impaired if the present value of cash flows expected to be collected are less than the security's amortized cost basis (the difference being defined as the "Credit Loss") or if the fair value of the security is less than the security's amortized cost basis and the investor intends, or will be required, to sell the security before recovery of the security's amortized cost basis. If an other-than-temporary impairment exists, the charge to earnings is limited to the amount of Credit Loss if the investor does not intend to sell the security, and will not be required to sell the security, before recovery of the security's amortized cost basis. Any remaining difference between fair value and amortized cost is recognized in other comprehensive loss, net of applicable taxes. The Company evaluates whether the decline in fair value of its investments is other-than-temporary at each quarter-end. This evaluation consists of a review by management, and includes market pricing information and maturity dates for the securities held, market and economic trends in the industry and information on the issuer's financial condition and, if applicable, information on the guarantors' financial condition. Factors considered in determining whether a loss is temporary include the length of time and extent to which the investment's fair value has been less than its cost basis, the financial condition and near-term prospects of the issuer and guarantors, including any specific events which may influence the operations of the issuer and our intent and ability to retain the investment for a reasonable period of time sufficient to allow for any anticipated recovery of fair value.

Accounts Receivable – The Company evaluates the collectability of its trade accounts receivable based on a number of factors. In circumstances where the Company becomes aware of a specific customer's inability to meet its financial obligations to the Company, a specific reserve for bad debts is estimated and recorded, which reduces the recognized receivable to the estimated amount the Company believes will ultimately be collected. In addition to specific customer identification of potential bad debts, bad debt charges are recorded based on the Company's recent loss history and an overall assessment of past due trade accounts receivable outstanding. In accordance with FASB ASC 210-20-45, in its consolidated balance sheets, the Company has presented accounts receivable, net of promotional allowances, only for those customers that it allows net settlement. All other accounts receivable and related promotional allowances are shown on a gross basis.

Inventories – Inventories are valued at the lower of first-in, first-out, cost or market value (net realizable value).

Property and Equipment – Property and equipment are stated at cost. Depreciation of furniture and fixtures, office and computer equipment, computer software, equipment, and vehicles is based on their estimated useful lives (three to ten years) and is calculated using the straight-line method. Amortization of leasehold improvements is based on the lesser of their estimated useful lives or the terms of the related leases and is calculated using the straight-line method. Normal repairs and maintenance costs are expensed as incurred. Expenditures that materially increase values or extend useful lives are capitalized. The related costs and accumulated depreciation of disposed assets are eliminated and any resulting gain or loss on disposition is included in net income.

Goodwill – The Company records goodwill when the consideration paid for an acquisition exceeds the fair value of net tangible and intangible assets acquired, including related tax effects. Goodwill is not amortized; instead goodwill is tested for impairment on an annual basis, or more frequently if the Company believes indicators of impairment exist. The Company first assesses qualitative factors to determine whether it is more-likely-than-not that the fair value of a reporting unit is less than its carrying value. If the Company determines that the fair value is less than the carrying value, the Company will use a two-step process to determine the amount of goodwill impairment. The first step requires comparing the fair value of the reporting unit to its net book value, including goodwill. A potential impairment exists if the fair value of the reporting unit is lower than its net book value. The second step of the process, performed only if a potential impairment exists, involves determining the difference between the fair value of the reporting unit's net assets, other than goodwill, and the fair value of the reporting unit. An impairment charge is recognized for the excess of the carrying value of goodwill over its implied fair value. For the years ended December 31, 2018, 2017 and 2016 there were no impairments recorded.

Other Intangibles – Other Intangibles are comprised of trademarks that represent the Company's exclusive ownership of the Monster Energy®, M® (stylized), Monster Energy Ultra®, Unleash the Beast!®, Monster Rehab®, Mutant®, Java Monster®, Monster Hydro®, Espresso Monster®, Caffé Monster®, Monster Energy Extra Strength Nitrous Technology®, Muscle Monster®, Punch Monster®, Juice Monster®, M3(stylized)®, BU®, Nalu®, NOS®, Full Throttle®, Burn®, Mother®, Ultra Energy®, Play® and Power Play(stylized)®, Gladiator®, Relentless®, Samurai®, Predator® and BPM® trademarks, all used in connection with the manufacture, sale and distribution of beverages. The Company also owns in its own right a number of other trademarks, flavors and formulas in the United States, as well as in a number of countries around the world. In addition, in 2016, we secured the intellectual property of our most important flavors for certain of our Monster Energy® Brand energy drinks in perpetuity. In accordance with FASB ASC 350, intangible assets with indefinite lives are not amortized but instead are measured for impairment at least annually, or when events indicate that an impairment exists. The Company calculates impairment as the excess of the carrying value of its indefinite-lived assets over their estimated fair value. If the carrying value exceeds the estimate of fair value a write-down is recorded. The Company amortizes its intangibles with finite useful lives over their respective useful lives. For the years ended December 31, 2018, 2017 and 2016 there were no impairments recorded.

Long-Lived Assets – Management regularly reviews property and equipment and other long-lived assets, including certain definite-lived intangible assets, for possible impairment. This review occurs annually, or more frequently if events or changes in circumstances indicate the carrying amount of the asset may not be recoverable. If there is indication of impairment, management then prepares an estimate of future cash flows (undiscounted and without interest charges) expected to result from the use of the

asset and its eventual disposition. If these cash flows are less than the carrying amount of the asset, an impairment loss is recognized to write down the asset to its estimated fair value. The fair value is estimated using the present value of the future cash flows discounted at a rate commensurate with management's estimates of the business risks. Preparation of estimated expected future cash flows is inherently subjective and is based on management's best estimate of assumptions concerning expected future conditions. For the years ended December 31, 2018, 2017 and 2016, there were no impairment indicators identified. Long-lived assets held for sale are recorded at the lower of their carrying amount or fair value less cost to sell.

Foreign Currency Translation and Transactions – The accounts of the Company's foreign subsidiaries are translated in accordance with FASB ASC 830. Foreign currency transaction gains and losses are recognized in other expense, net, at the time they occur. Net foreign currency exchange gains or losses resulting from the translation of assets and liabilities of foreign subsidiaries whose functional currency is not the U.S. dollar are recorded as a part of accumulated other comprehensive loss in stockholders' equity. Unrealized foreign currency exchange gains and losses on certain intercompany transactions that are of a long-term investment nature (i.e., settlement is not planned or anticipated in the foreseeable future) are also recorded in accumulated other comprehensive loss in stockholders' equity. During the years ended December 31, 2018, 2017 and 2016, we entered into forward currency exchange contracts with financial institutions to create an economic hedge to specifically manage a portion of the foreign exchange risk exposure associated with certain consolidated subsidiaries non-functional currency denominated assets and liabilities. All foreign currency exchange contracts outstanding as of December 31, 2018 have terms of three months or less. We do not enter into forward currency exchange contracts for speculation or trading purposes.

Revenue Recognition – The Company's Monster Energy® Drinks segment generates net operating revenues by selling ready-to-drink packaged energy drinks primarily to bottlers and full service beverage distributors. In some cases, the Company sells directly to retail grocery and specialty chains, wholesalers, club stores, mass merchandisers, convenience chains, drug stores, foodservice customers and the military.

The Company's Strategic Brands segment primarily generates net operating revenues by selling "concentrates" and/or "beverage bases" to authorized bottling and canning operations. Such bottlers generally combine the concentrates and/or beverage bases with sweeteners, water and other ingredients to produce ready-to-drink packaged energy drinks. The ready-to-drink packaged energy drinks are then sold to other bottlers and full service distributors and to retail grocery and specialty chains, wholesalers, club stores, mass merchandisers, convenience chains, foodservice customers, drug stores and the military. To a lesser extent, our Strategic Brands segment generates net operating revenues by selling certain ready-to-drink packaged energy drinks to bottlers and full service beverage distributors.

The majority of the Company's revenue is recognized when it satisfies a single performance obligation by transferring control of its products to a customer. Control is generally transferred when the Company's products are either shipped or delivered based on the terms contained within the underlying contracts or agreements. Certain of the Company's bottlers/distributors may also perform a separate function as a co-packer on the Company's behalf. In such cases, control of the Company's products passes to such bottlers/distributors when they notify the Company that they have taken possession or transferred the relevant portion of the Company's finished goods. The Company's general payment terms are short-term in duration. The Company does not have significant financing components or payment terms. The Company did not have any material unsatisfied performance obligations as of December 31, 2018 or December 31, 2017.

The Company excludes from revenues all taxes assessed by a governmental authority that are imposed on the sale of its products and collected from customers.

[Table of Contents](#)

Distribution expenses to transport the Company's products, where applicable, and warehousing expense after manufacture are accounted for within operating expenses.

Promotional and other allowances (variable consideration) recorded as a reduction to net sales, primarily include consideration given to the Company's bottlers/distributors or retail customers including, but not limited to the following:

- discounts granted off list prices to support price promotions to end-consumers by retailers;
- reimbursements given to the Company's bottlers/distributors for agreed portions of their promotional spend with retailers, including slotting, shelf space allowances and other fees for both new and existing products;
- the Company's agreed share of fees given to bottlers/distributors and/or directly to retailers for advertising, in-store marketing and promotional activities;
- the Company's agreed share of slotting, shelf space allowances and other fees given directly to retailers;
- incentives given to the Company's bottlers/distributors and/or retailers for achieving or exceeding certain predetermined sales goals;
- discounted or free products;
- contractual fees given to the Company's bottlers/distributors related to sales made directly by the Company to certain customers that fall within the bottlers'/distributors' sales territories; and
- commissions paid to TCCC based on our sales to the TCCC Subsidiaries and/or the TCCC Related Parties.

The Company's promotional allowance programs with its bottlers/distributors and/or retailers are executed through separate agreements in the ordinary course of business. These agreements generally provide for one or more of the arrangements described above and are of varying durations, ranging from one week to one year. The Company's promotional and other allowances are calculated based on various programs with bottlers/distributors and retail customers, and accruals are established during the year for its anticipated liabilities. These accruals are based on agreed upon terms as well as the Company's historical experience with similar programs and require management's judgment with respect to estimating consumer participation and/or distributor and retail customer performance levels. Differences between such estimated expenses and actual expenses for promotional and other allowance costs have historically been insignificant and are recognized in earnings in the period such differences are determined.

Amounts received pursuant to new and/or amended distribution agreements entered into with certain distributors, relating to the costs associated with terminating the Company's prior distributors, are accounted for as revenue ratably over the anticipated life of the respective distribution agreements, generally 20 years.

The Company also enters into license agreements that generate revenues associated with third-party sales of non-beverage products bearing our trademarks including, but not limited to, clothing, hats, t-shirts, jackets, helmets and automotive wheels.

Management believes that adequate provision has been made for cash discounts, returns and spoilage based on the Company's historical experience.

Cost of Sales – Cost of sales consists of the costs of flavors, concentrates and/or beverage bases, the costs of raw materials utilized in the manufacture of beverages, co-packing fees, repacking fees, in-bound freight charges, as well as internal transfer costs, warehouse expenses incurred prior to the manufacture of the Company's finished products and certain quality control costs. In addition, the

[Table of Contents](#)

Company includes in costs of sales certain costs such as depreciation, amortization and payroll costs that relate to the direct manufacture by the Company of certain flavors and concentrates. Raw materials account for the largest portion of cost of sales. Raw materials include cans, bottles, other containers, flavors, ingredients and packaging materials.

Operating Expenses – Operating expenses include selling expenses such as distribution expenses to transport products to customers and warehousing expenses after manufacture, as well as expenses for advertising, sampling and in-store demonstration costs, costs for merchandise displays, point-of-sale materials and premium items, sponsorship expenses, other marketing expenses and design expenses. Operating expenses also include such costs as payroll costs, travel costs, professional service fees (including legal fees), termination payments made to certain of the Company’s prior distributors, depreciation and other general and administrative costs.

Income Taxes – The Company utilizes the liability method of accounting for income taxes as set forth in FASB ASC 740. Under the liability method, deferred taxes are determined based on the temporary differences between the financial statement and tax basis of assets and liabilities using tax rates expected to be in effect during the years in which the basis differences reverse. A valuation allowance is recorded when it is more likely than not that some of the deferred tax assets will not be realized. In determining the need for valuation allowances the Company considers projected future taxable income and the availability of tax planning strategies. If in the future the Company determines that it would not be able to realize its recorded deferred tax assets, an increase in the valuation allowance would be recorded, decreasing earnings in the period in which such determination is made.

The Company assesses its income tax positions and records tax benefits for all years subject to examination based upon the Company’s evaluation of the facts, circumstances and information available at the reporting date. For those tax positions where there is a greater than 50% likelihood that a tax benefit will be sustained, the Company has recorded the largest amount of tax benefit that may potentially be realized upon ultimate settlement with a taxing authority that has full knowledge of all relevant information. For those income tax positions where there is less than 50% likelihood that a tax benefit will be sustained, no tax benefit has been recognized in the financial statements.

Recent Accounting Pronouncements

See “Part II, Item 8 – Financial Statements and Supplementary Data – Note 1 – Organization and Summary of Significant Accounting Policies – Recent Accounting Pronouncements” for a full description of recent accounting pronouncements including the respective expected dates of adoption and expected effects on the Company’s consolidated financial position, results of operations or liquidity.

Forward-Looking Statements

The Private Securities Litigation Reform Act of 1995 (the “Act”) provides a safe harbor for forward-looking statements made by or on behalf of the Company. Certain statements made in this report may constitute forward-looking statements (within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Exchange Act, as amended) regarding our expectations with respect to revenues, profitability, adequacy of funds from operations and our existing credit facility, among other things. All statements containing a projection of revenues, income (loss), earnings (loss) per share, capital expenditures, dividends, capital structure or other financial items, a statement of management’s plans and objectives for future operations, or a statement of future economic performance contained in management’s discussion and analysis of financial condition and results of operations, including statements related to new products, volume growth and statements encompassing general optimism about future operating results and non-historical information, are forward-looking statements within the meaning of the Act. Without limiting the foregoing, the words “believes,” “thinks,” “anticipates,” “plans,” “expects,” “estimates,” and similar expressions are intended to identify forward-looking statements.

Management cautions that these statements are qualified by their terms and/or important factors, many of which are outside our control and involve a number of risks, uncertainties and other factors, that could cause actual results and events to differ materially from the statements made including, but not limited to, the following:

- The effect of our extensive commercial arrangements with TCCC on our future performance;
- The relationship risks associated with the arbitration with TCCC;
- The outcome of our arbitration proceedings with TCCC, including TCCC developing and distributing additional energy products;
- The effect of TCCC being one of our significant shareholders and the potential divergence of TCCC’s interests from those of our other shareholders;
- The effect of TCCC’s refranchising initiative to transition from a TCCC owned system to an independent bottling system, including our ability to maintain relationships with TCCC system bottlers/distributors and manage their ongoing commitment to focus on our products;
- Our ability to successfully enter into new distribution agreements with bottlers/distributors within the TCCC distribution system for new international territories;
- The possible slowing of and/or decline in the sales growth rates of the energy drink category and/or the U.S. convenience store market generally;
- Disruption in distribution or sales and/or decline in sales due to the termination and/or appointment of existing and/or new domestic and/or international distributors;
- Lack of anticipated demand for our products in domestic and/or international markets;
- Fluctuations in the inventory levels of our bottlers/distributors, planned or otherwise, and the resultant impact on our revenues;
- Unfavorable regulations, including taxation requirements, age restrictions imposed on the sale, purchase, or consumption of our products, marketing restrictions, product registration requirements, tariffs, trade restrictions, container size limitations and/or ingredient restrictions;
- The effect of inquiries from, and/or actions by, state attorneys general, the Federal Trade Commission (the “FTC”), the Food and Drug Administration (the “FDA”), municipalities, city attorneys, other government agencies, quasi-government agencies, government officials (including members of U.S. Congress) and/or analogous central and local agencies and other authorities in the foreign countries in which our products are manufactured and/or distributed, into the advertising, marketing, promotion, ingredients, sale and/or consumption of our energy drink products, including voluntary and/or required changes to our business practices;
- Our ability to comply with regulations and evolving industry standards regarding consumer privacy and data use and security, including with respect to the General Data Protection Regulation approved by the European Union;

[Table of Contents](#)

- Our ability to achieve profitability from certain of our operations outside the United States;
- Our ability to manage legal and regulatory requirements in foreign jurisdictions, potential difficulties in staffing and managing foreign operations and potentially higher incidence of fraud or corruption and credit risk of foreign customers and/or distributors;
- Our ability to produce our products in international markets in which they are sold, thereby reducing freight costs and/or product damages;
- Our ability to absorb, reduce, or pass on to our bottlers/distributors increases in freight costs;
- Our ability to effectively manage our inventories and/or our accounts receivables;
- Our foreign currency exchange rate risk with respect to our sales, expenses, profits, assets and liabilities denominated in currencies other than the U.S. dollar, which will continue to increase as foreign sales increase;
- Changes in accounting standards may affect our reported profitability;
- Implications of the Tax Reform Act;
- Any proceedings which may be brought against us by the Securities and Exchange Commission (the “SEC”), the FDA, the FTC or other governmental agencies or bodies;
- The outcome and/or possibility of future shareholder derivative actions or shareholder securities litigation that may be filed against us and/or against certain of our officers and directors, and the possibility of other private shareholder litigation;
- The outcome of product liability or consumer fraud litigation and/or class action litigation (or its analog in foreign jurisdictions) regarding the safety of our products and/or the ingredients in and/or claims made in connection with our products and/or alleging false advertising, marketing and/or promotion, and the possibility of future product liability and/or class action lawsuits;
- The outcome of any other litigation;
- Unfavorable resolution of tax matters;
- Uncertainty and volatility in the domestic and global economies, including risk of counterparty default or failure;
- Our ability to address any significant deficiencies or material weakness in our internal controls over financial reporting;
- Our ability to continue to generate sufficient cash flows to support our expansion plans and general operating activities;
- Decreased demand for our products resulting from changes in consumer preferences, obesity and other perceived health concerns, including concerns relating to certain ingredients in our products or packaging, product safety concerns and/or from decreased consumer discretionary spending power;
- Adverse publicity surrounding obesity and health concerns related to our products, water usage, environmental impact, human rights and labor and workplace laws;
- Changes in demand that are weather related and/or for other reasons, including changes in product category consumption;
- Changes in cost and availability of certain key ingredients, as well as disruptions to the supply chain, as a result of climate change and extreme weather conditions;
- The impact on our business of competitive products and pricing pressures and our ability to gain or maintain our share of sales in the marketplace as a result of actions by competitors;
- Our ability to introduce new products;
- Our ability to implement and/or maintain price increases;
- An inability to achieve volume growth through product and packaging initiatives;
- Our ability to sustain the current level of sales and/or achieve growth for our Monster Energy® brand energy drinks and/or our other products, including the Strategic Brands acquired from TCCC;
- The impact of criticism of our energy drink products and/or the energy drink market generally and/or legislation enacted (whether as a result of such criticism or otherwise) that restricts the marketing or sale of energy drinks (including prohibiting the sale of energy drinks at certain establishments or pursuant to certain governmental programs), limits caffeine content in beverages, requires certain product labeling disclosures and/or warnings, imposes excise and/or sales taxes, limits product sizes and/or imposes age restrictions for the sale of energy drinks;

[Table of Contents](#)

- Our ability to comply with and/or resulting lower consumer demand for energy drinks due to proposed and/or future U.S. federal, state and local laws and regulations and/or proposed or existing laws and regulations in certain foreign jurisdictions and/or any changes therein, including changes in taxation requirements (including tax rate changes, new tax laws, new and/or increased excise, sales and/or other taxes on our products and revised tax law interpretations) and environmental laws, as well as the FD&C Act and regulations or rules made thereunder or in connection therewith by the FDA, as well as changes in any other food, drug or similar laws in the United States and internationally, especially those changes that may restrict the sale of energy drinks (including prohibiting the sale of energy drinks at certain establishments or pursuant to certain governmental programs), limit caffeine content in beverages, require certain product labeling disclosures and/or warnings, impose excise taxes, impose sugar taxes, limit product sizes, or impose age restrictions for the sale of energy drinks, as well as laws and regulations or rules made or enforced by the Bureau of Alcohol, Tobacco, Firearms and Explosives and/or the FTC or their foreign counterparts;
- Our ability to satisfy all criteria set forth in any model energy drink guidelines, including, without limitation, those adopted by the American Beverage Association, of which the Company is a member, and/or any international beverage association and the impact on the Company of such guidelines;
- Disruptions in the timely import or export of our products and/or ingredients due to port strikes and related labor issues;
- The effect of unfavorable or adverse public relations, press, articles, comments and/or media attention;
- Changes in the cost, quality and availability of containers, packaging materials, aluminum, the Midwest and other premiums, raw materials and other ingredients and juice concentrates, and our ability to obtain and/or maintain favorable supply arrangements and relationships and procure timely and/or sufficient production of all or any of our products to meet customer demand;
- Any shortages that may be experienced in the procurement of containers and/or other raw materials including, without limitation, PET containers used for our Monster Hydro® energy drinks and 24-ounce aluminum Cap Cans;
- The impact on our cost of sales of corporate activity among the limited number of suppliers from whom we purchase certain raw materials;
- Our ability to pass on to our customers all or a portion of any increases in the costs of raw materials, ingredients, commodities and/or other cost inputs affecting our business;
- Our ability to achieve both internal domestic and international forecasts, which may be based on projected volumes and sales of many product types and/or new products, certain of which are more profitable than others; there can be no assurance that we will achieve projected levels of sales as well as forecasted product and/or geographic mixes;
- Our ability to penetrate new domestic and/or international markets and/or gain approval or mitigate the delay in securing approval for the sale of our products in various countries;
- Economic or political instability in one or more of our international markets;
- The effectiveness of sales and/or marketing efforts by us and/or by the full service bottlers/distributors of our products, most of whom distribute products that may be regarded as competitive with our products;
- Unilateral decisions by full service bottlers/distributors, convenience chains, grocery chains, mass merchandisers, specialty chain stores, club stores and other customers to discontinue carrying all or any of our products that they are carrying at any time, restrict the range of our products they carry and/or devote less resources to the sale of our products;
- The effects of retailer consolidation on our business;
- The costs and/or effectiveness, now or in the future, of our advertising, marketing and promotional strategies;
- The success of our sports marketing endeavors both domestically and internationally;
- Unforeseen economic and political changes and local or international catastrophic events;
- Possible recalls of our products and/or defective production;

[Table of Contents](#)

- Our ability to make suitable arrangements and/or procure sufficient capacity for the co-packing of any of our products both domestically and internationally, the timely replacement of discontinued co-packing arrangements and/or limitations on co-packing availability, including for retort production;
- Our ability to make suitable arrangements for the timely procurement of non-defective raw materials;
- Our inability to protect and/or the loss of our intellectual property rights and/or our inability to use our trademarks, trade names or designs and/or trade dress in certain countries;
- Volatility of stock prices which may restrict stock sales, stock purchases or other opportunities as well as negatively impact the motivation of equity award grantees;
- Provisions in our organizational documents and/or control by insiders which may prevent changes in control even if such changes would be beneficial to other stockholders;
- The failure of our bottlers and/or contract packers to manufacture our products on a timely basis or at all;
- Exposure to significant liabilities due to litigation, legal or regulatory proceedings;
- Any disruption in and/or lack of effectiveness of our information technology systems, including a breach of cyber security, that disrupts our business or negatively impacts customer relationships; and
- Recruitment and retention of senior management, other key employees and our employee base in general.

The foregoing list of important factors and other risks detailed from time to time in our reports filed with the Securities and Exchange Commission is not exhaustive. See “Part I, Item 1A – Risk Factors,” for a more complete discussion of these risks and uncertainties and for other risks and uncertainties. Those factors and the other risk factors described therein are not necessarily all of the important factors that could cause actual results or developments to differ materially from those expressed in any of our forward-looking statements. Other unknown or unpredictable factors also could harm our results. Consequently, our actual results could be materially different from the results described or anticipated by our forward-looking statements due to the inherent uncertainty of estimates, forecasts and projections, and may be better or worse than anticipated. Given these uncertainties, you should not rely on forward-looking statements. Forward-looking statements represent our estimates and assumptions only as of the date that they were made. We expressly disclaim any duty to provide updates to forward-looking statements, and the estimates and assumptions associated with them, after the date of this report, in order to reflect changes in circumstances or expectations or the occurrence of unanticipated events except to the extent required by applicable securities laws.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

In the normal course of business our financial position is routinely subject to a variety of risks. The principal market risks (i.e., the risk of loss arising from adverse changes in market rates and prices) to which we are exposed are fluctuations in commodity and other input prices affecting the costs of our raw materials (including, but not limited to, increases in the costs of juice concentrates, increases in the price of aluminum for cans, as well as sugar and other sweeteners, glucose, sucrose, milk, cream, protein, coffee and tea, all of which are used in some or many of our products), fluctuations in energy and fuel prices, and limited availability of certain raw materials. We generally do not use hedging agreements or alternative instruments to manage the risks associated with securing sufficient ingredients or raw materials. We are also subject to market risks with respect to the cost of commodities and other inputs because our ability to recover increased costs through higher pricing is limited by the competitive environment in which we operate.

We do not use derivative financial instruments to protect ourselves from fluctuations in interest rates and generally do not hedge against fluctuations in commodity prices.

Our gross sales to customers outside of the United States were approximately 31% and 28% of consolidated gross sales for the years ended December 31, 2018 and 2017, respectively. Our growth strategy includes expanding our international business. As a result, we are subject to risks from changes in foreign currency exchange rates. During the year ended December 31, 2018, we entered into forward currency exchange contracts with financial institutions to create an economic hedge to specifically manage a portion of the foreign exchange risk exposure associated with certain consolidated subsidiaries' non-functional currency denominated assets and liabilities. All foreign currency exchange contracts entered into by us as of December 31, 2018 have terms of three months or less. We do not enter into forward currency exchange contracts for speculation or trading purposes.

We have not designated our foreign currency exchange contracts as hedge transactions under FASB ASC 815. Therefore, gains and losses on our foreign currency exchange contracts are recognized in other expense, net, in the consolidated statements of income, and are largely offset by the changes in the fair value of the underlying economically hedged item. We do not consider the potential loss resulting from a hypothetical 10% adverse change in quoted foreign currency exchange rates as of December 31, 2018 to be significant.

As of December 31, 2018, we had \$637.5 million in cash and cash equivalents and \$320.7 million in short-term investments including certificates of deposit, commercial paper, U.S. government agency securities, U.S. treasuries, variable rate demand notes and municipal securities (which may have an auction reset feature). Certain of these investments are subject to general credit, liquidity, market and interest rate risks.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures – Under the supervision and with the participation of the Company's management, including our Chief Executive Officer and Chief Financial Officer, we have evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13(a)-15(e) and 15(d)-15(e) of the Exchange Act) as of the end of the period covered by this report. Based upon this evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures are effective to ensure that information we are required to disclose in reports that we file or submit under the Exchange Act is (1) recorded, processed, summarized and reported within the time periods specified in rules and forms of the SEC and (2) accumulated and communicated to our management, including our principal executive and principal financial officers as appropriate to allow timely decisions regarding required disclosures.

Management's Report on Internal Control Over Financial Reporting – Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as defined in Exchange Act Rules 13a-15(f) and 15d-15(f). Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, our management conducted an evaluation of the effectiveness of our internal control over financial reporting as of December 31, 2018, based on the framework in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on our management's evaluation under the framework in *Internal Control - Integrated Framework (2013)*, our management concluded that our internal control over financial reporting was effective as of December 31, 2018.

[Table of Contents](#)

Our internal control over financial reporting as of December 31, 2018, has been audited by Deloitte & Touche LLP, an independent registered public accounting firm, as stated in their attestation report, which is included herein.

Changes in Internal Control Over Financial Reporting – There were no changes in the Company’s internal controls over financial reporting during the quarter ended December 31, 2018, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
Monster Beverage Corporation
Corona, California

Opinion on Internal Control over Financial Reporting

We have audited the internal control over financial reporting of Monster Beverage Corporation and subsidiaries (the “Company”) as of December 31, 2018, based on criteria established in *Internal Control —Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO”). In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2018, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by COSO.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (“PCAOB”), the consolidated financial statements and financial statement schedule as of and for the year ended December 31, 2018, of the Company and our report dated February 28, 2019, expressed an unqualified opinion on those financial statements and financial statement schedule.

Basis for Opinion

The Company’s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management’s Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company’s internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control over Financial Reporting

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
Monster Beverage Corporation
Corona, California

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Monster Beverage Corporation and subsidiaries (the “Company”) as of December 31, 2018 and 2017, the related consolidated statements of income, comprehensive income, stockholders’ equity and cash flows, for each of the three years in the period ended December 31, 2018, and the related notes and the schedule listed in the Index at Item 15(a) (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2018 and 2017, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2018, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (“PCAOB”), the Company’s internal control over financial reporting as of December 31, 2018, based on criteria established in *Internal Control–Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 28, 2019, expressed an unqualified opinion on the Company’s internal control over financial reporting.

Basis for Opinion

These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on the Company’s financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

MONSTER BEVERAGE CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Tabular Dollars in Thousands, Except Per Share Amounts)

1. ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Organization – Monster Beverage Corporation (the “Company”) was incorporated in the state of Delaware. The Company is a holding company and has no operating business except through its consolidated subsidiaries.

Nature of Operations – The Company develops, markets, sells and distributes energy drink beverages and concentrates for energy drink beverages, primarily under the following brand names: Monster Energy®, Monster Energy Ultra®, Monster Rehab®, Monster MAXX®, Java Monster®, Muscle Monster®, Punch Monster®, Juice Monster®, Monster Hydro®, Espresso Monster®, Caffé Monster®, Nalu®, NOS®, Full Throttle®, Burn®, Mother®, Ultra Energy®, Play® and Power Play(stylized)®, Relentless®, BPM®, Predator®, Mutant®, BU® and Live+.

Basis of Presentation – The accompanying consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”) and include the accounts of the Company and its consolidated subsidiaries.

Principles of Consolidation – The Company consolidates all entities that it controls by ownership of a majority voting interest. All intercompany balances and transactions have been eliminated in consolidation.

Business Combinations – Business acquisitions are accounted for in accordance with Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) 805 “Business Combinations”. FASB ASC 805 requires the reporting entity to identify the acquirer, determine the acquisition date, recognize and measure the identifiable tangible and intangible assets acquired, the liabilities assumed and any non-controlling interest in the acquired entity, and recognize and measure goodwill or a gain from the purchase. The acquiree’s results are included in the Company’s consolidated financial statements from the date of acquisition. Assets acquired and liabilities assumed are recorded at their fair values and the excess of the purchase price over the amounts assigned is recorded as goodwill. Adjustments to fair value assessments are recorded to goodwill over the measurement period (not longer than twelve months). The acquisition method also requires that acquisition-related transaction and post-acquisition restructuring costs be charged to expense and requires the Company to recognize and measure certain assets and liabilities including those arising from contingencies and contingent consideration in a business combination.

Cash and Cash Equivalents – The Company considers all highly liquid investments with an original maturity of three months or less from date of purchase to be cash equivalents. Throughout the year, the Company has had amounts on deposit at financial institutions that exceed the federally insured limits. The Company has not experienced any loss as a result of these deposits and does not expect to incur any losses in the future.

Investments – The Company’s investments in debt securities are classified as either held-to-maturity, available-for-sale or trading, in accordance with FASB ASC 320. Held-to-maturity securities are those securities that the Company has the positive intent and ability to hold until maturity. Trading securities are those securities that the Company intends to sell in the near term. All other securities not included in the held-to-maturity or trading category are classified as available-for-sale. Held-to-maturity securities are recorded at amortized cost which approximates fair market value. Trading securities are carried at fair value with unrealized gains and losses charged to earnings. Available-for-sale securities are carried at fair value with unrealized gains and losses recorded within accumulated other comprehensive loss as a separate component of stockholders’ equity. FASB ASC 820 defines fair value as the price that

MONSTER BEVERAGE CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Tabular Dollars in Thousands, Except Per Share Amounts)

would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. FASB ASC 820 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs, where available (See Note 4). Under FASB ASC 320-10-35, a security is considered to be other-than-temporarily impaired if the present value of cash flows expected to be collected are less than the security's amortized cost basis (the difference being defined as the "Credit Loss") or if the fair value of the security is less than the security's amortized cost basis and the investor intends, or will be required, to sell the security before recovery of the security's amortized cost basis. If an other-than-temporary impairment exists, the charge to earnings is limited to the amount of Credit Loss if the investor does not intend to sell the security, and will not be required to sell the security, before recovery of the security's amortized cost basis. Any remaining difference between fair value and amortized cost is recognized in other comprehensive loss, net of applicable taxes. The Company evaluates whether the decline in fair value of its investments is other-than-temporary at each quarter-end. This evaluation consists of a review by management, and includes market pricing information and maturity dates for the securities held, market and economic trends in the industry and information on the issuer's financial condition and, if applicable, information on the guarantors' financial condition. Factors considered in determining whether a loss is temporary include the length of time and extent to which the investment's fair value has been less than its cost basis, the financial condition and near-term prospects of the issuer and guarantors, including any specific events which may influence the operations of the issuer and the Company's intent and ability to retain the investment for a reasonable period of time sufficient to allow for any anticipated recovery of fair value.

Accounts Receivable – The Company evaluates the collectability of its trade accounts receivable based on a number of factors. In circumstances where the Company becomes aware of a specific customer's inability to meet its financial obligations to the Company, a specific reserve for bad debts is estimated and recorded, which reduces the recognized receivable to the estimated amount the Company believes will ultimately be collected. In addition to specific customer identification of potential bad debts, bad debt charges are recorded based on the Company's recent loss history and an overall assessment of past due trade accounts receivable outstanding. In accordance with FASB ASC 210-20-45, in its consolidated balance sheets, the Company has presented accounts receivable, net of promotional allowances, only for those customers that it allows net settlement. All other accounts receivable and related promotional allowances are shown on a gross basis.

Inventories – Inventories are valued at the lower of first-in, first-out, cost or market value (net realizable value).

Property and Equipment – Property and equipment are stated at cost. Depreciation of furniture and fixtures, office and computer equipment, computer software, equipment, and vehicles is based on their estimated useful lives (three to ten years) and is calculated using the straight-line method. Amortization of leasehold improvements is based on the lesser of their estimated useful lives or the terms of the related leases and is calculated using the straight-line method. Normal repairs and maintenance costs are expensed as incurred. Expenditures that materially increase values or extend useful lives are capitalized. The related costs and accumulated depreciation of disposed assets are eliminated and any resulting gain or loss on disposition is included in net income.

Goodwill – The Company records goodwill when the consideration paid for an acquisition exceeds the fair value of net tangible and intangible assets acquired, including related tax effects. Goodwill is not amortized; instead goodwill is tested for impairment on an annual basis, or more frequently if the Company believes indicators of impairment exist. The Company first assesses qualitative factors to determine whether it is more-likely-than-not that the fair value of a reporting unit is less than its carrying value. If the Company determines that the fair value is less than the carrying value,

MONSTER BEVERAGE CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Tabular Dollars in Thousands, Except Per Share Amounts)

the Company will use a two-step process to determine the amount of goodwill impairment. The first step requires comparing the fair value of the reporting unit to its net book value, including goodwill. A potential impairment exists if the fair value of the reporting unit is lower than its net book value. The second step of the process, performed only if a potential impairment exists, involves determining the difference between the fair value of the reporting unit's net assets, other than goodwill, and the fair value of the reporting unit. An impairment charge is recognized for the excess of the carrying value of goodwill over its implied fair value. For the years ended December 31, 2018, 2017 and 2016 there were no impairments recorded.

Other Intangibles – Other Intangibles are comprised primarily of trademarks that represent the Company's exclusive ownership of the Monster Energy®, M™, Monster Energy Ultra®, Unleash the Beast!®, Monster Rehab®, Mutant®, Java Monster®, Monster Hydro®, Monster MAXX®, Muscle Monster®, Punch Monster®, Juice Monster®, Espresso Monster®, Caffé Monster®, M3(stylized)®, BU®, Nalu®, NOS®, Full Throttle®, Burn®, Mother®, Ultra Energy®, Play® and Power Play(stylized)®, Predator®, Gladiator®, Relentless®, Samurai® and BPM® trademarks, all used in connection with the manufacture, sale and distribution of beverages. The Company also owns a number of other trademarks, flavors and formulas in the United States, as well as in a number of countries around the world. In accordance with FASB ASC 350, intangible assets with indefinite lives are not amortized but instead are measured for impairment at least annually, or when events indicate that an impairment exists. The Company calculates impairment as the excess of the carrying value of its indefinite-lived assets over their estimated fair value. If the carrying value exceeds the estimate of fair value a write-down is recorded. The Company amortizes its trademarks with finite useful lives over their respective useful lives. For the years ended December 31, 2018, 2017 and 2016 there were no impairments recorded.

Long-Lived Assets – Management regularly reviews property and equipment and other long-lived assets, including certain definite-lived intangible assets, for possible impairment. This review occurs annually, or more frequently if events or changes in circumstances indicate the carrying amount of the asset may not be recoverable. If there is indication of impairment, management then prepares an estimate of future cash flows (undiscounted and without interest charges) expected to result from the use of the asset and its eventual disposition. If these cash flows are less than the carrying amount of the asset, an impairment loss is recognized to write down the asset to its estimated fair value. The fair value is estimated using the present value of the future cash flows discounted at a rate commensurate with management's estimates of the business risks. Preparation of estimated expected future cash flows is inherently subjective and is based on management's best estimate of assumptions concerning expected future conditions. For the years ended December 31, 2018, 2017 and 2016, there were no impairment indicators identified. Long-lived assets held for sale are recorded at the lower of their carrying amount or fair value less cost to sell.

Foreign Currency Translation and Transactions – The accounts of the Company's foreign subsidiaries are translated in accordance with FASB ASC 830. Foreign currency transaction gains and losses are recognized in other expense, net, at the time they occur. Net foreign currency exchange gains or losses resulting from the translation of assets and liabilities of foreign subsidiaries whose functional currency is not the U.S. dollar are recorded as a part of accumulated other comprehensive loss in stockholders' equity. Unrealized foreign currency exchange gains and losses on certain intercompany transactions that are of a long-term investment nature (i.e., settlement is not planned or anticipated in the foreseeable future) are also recorded in accumulated other comprehensive loss in stockholders' equity. During the years ended December 31, 2018, 2017 and 2016, the Company entered into forward currency exchange contracts with financial institutions to create an economic hedge to specifically manage a portion of the foreign exchange risk exposure associated with certain consolidated subsidiaries non-

functional currency denominated assets and liabilities. All foreign currency exchange contracts outstanding as of December 31, 2018 have terms of three months or less. The Company does not enter into forward currency exchange contracts for speculation or trading purposes.

The Company has not designated its foreign currency exchange contracts as hedge transactions under FASB ASC 815. Therefore, gains and losses on the Company's foreign currency exchange contracts are recognized in other expense, net, in the consolidated statements of income, and are largely offset by the changes in the fair value of the underlying economically hedged item. For the years ended December 31, 2018, 2017 and 2016, aggregate foreign currency transaction losses, including the gains or losses on forward currency exchange contracts, amounted to \$4.0 million, \$3.3 million and \$9.7 million, respectively, and have been recorded in other income (expense), net, in the accompanying consolidated statements of income.

Revenue Recognition – The Company has three operating and reportable segments, (i) Monster Energy® Drinks segment (“Monster Energy® Drinks”), which is primarily comprised of the Company's Monster Energy® drinks, (ii) Strategic Brands segment (“Strategic Brands”), which is primarily comprised of the various energy drink brands acquired from TCCC in 2015 as well as the Company's Predator® energy drinks, and (iii) Other segment (“Other”), which is comprised of certain products sold by American Fruits & Flavors LLC, a wholly-owned subsidiary of the Company, to independent third-party customers.

The Company's Monster Energy® Drinks segment generates net operating revenues by selling ready-to-drink packaged energy drinks primarily to bottlers and full service beverage distributors. In some cases, the Company sells directly to retail grocery and specialty chains, wholesalers, club stores, mass merchandisers, convenience chains, drug stores, foodservice customers and the military.

The Company's Strategic Brands segment primarily generates net operating revenues by selling “concentrates” and/or “beverage bases” to authorized bottling and canning operations. Such bottlers generally combine the concentrates and/or beverage bases with sweeteners, water and other ingredients to produce ready-to-drink packaged energy drinks. The ready-to-drink packaged energy drinks are then sold to other bottlers and full service distributors and to retail grocery and specialty chains, wholesalers, club stores, mass merchandisers, convenience chains, foodservice customers, drug stores and the military. To a lesser extent, our Strategic Brands segment generates net operating revenues by selling certain ready-to-drink packaged energy drinks to bottlers and full service beverage distributors.

The majority of the Company's revenue is recognized when it satisfies a single performance obligation by transferring control of its products to a customer. Control is generally transferred when the Company's products are either shipped or delivered based on the terms contained within the underlying contracts or agreements. Certain of the Company's bottlers/distributors may also perform a separate function as a co-packer on the Company's behalf. In such cases, control of the Company's products passes to such bottlers/distributors when they notify the Company that they have taken possession or transferred the relevant portion of the Company's finished goods. The Company's general payment terms are short-term in duration. The Company does not have significant financing components or payment terms. The Company did not have any material unsatisfied performance obligations as of December 31, 2018 or December 31, 2017.

The Company excludes from revenues all taxes assessed by a governmental authority that are imposed on the sale of its products and collected from customers.

Distribution expenses to transport the Company's products, where applicable, and warehousing expense after manufacture are accounted for within operating expenses.

Promotional and other allowances (variable consideration) recorded as a reduction to net sales, primarily include consideration given to the Company's bottlers/distributors or retail customers including, but not limited to the following:

- discounts granted off list prices to support price promotions to end-consumers by retailers;
- reimbursements given to the Company's bottlers/distributors for agreed portions of their promotional spend with retailers, including slotting, shelf space allowances and other fees for both new and existing products;
- the Company's agreed share of fees given to bottlers/distributors and/or directly to retailers for advertising, in-store marketing and promotional activities;
- the Company's agreed share of slotting, shelf space allowances and other fees given directly to retailers;
- incentives given to the Company's bottlers/distributors and/or retailers for achieving or exceeding certain predetermined sales goals;
- discounted or free products;
- contractual fees given to the Company's bottlers/distributors related to sales made directly by the Company to certain customers that fall within the bottlers'/distributors' sales territories; and
- commissions paid to TCCC based on the Company's sales to the TCCC Subsidiaries and/or the TCCC Related Parties.

The Company's promotional allowance programs with its bottlers/distributors and/or retailers are executed through separate agreements in the ordinary course of business. These agreements generally provide for one or more of the arrangements described above and are of varying durations, ranging from one week to one year. The Company's promotional and other allowances are calculated based on various programs with bottlers/distributors and retail customers, and accruals are established during the year for its anticipated liabilities. These accruals are based on agreed upon terms as well as the Company's historical experience with similar programs and require management's judgment with respect to estimating consumer participation and/or distributor and retail customer performance levels. Differences between such estimated expenses and actual expenses for promotional and other allowance costs have historically been insignificant and are recognized in earnings in the period such differences are determined.

Amounts received pursuant to new and/or amended distribution agreements entered into with certain distributors, relating to the costs associated with terminating the Company's prior distributors, are accounted for as revenue ratably over the anticipated life of the respective distribution agreements, generally 20 years.

The Company also enters into license agreements that generate revenues associated with third-party sales of non-beverage products bearing our trademarks including, but not limited to, clothing, hats, t-shirts, jackets, helmets and automotive wheels.

Management believes that adequate provision has been made for cash discounts, returns and spoilage based on the Company's historical experience.

Cost of Sales – Cost of sales consists of the costs of flavors, concentrates and/or beverage bases, the costs of raw materials utilized in the manufacture of beverages, co-packing fees, repacking fees, in-bound freight charges, as well as internal transfer costs, warehouse expenses incurred prior to the manufacture of the Company's finished products and certain quality control costs. In addition, the Company includes in costs of sales certain costs such as depreciation, amortization and payroll costs that relate to the direct manufacture by the Company of certain flavors and concentrates. Raw materials account for the largest portion of cost of sales. Raw materials include cans, bottles, other containers, flavors, ingredients and packaging materials.

Operating Expenses – Operating expenses include selling expenses such as distribution expenses to transport products to customers and warehousing expenses after manufacture, as well as expenses for advertising, sampling and in-store demonstration costs, costs for merchandise displays, point-of-sale materials and premium items, sponsorship expenses, other marketing expenses and design expenses. Operating expenses also include such costs as payroll costs, travel costs, professional service fees including legal fees, termination payments made to certain of the Company's prior distributors, depreciation and other general and administrative costs.

Freight-Out Costs – For the years ended December 31, 2018, 2017 and 2016, freight-out costs amounted to \$128.5 million, \$91.9 million and \$83.6 million, respectively, and have been recorded in operating expenses in the accompanying consolidated statements of income.

Advertising and Promotional Expenses – The Company accounts for advertising production costs by expensing such production costs the first time the related advertising takes place. A significant amount of the Company's promotional expenses result from payments under endorsement and sponsorship contracts. Accounting for endorsement and sponsorship payments is based upon specific contract provisions. Generally, endorsement and sponsorship payments are expensed on a straight-line basis over the term of the contract after giving recognition to the periodic performance compliance provisions of the contracts. Advertising and promotional expenses, including, but not limited to, production costs amounted to \$353.9 million, \$324.0 million and \$270.6 million for the years ended December 31, 2018, 2017 and 2016, respectively. Advertising and promotional expenses are included in operating expenses in the accompanying consolidated statements of income.

Income Taxes – The Company utilizes the liability method of accounting for income taxes as set forth in FASB ASC 740. Under the liability method, deferred taxes are determined based on the temporary differences between the financial statement and tax basis of assets and liabilities using tax rates expected to be in effect during the years in which the basis differences reverse. A valuation allowance is recorded when it is more likely than not that some of the deferred tax assets will not be realized. In determining the need for valuation allowances the Company considers projected future taxable income and the availability of tax planning strategies. If in the future the Company determines that it would not be able to realize its recorded deferred tax assets, an increase in the valuation allowance would be recorded, decreasing earnings in the period in which such determination is made.

The Company assesses its income tax positions and records tax benefits for all years subject to examination based upon the Company's evaluation of the facts, circumstances and information available at the reporting date. For those tax positions where there is a greater than 50% likelihood that a tax benefit will be sustained, the Company has recorded the largest amount of tax benefit that may potentially be realized upon ultimate settlement with a taxing authority that has full knowledge of all relevant information. For those income tax positions where there is less than 50% likelihood that a tax benefit will be sustained, no tax benefit has been recognized in the financial statements.

Stock-Based Compensation – The Company accounts for stock-based compensation under the provisions of FASB ASC 718. The Company records compensation expense for employee stock options based on the estimated fair value of the options on the date of grant using the Black-Scholes-Merton option pricing formula. The Company records compensation expense for non-employee stock options based on the estimated fair value of the options as of the earlier of (1) the date at which a commitment for performance by the non-employee to earn the stock option is reached or (2) the date at which the non-employee's performance is complete, using the Black-Scholes-Merton option pricing formula. Stock-based compensation cost for restricted stock awards and restricted stock units is measured based on the closing fair market value of the Company's common stock at the date of grant. In the event that the Company has the option and intent to settle a restricted stock unit in cash, the award is classified as a liability and revalued at each balance sheet date. (See Note 14).

Net Income Per Common Share – In accordance with FASB ASC 260, net income per common share, on a basic and diluted basis, is presented for all periods. Basic net income per share is computed by dividing net income by the weighted average number of common shares outstanding during each period. Diluted net income per share is computed by dividing net income by the weighted average number of common and dilutive common equivalent shares outstanding. The calculation of common equivalent shares assumes the exercise of dilutive stock options, net of assumed treasury share repurchases at average market prices, as applicable.

Concentration of Risk – Certain of the Company's products utilize components (raw materials and/or co-packing services) from a limited number of sources. A disruption in the supply of such components could significantly affect the Company's revenues from those products, as alternative sources of such components may not be available at commercially reasonable rates or within a reasonably short time period. The Company continues to endeavor to secure the availability of alternative sources for such components and minimize the risk of any disruption in production.

The Coca-Cola Company ("TCCC"), through certain wholly-owned subsidiaries (the "TCCC Subsidiaries"), accounted for approximately 3%, 18% and 41% of the Company's net sales for the years ended December 31, 2018, 2017 and 2016, respectively. As part of TCCC's North America Refranchising initiative (the "North America Refranchising"), the territories of certain TCCC Subsidiaries have been transitioned to certain independent/non wholly-owned TCCC bottlers/distributors. Accordingly, the Company's percentage of net sales classified as sales to the TCCC Subsidiaries decreased for the years ended December 31, 2018 and 2017.

CCBCC Operations, LLC accounted for approximately 13%, 13% and 9% of the Company's net sales for the years ended December 31, 2018, 2017 and 2016, respectively.

Reyes Coca-Cola Bottling accounted for approximately 12%, 6% and 2% of the Company's net sales for the years ended December 31, 2018, 2017 and 2016, respectively.

Coca-Cola European Partners accounted for approximately 10%, 9% and 9% of the Company's net sales for the years ended December 31, 2018, 2017 and 2016, respectively.

Credit Risk – The Company sells its products nationally and internationally, primarily to full service beverage distributors, retail grocery and specialty chains, wholesalers, club stores, mass merchandisers, convenience chains and foodservice customers. The Company performs ongoing credit evaluations of its customers and generally does not require collateral. The Company maintains reserves for estimated credit losses, and historically, such losses have been within management's expectations.

Fair Value of Financial Instruments – The carrying value of the Company’s financial instruments, including cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities, approximate fair value due to the relatively short maturity of the respective instruments.

Use of Estimates – The preparation of the consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Recent Accounting Pronouncements

Recently issued accounting pronouncements not yet adopted

In August 2018, the FASB issued ASU No. 2018-15, “Intangibles–Goodwill and Other–Internal–Use Software (Topic 350): Customer’s Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That is a Service Contract.” ASU No. 2018-15 aligns the requirements for capitalizing implementation costs incurred in a hosting arrangement that is a service contract with the requirements for capitalizing implementation costs incurred to develop or obtain internal-use software. ASU No. 2018-15 is effective for the Company on a prospective or retrospective basis beginning on January 1, 2020, with early adoption permitted. The Company is currently evaluating the impact of ASU No. 2018-15 on its financial position, results of operations and liquidity.

In August 2018, the FASB issued ASU No. 2018-14, “Compensation–Retirement Benefits–Defined Benefit Plans–General (Topic 715): Disclosure Framework–Changes to the Disclosure Requirements for Defined Benefit Plans.” ASU No. 2018-14 removes certain disclosures that are not considered cost beneficial, clarifies certain required disclosures and requires certain additional disclosures. ASU No. 2018-14 is effective for the Company on a retrospective basis beginning in the year ending December 31, 2020, with early adoption permitted. The Company is currently evaluating the impact of ASU No. 2018-14 on its financial position, results of operations and liquidity.

In August 2018, the FASB issued ASU No. 2018-13, “Fair Value Measurement (Topic 820): Disclosure Framework - Changes to the Disclosure Requirements for Fair Value Measurement.” ASU No. 2018-13 removes certain disclosure requirements related to the fair value hierarchy, modifies existing disclosure requirements related to measurement uncertainty and adds new disclosure requirements. ASU No. 2018-13 disclosure requirements include disclosing the changes in unrealized gains and losses for the period included in other comprehensive income for recurring Level 3 fair value measurements held at the end of the reporting period and the range and weighted average of significant unobservable inputs used to develop Level 3 fair value measurements. ASU No. 2018-13 is effective for the Company beginning on January 1, 2020, with early adoption permitted. Certain disclosures in the new guidance will need to be applied on a retrospective basis and others on a prospective basis. The Company is currently evaluating the impact of ASU No. 2018-13 on its financial position, results of operations and liquidity.

In February 2018, the FASB issued ASU No. 2018-02, “Income Statement - Reporting Comprehensive Income (Topic 220)”, which amends the previous guidance to allow for certain tax effects “stranded” in accumulated other comprehensive income, which are impacted by the Tax Cuts and Jobs Act (the “Tax Reform Act”), to be reclassified from accumulated other comprehensive income into retained earnings. This amendment pertains only to those items impacted by the new tax law and will not apply to any future tax effects stranded in accumulated other comprehensive income. This standard is

MONSTER BEVERAGE CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Tabular Dollars in Thousands, Except Per Share Amounts)

effective for fiscal years beginning after December 15, 2018, and allows for early adoption. The Company has completed its evaluation of the impact of ASU No. 2018-02 and determined that there are no “stranded” tax effects in accumulated other comprehensive income to be reclassified.

In January 2017, the FASB issued ASU No. 2017-04, “Intangibles and Other (Topic 350): Simplifying the Test for Goodwill Impairment”, which eliminates the requirement to calculate the implied fair value of goodwill, but rather requires an entity to record an impairment charge based on the excess of a reporting unit’s carrying value over its fair value. This amendment is effective for annual or interim goodwill impairment tests in fiscal years beginning after December 15, 2019. Early adoption is permitted. The Company is currently evaluating the impact of ASU No. 2017-04 on its financial position, results of operations and liquidity.

In June 2016, the FASB issued ASU No. 2016-13, “Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments”. The accounting standard changes the methodology for measuring credit losses on financial instruments and the timing when such losses are recorded. ASU No. 2016-13 is effective for fiscal years, and interim periods within those years, beginning after December 15, 2019. Early adoption is permitted for fiscal years, and interim periods within those years, beginning after December 15, 2018. The Company is currently evaluating the impact of ASU No. 2016-13 on its financial position, results of operations and liquidity.

In February 2016, the FASB issued ASU No. 2016-02, “Leases (Topic 842)”. This update is intended to increase transparency and comparability among organizations by recognizing lease assets and lease liabilities on the balance sheet and disclosing key information about leasing arrangements. This update is effective for annual and interim reporting periods beginning after December 15, 2018, including interim periods within those fiscal years. The Company will adopt ASU No. 2016-02 in the first quarter of 2019 utilizing the modified retrospective transition method. In July 2018, the FASB further amended ASU No. 2016-02 and the Company will elect the transition provision permitting it to record existing operating leases on the Consolidated Balance Sheet without adjusting comparative periods. Further, the Company intends to elect the package of practical expedients allowing it to not reassess prior conclusions related to expired or existing contracts that are or that contain leases, lease classification and the accounting for initial direct costs. These practical expedients must be elected as a package and applied consistently. Operating leases with a term of 12 months or less will not be recorded on the Consolidated Balance Sheet. The Company does not expect that the adoption of ASU No. 2016-02 will have a material impact on its financial position, results of operations and liquidity. In conjunction with the adoption of ASU No. 2016-02, the Company is implementing a software solution to manage and account for leases as well as updating business processes and internal controls.

Recently adopted accounting pronouncements

In October 2016, the FASB issued ASU No. 2016-16, “Income Taxes (Topic 740): Intra-Entity Transfers of Assets Other Than Inventory”, in an effort to improve the accounting for the income tax consequences of intra-entity transfers of assets other than inventory. Previous GAAP prohibited the recognition of current and deferred income taxes for an intra-entity asset transfer until the asset had been sold to an outside party. FASB ASU No. 2016-16 established the requirement that an entity recognize the income tax consequences of an intra-entity transfer of an asset other than inventory when the transfer occurs. ASU No. 2016-16 was effective for financial statements issued for annual periods beginning after December 15, 2017 and interim periods within those annual periods. The Company adopted ASU No. 2016-16 effective January 1, 2018 on a modified retrospective basis, resulting in a \$6.6 million reclassification of the unrecognized income tax effects related to assets transfers that occurred prior to the adoption from deferred income taxes to opening retained earnings.

In May 2014, the FASB issued ASU No. 2014-09, “Revenue from Contracts with Customers (Topic 606)”, which superseded previous revenue recognition guidance. ASU No. 2014-09 and its amendments were included in Accounting Standards Codification (“ASC”) 606, “Revenue from Contracts with Customers”. ASC 606 requires that a company recognizes revenue at an amount that reflects the consideration to which the company expects to be entitled in exchange for transferring goods or services to a customer. The Company adopted ASC 606 effective January 1, 2018, using the modified retrospective approach, with no impact to the opening retained earnings. Results for periods beginning on or after January 1, 2018 are presented under ASC 606, while prior periods are not adjusted and continue to be reported in accordance with the prior accounting guidance under ASC 605, “Revenue Recognition”. See Note 2.

2. REVENUE RECOGNITION

Upon adoption of ASC 606, commissions paid to TCCC based on sales to certain of the Company’s bottlers/distributors who are (i) consolidated subsidiaries of TCCC (the “TCCC Subsidiaries”), (ii) accounted for under the equity method by TCCC (the “TCCC Related Parties”) and (iii) those not included in (i) or (ii) (the “TCCC Independent Bottlers”) are accounted for as follows:

Commissions Related To:	Year Ended December 31, 2018	
	As Reported	Without Adoption of ASC 606
TCCC Subsidiaries	Reduction to net sales	Reduction to net sales
TCCC Related Parties	Reduction to net sales	Operating expenses
TCCC Independent Bottlers	Operating expenses	Operating expenses

The impact of the adoption of ASC 606 on the Company’s consolidated statement of income for the year ended December 31, 2018 was as follows:

	Year Ended December 31, 2018		
	As Reported	Without Adoption of ASC 606	Decrease due to Adoption of ASC 606
Net Sales	\$ 3,807,183	\$ 3,849,424	\$ (42,241) ¹
Operating Expenses	\$ 1,011,756	\$ 1,053,997	\$ (42,241) ¹

¹ TCCC commissions based on sales to the TCCC Related Parties. There were no other identified changes to our revenue recognition policies as a result of the adoption of ASC 606.

During the years ended December 31, 2018 and 2017, realized gains or losses recognized on the sale of investments were not significant.

The Company's investments at December 31, 2018 and 2017 in commercial paper, certificates of deposit, municipal securities, U.S. government agency securities, U.S. treasuries and/or variable rate demand notes ("VRDNs") carried investment grade credit ratings. VRDNs are floating rate municipal bonds with embedded put options that allow the bondholder to sell the security at par plus accrued interest. All of the put options are secured by a pledged liquidity source. While they are classified as marketable investment securities, the put option allows the VRDNs to be liquidated at par on a same day, or more generally, on a seven-day settlement basis.

4. FAIR VALUE OF CERTAIN FINANCIAL ASSETS AND LIABILITIES

FASB ASC 820 provides a framework for measuring fair value and requires expanded disclosures regarding fair value measurements. FASB ASC 820 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. FASB ASC 820 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs, where available. The three levels of inputs required by the standard that the Company uses to measure fair value are summarized below.

- **Level 1:** Quoted prices in active markets for identical assets or liabilities.
- **Level 2:** Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the related assets or liabilities.
- **Level 3:** Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

FASB ASC 820 requires the use of observable market inputs (quoted market prices) when measuring fair value and requires a Level 1 quoted price to be used to measure fair value whenever possible.

All of the Company's short-term investments are classified within Level 1 or Level 2 within the fair value hierarchy. The Company's valuation of its Level 1 investments, which include money market funds, is based on quoted market prices in active markets for identical securities. The Company's valuation of its Level 2 investments, which include municipal securities, commercial paper, U.S. treasuries, certificates of deposit, VRDNs and U.S. government agency securities, is based on other observable inputs, specifically a market approach which utilizes valuation models, pricing systems, mathematical tools and other relevant information for the same or similar securities. The Company's valuation of its Level 2 foreign currency exchange contracts is based on quoted market prices of the same or similar instruments, adjusted for counterparty risk. There were no transfers between Level 1 and Level 2 measurements during the years ended December 31, 2018 and 2017, and there were no changes in the Company's valuation techniques.

5. DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

The Company is exposed to foreign currency exchange rate risks related primarily to its foreign business operations. During the years ended December 31, 2018, 2017 and 2016, respectively, the Company entered into forward currency exchange contracts with financial institutions to create an economic hedge to specifically manage a portion of the foreign exchange risk exposure associated with certain consolidated subsidiaries' non-functional currency denominated assets and liabilities. All foreign currency exchange contracts entered into by the Company that were outstanding as of December 31, 2018 have terms of three months or less. The Company does not enter into forward currency exchange contracts for speculation or trading purposes.

The Company has not designated its foreign currency exchange contracts as hedge transactions under FASB ASC 815. Therefore, gains and losses on the Company's foreign currency exchange contracts are recognized in other income (expense), net, in the consolidated statements of income, and are largely offset by the changes in the fair value of the underlying economically hedged item.

The notional amount and fair value of all outstanding foreign currency derivative instruments in the consolidated balance sheets consist of the following at:

Intangible assets consist of the following at:

	December 31, 2018	December 31, 2017
Amortizing intangibles	\$ 71,350	\$ 71,400
Accumulated amortization	(38,311)	(26,383)

Non-amortizing intangibles	1,012,839	989,068
	<u>\$ 1,045,878</u>	<u>\$ 1,034,085</u>

Amortizing intangibles primarily consist of customer relationships. All amortizing intangibles have been assigned an estimated finite useful life and such intangibles are amortized on a straight-line basis over the number of years that approximate their respective useful lives, generally five to seven years. Total amortization expense recorded was \$11.9 million, \$11.9 million and \$10.6 million for the years ended December 31, 2018, 2017 and 2016, respectively.

The following is the future estimated amortization expense related to amortizing intangibles as of December 31, 2018:

Year Ending December 31:

2019	\$ 11,847
2020	7,965
2021	4,722
2022	4,697
2023	1,404
2024 and thereafter	2,404
	<u>\$ 33,039</u>

At December 31, 2018, non-amortizing intangibles primarily consist of indefinite-lived tradenames, flavors and formulas.

9. DISTRIBUTION AGREEMENTS

In accordance with FASB ASC No. 420 "Exit or Disposal Cost Obligations", the Company expenses distributor termination costs in the period in which the written notification of termination occurs. As a result, the Company incurred termination costs of \$26.6 million, \$35.4 million and \$79.8 million for the years ended December 31, 2018, 2017 and 2016, respectively. Such termination costs have been expensed in full and are included in operating expenses for the years ended December 31, 2018, 2017 and 2016, respectively.

In the normal course of business, amounts received pursuant to new and/or amended distribution agreements entered into with certain distributors, relating to the costs associated with terminating agreements with the Company's prior distributors, are accounted for as deferred revenue and are recognized as revenue ratably over the anticipated life of the respective distribution agreement, generally 20 years. Revenue recognized was \$21.9 million, \$22.3 million and \$26.1 million for the years ended December 31, 2018, 2017 and 2016, respectively.

10. DEBT

The Company entered into a credit facility with Comerica Bank (“Comerica”) consisting of a revolving line of credit, which was amended in June 2017, under which the Company may borrow up to \$10.0 million of non-collateralized debt. The revolving line of credit is effective through June 1, 2020. Interest on borrowings under the line of credit is based on Comerica’s base (prime) rate minus 1% to 1.5%, or London Interbank Offered Rates plus an additional percentage of 1.25% to 1.75%, depending upon certain financial ratios maintained by the Company. The Company had no outstanding borrowings on this line of credit at December 31, 2018. Under this revolving line of credit, the Company may also issue standby Letters of Credit with an aggregate amount of up to \$4.0 million. The fee on the standby Letters of Credit ranges from 1.00% to 1.50% depending upon certain financial ratios maintained by the Company. The Company had no outstanding standby Letters of Credit at December 31, 2018.

In December 2016, the Company entered into a credit facility with HSBC Bank (China) Company Limited, Shanghai Branch consisting of a non-collateralized working capital line of credit. In February 2018, the working capital line limit was increased to \$15.0 million. At December 31, 2018, the interest rate on borrowings under the line of credit was 5.5%. As of December 31, 2018, the Company had \$11.7 million outstanding on this line of credit, including interest, which is included in accounts payable in the consolidated balance sheet.

The Company’s debt of \$0.8 million and \$1.3 million at December 31, 2018 and 2017, respectively, consisted of capital leases, collateralized by vehicles, payable over 12 months in monthly installments at various effective interest rates, with final payments ending on or before December 31, 2018.

At December 31, 2018 and 2017, the assets acquired under capital leases had a net book value of \$4.9 million and \$5.3 million, net of accumulated depreciation of \$4.6 million and \$4.2 million, respectively.

Interest expense for capital lease obligations amounted to \$0.06 million, \$0.08 million and \$0.07 million for the years ended December 31, 2018, 2017 and 2016, respectively.

11. COMMITMENTS AND CONTINGENCIES

The Company is obligated under various non-cancellable lease agreements providing for office space, warehouse space, and automobiles that expire at various dates through the year 2033.

Rent expense under operating leases was \$6.1 million, \$10.7 million and \$9.9 million for the years ended December 31, 2018, 2017 and 2016, respectively.

2024 and thereafter		-
	\$	<u>190,186</u>

Purchase Commitments – The Company has purchase commitments aggregating approximately \$49.8 million at December 31, 2018, which represent commitments made by the Company and its subsidiaries to various suppliers of raw materials for the production of its products. These obligations vary in terms, but are generally satisfied within one year.

The Company purchases various raw material items, including, but not limited to, flavors, ingredients, dietary ingredients, containers, milk, glucose, sucralose, cream and protein, from a limited number of suppliers. An interruption in supply from any of such resources could result in the Company's inability to produce certain products for limited or possibly extended periods of time. The aggregate value of purchases from suppliers of such limited resources described above for the years ended December 31, 2018, 2017 and 2016 was \$289.6 million, \$273.6 million and \$205.9 million, respectively.

Guarantees – The Company from time to time enters into certain types of contracts that contingently require the Company to indemnify parties against third-party claims. These contracts primarily relate to: (i) certain agreements with the Company's officers, directors and employees under which the Company may be required to indemnify such persons for liabilities arising out of their employment relationship, (ii) certain distribution or purchase agreements under which the Company may have to indemnify the Company's customers from any claim, liability or loss arising out of any actual or alleged injury or damages suffered in connection with the consumption or purchase of the Company's products or the use of Company trademarks, and (iii) certain real estate leases, under which the Company may be required to indemnify property owners for liabilities and other claims arising from the Company's use of the applicable premises. The terms of such obligations vary and typically, a maximum obligation is not explicitly stated. Generally, the Company believes that its insurance coverage is adequate to cover any resulting liabilities or claims.

Litigation – The Company, TCCC and certain affiliates are parties to various agreements setting forth, among other things, provisions relating to TCCC's equity holding in the Company and the terms on which the Company's energy products are distributed globally by members of TCCC's distribution network. Among other provisions, the agreements restrict TCCC from competing in the energy drink category in certain territories prior to the termination of the applicable distribution coordination agreement with TCCC, with certain exceptions.

TCCC has developed three energy products that it believes it may market under the exception relating to the Coca-Cola brand. The Company believes that the exception does not apply to this situation. By mutual agreement to obtain clarification, the issue was submitted to the American Arbitration Association on October 31, 2018. We expect a decision will be reached during the second quarter of 2019. TCCC has indicated that it has suspended the proposed launch of such products until April 2019. As the relief sought is limited, no reasonable possible range of losses, if any, can be estimated.

The Company is currently a defendant in a number of personal injury lawsuits, claiming that the death or other serious injury of the plaintiffs was caused by consumption of Monster Energy® brand energy drinks. The plaintiffs in these lawsuits allege strict product liability, negligence, fraudulent concealment, breach of implied warranties and wrongful death. The Company believes that each complaint is without merit and plans a vigorous defense. The Company also believes that any damages, if awarded, would not have a material adverse effect on the Company's financial position or results of operations.

Furthermore, from time to time in the normal course of business, the Company is named in other litigation, including consumer class actions, intellectual property litigation and claims from prior distributors. Although it is not possible to predict the ultimate outcome of such litigation, based on the facts known to the Company, management believes that such litigation in the aggregate will likely not have a material adverse effect on the Company's financial position or results of operations.

The Company evaluates, on a quarterly basis, developments in legal proceedings and other matters that could cause an increase or decrease in the amount of the liability that is accrued, if any, or in the amount of any related insurance reimbursements recorded. As of December 31, 2018, the Company's consolidated balance sheet includes accrued loss contingencies of approximately \$0.06 million.

As of February 26, 2019, \$20.6 million remained available for repurchase under the August 2018 Repurchase Plan.

During the year ended December 31, 2018, 34,976 shares of common stock were purchased from employees in lieu of cash payments for options exercised or withholding taxes due for a total amount of \$2.1 million. While such purchases are considered common stock repurchases, they are not counted as purchases against our authorized share repurchase programs. Such shares are included in common stock in treasury in the accompanying consolidated balance sheet at December 31, 2018.

14. STOCK-BASED COMPENSATION

The Company has two stock-based compensation plans under which shares were available for grant at December 31, 2018: the Monster Beverage Corporation 2011 Omnibus Incentive Plan (the "2011 Omnibus Incentive Plan"), including the Monster Beverage Deferred Compensation Plan (the "Deferred Compensation Plan") as a sub plan thereunder, and the Monster Beverage Corporation 2017 Compensation Plan for Non-Employee Directors (the "2017 Directors Plan"), including the Monster Beverage Deferred Compensation Plan for Non-Employee Directors as a sub plan thereunder.

The 2011 Omnibus Incentive Plan permits the granting of options, stock appreciation rights, restricted stock, restricted stock units, performance awards and other stock-based awards up to an aggregate of 43,500,000 shares of the common stock of the Company to employees or consultants of the Company and its subsidiaries. Shares authorized under the 2011 Omnibus Incentive Plan are reduced by 2.16 shares for each share granted or issued with respect to a Full Value Award. A Full Value Award is an award other than an incentive stock option, a non-qualified stock option, or a stock appreciation right, which is settled by the issuance of shares. Options granted under the 2011 Omnibus Incentive Plan may be incentive stock options under Section 422 of the Internal Revenue Code, as amended, or non-qualified stock options. The Compensation Committee of the Board of Directors (the “Compensation Committee”) has sole and exclusive authority to grant stock awards to all employees who are not new hires and to all new hires who are subject to Section 16 of the Exchange Act. The Compensation Committee and the Executive Committee of the Board of Directors (the “Executive Committee”) each independently has the authority to grant stock awards to new hires who are not Section 16 employees. Awards granted by the Executive Committee are not subject to approval or ratification by the Board of Directors or the Compensation Committee. Options granted under the 2011 Omnibus Incentive Plan generally vest over a five-year period from the grant date and are generally exercisable up to 10 years after the grant date. As of December 31, 2018, 22,740,597 shares of the Company’s common stock have been granted, net of cancellations, and 16,611,623 shares (as adjusted for Full Value Awards) of the Company’s common stock remain available for grant under the 2011 Omnibus Incentive Plan.

In 2016, the Company adopted the Deferred Compensation Plan (as a sub plan to the 2011 Omnibus Incentive Plan), pursuant to which eligible employees may elect to defer cash and/or equity based compensation and to receive the deferred amounts, together with an investment return (positive or negative), either at a pre-determined time in the future or upon termination of their employment with the Company or its subsidiaries or affiliates that are participating employers under the Deferred Compensation Plan, as provided under the Deferred Compensation Plan and in relevant deferral elections. Deferrals under the Deferred Compensation Plan are unfunded and unsecured. As of December 31, 2018, deferrals under the Deferred Compensation Plan are solely comprised of cash compensation and equity compensation. Future amounts due are not material in the aggregate.

In 2017, the Company adopted the 2017 Directors Plan, a successor plan to the 2009 Monster Beverage Corporation Stock Incentive Plan for Non-Employee Directors. The 2017 Directors Plan permits the granting of stock options, stock appreciation rights, restricted shares or restricted stock units, deferred awards, dividend equivalents, and other share based-awards up to an aggregate of 1,250,000 shares of common stock of the Company to non-employee directors of the Company.

Each calendar year, a non-employee director will receive an annual retainer and annual equity award, as provided for in the 2017 Directors Plan, which may be modified from time to time. Currently, with respect to equity awards, each non-employee director receives an award of restricted stock units at each annual meeting of the Company’s stockholders or promptly thereafter. A non-employee director’s annual award of restricted stock units will generally vest on the earliest to occur of: (a) the last business day immediately preceding the annual meeting of the Company’s stockholders in the calendar year following the calendar year in which the grant date occurs, (b) a Change of Control (as defined in the 2017 Directors Plan), (c) the non-employee director’s death, or (d) the date of the non-employee director’s separation from service due to disability, so long as the non-employee director remains a non-employee director through such date. The Board of Directors may in its discretion award non-employee directors stock options, stock appreciation rights, restricted stock, and other share-based awards in lieu of or in addition to restricted stock units. The Board of Directors may amend or terminate the 2017 Directors Plan at any time, subject to certain limitations set forth in the 2017 Directors Plan. As of December 31, 2018, 47,880 shares of the Company’s common stock had been granted under the 2017 Directors Plan, and 1,202,120 shares of the Company’s common stock remain available for grant.

In 2017, the Company adopted the Deferred Compensation Plan for Non-Employee Directors (as a sub plan to the 2017 Directors Plan), pursuant to which the Board of Directors may permit non-employee directors to elect, at such times and in accordance with rules and procedures (or sub-plan) adopted by the Board of Directors (which are intended to comply with Code Section 409A, as applicable), to receive all or any portion of such non-employee director's compensation, whether payable in cash or in equity, on a deferred basis. Deferrals under the Deferred Compensation Plan for Non-Employee Directors are unfunded and unsecured. As of December 31, 2018, deferrals under the Deferred Compensation Plan for Non-Employee Directors are solely comprised of cash compensation and equity compensation. Future amounts due are not material in the aggregate. The 2017 Directors Plan was adopted to effectuate any such deferrals. The 2017 Directors Plan is administered by the Board of Directors. Each award granted under the 2017 Directors Plan will be evidenced by a written agreement and will contain the terms and conditions that the Board of Directors deems appropriate.

Under the 2017 Directors Plan, the Board of Directors requires each non-employee director to satisfy the share ownership guidelines set forth below, as may be amended by the Board of Directors from time to time. The current share ownership guidelines provide that non-employee directors of the Company must:

- Hold at least 9,000 shares of Company common stock. For this purpose, deferred shares or deferred restricted stock units will be deemed held, to the extent vested.
- The minimum stock ownership level must be achieved by each non-employee director by the third (3rd) anniversary of such non-employee director's initial appointment to the Board of Directors.
- Once achieved, ownership of the guideline amount should be maintained for so long as the non-employee director retains his or her seat on the Board of Directors.
- There may be rare instances where these guidelines would place a hardship on a non-employee director. In these cases or in similar circumstances, the Board of Directors will make the final decision as to developing an alternative stock ownership guideline for a non-employee director that reflects the intention of these guidelines and his or her personal circumstances.

The Company recorded \$57.1 million, \$52.3 million and \$45.8 million of compensation expense relating to stock options, restricted stock awards and restricted stock units during the years ended December 31, 2018, 2017 and 2016, respectively.

The excess tax benefit realized for tax deductions from non-qualified stock option exercises, disqualifying dispositions of incentive stock options and vesting of restricted stock units for the years ended December 31, 2018, 2017 and 2016 was \$8.5 million, \$96.7 million and \$20.8 million, respectively.

Stock Options

Under the Company's stock-based compensation plans, all stock options granted through December 31, 2018 were granted at prices based on the fair value of the Company's common stock on the date of grant. The Company records compensation expense for employee stock options based on the estimated fair value of the options on the date of grant using the Black-Scholes-Merton option pricing formula with the assumptions included in the table below. The Company records compensation expense for non-employee stock options based on the estimated fair value of the options as of the earlier of (1) the date at which a commitment for performance by the non-employee to earn the stock option is reached or (2) the date at which the non-employee's performance is complete, using the Black-Scholes-Merton option pricing formula with the assumptions included in the table below. The Company uses historical data to determine the exercise behavior, volatility and forfeiture rate of the options.

The following weighted-average assumptions were used to estimate the fair value of options granted during:

	2018	2017	2016
Dividend yield	0.0 %	0.0 %	0.0 %
Expected volatility	34.7 %	36.5 %	36.2 %
Risk-free interest rate	2.81 %	2.11 %	1.57 %
Expected term	6.0 Years	6.1 Years	6.3 Years

Expected Volatility: The Company uses historical volatility as it provides a reasonable estimate of the expected volatility. Historical volatility is based on the most recent volatility of the stock price over a period of time equivalent to the expected term of the option.

Risk-Free Interest Rate: The risk-free interest rate is based on the U.S. treasury zero coupon yield curve in effect at the time of grant for the expected term of the option.

Expected Term: The Company's expected term represents the weighted-average period that the Company's stock options are expected to be outstanding. The expected term is based on expected time to post-vesting exercise of options by employees. The Company uses historical exercise patterns of previously granted options to derive employee behavioral patterns used to forecast expected exercise patterns.

The following table summarizes the Company's activities with respect to its stock option plans as follows:

The weighted-average grant-date fair value of options granted during the years ended December 31, 2018, 2017 and 2016 was \$22.37 per share, \$18.29 per share and \$16.90 per share, respectively. The total intrinsic value of options exercised during the years ended December 31, 2018, 2017 and 2016 was \$56.8 million, \$285.8 million and \$70.6 million, respectively.

Cash received from option exercises under all plans for the years ended December 31, 2018, 2017 and 2016 was \$25.9 million, \$52.6 million and \$16.4 million, respectively.

At December 31, 2018, there was \$98.7 million of total unrecognized compensation expense related to non-vested options granted to employees under the Company's share-based payment plans. That cost is expected to be recognized over a weighted-average period of 2.6 years.

Restricted Stock Units

Stock-based compensation cost for restricted stock units is measured based on the closing fair market value of the Company's common stock at the date of grant. In the event that the Company has the option and intent to settle a restricted stock unit in cash, the award is classified as a liability and revalued at each balance sheet date.

15. INCOME TAXES

On December 22, 2017, the President of the United States signed into law the Tax Reform Act. The legislation significantly changes U.S. tax law by, among other things, lowering corporate income tax rates, implementing a territorial tax system and imposing a repatriation tax on deemed repatriated earnings of foreign subsidiaries. The Tax Reform Act permanently reduces the U.S. corporate income tax rate from a maximum of 35% to a flat 21% rate, effective January 1, 2018. The SEC staff issued Staff Accounting Bulletin No. 118 to address the application of U.S. GAAP in situations when a registrant does not have the necessary information available, prepared, or analyzed (including computations) in reasonable detail to complete the accounting for certain income tax effects of the Tax Reform Act. A company may select between one of three scenarios to determine a reasonable estimate for certain income tax effects arising from the Tax Reform Act. Those scenarios are (i) a final estimate which effectively closes the measurement window; (ii) a reasonable estimate leaving the measurement window open for future revisions; and (iii) no estimate as the law is still being analyzed. The Company was able to provide a reasonable estimate for the revaluation of deferred taxes and the effects of the toll charge on undistributed foreign subsidiary earnings and profits (“E&P”). As a result of the reduction in the U.S. corporate income tax rate from 35% to 21% under the Tax Reform Act, the Company revalued its net deferred tax assets at December 31, 2017, resulting in a provisional \$39.8 million charge included in the provision for income taxes for the year ended December 31, 2017. The Tax Reform Act also provided for a one-time deemed mandatory repatriation of post-1986 E&P through the year ended December 31, 2017. As a result, the Company recognized a provisional \$2.1 million charge in the provision for income taxes for the year ended December 31, 2017 related to such deemed mandatory repatriation. The Company completed its analysis of the Tax Reform Act during 2018 and adjusted the 2017 provisional estimate to the final amounts in accordance with Staff Accounting Bulletin No. 118. The measurement window begins in the reporting period that includes the enactment date and ends when an entity has obtained, prepared and analyzed the information needed in order to complete the accounting requirements under ASC 740. For the year ended December 31, 2018, the Company made an adjustment to the provisional amount and recognized an additional \$1.8 million provision for income tax related to the deemed mandatory repatriation.

The Company has not made additional measurement window adjustments to these items during the year ended December 31, 2018.

The Company evaluated the various provisions of the Tax Reform Act, including, the global intangible low-taxed income (“GILTI”) and the foreign derived intangible income provisions. The Company will treat any U.S. tax on foreign earnings under GILTI as a current period expense when incurred.

The domestic and foreign components of the Company’s income before provision for income taxes are as follows:

	Year Ended December 31,		
	2018	2017	2016

During the years ended December 31, 2018, 2017 and 2016, the Company established full valuation allowances against certain deferred tax assets, resulting from cumulative net operating losses incurred by certain foreign subsidiaries of the Company. The effect of the valuation allowances and the subsequent related impact on the Company's overall tax rate was to increase the Company's provision for income taxes by \$4.0 million, \$6.8 million and \$8.9 million for the years ended December 31, 2018, 2017 and 2016, respectively. At December 31, 2018, the Company had net operating loss carryforwards of approximately \$102.6 million. Of this amount, \$74.7 million may be carried forward indefinitely. The remaining \$27.9 million of net operating loss carryforwards will begin to expire in 2019.

Additions for tax positions related to the prior year	1,159
Decreases for tax positions related to prior years	(2,664)
Balance at December 31, 2018	<u>\$ 5,035</u>

The Company recognizes accrued interest and penalties related to unrecognized tax benefits in the provision for income taxes in the Company's consolidated financial statements. As of December 31, 2018, the Company had accrued approximately \$0.9 million in interest and penalties related to unrecognized tax benefits. If the Company were to prevail on all uncertain tax positions it would not have a significant impact on the Company's effective tax rate.

It is expected that the amount of unrecognized tax benefit change within the next 12 months will not be significant.

The Company is subject to U.S. federal income tax as well as to income tax in multiple state and foreign jurisdictions.

On October 18, 2016, the IRS began its examination of the Company's U.S. federal income tax return for the year ended December 31, 2014. On March 27, 2017, the IRS began its examination of the Company's U.S. federal income tax return for the year ended December 31, 2015.

The Company is in various stages of examination with certain states and certain foreign jurisdictions. The Company's 2014 through 2017 U.S. federal income tax returns are subject to examination by the IRS. The Company's state income tax returns are subject to examination for the 2013 through 2017 tax years.

For the years ended December 31, 2018, 2017 and 2016, options and awards outstanding totaling 3.2 million shares, 7.9 million shares and 5.7 million shares, respectively, were excluded from the calculations as their effect would have been antidilutive.

17. EMPLOYEE BENEFIT PLAN

Employees of the Company may participate in the Monster Beverage Corporation 401(k) Plan, a defined contribution plan, which qualifies under Section 401(k) of the Internal Revenue Code. Participating employees may contribute up to 15% of their pretax salary up to statutory limits. The Company contributes 50% of the employee contribution, up to 6% of each employee's earnings, which vest 25% each year for four years after the first anniversary date. Matching contributions were \$2.9 million, \$2.5 million and \$2.0 million for the years ended December 31, 2018, 2017 and 2016, respectively.

18. SEGMENT INFORMATION

The Company has three operating and reportable segments, (i) Monster Energy® Drinks segment, which is primarily comprised of the Company's Monster Energy® drinks, (ii) Strategic Brands segment, which is primarily comprised of the various energy drink brands acquired from TCCC in 2015 as well as the Company's Predator® energy drinks, and (iii) Other segment, which is comprised of certain products sold by AFF, a wholly-owned subsidiary of the Company, to independent third-party customers.

The Company's Monster Energy® Drinks segment generates net operating revenues by selling ready-to-drink packaged drinks primarily to bottlers and full service beverage distributors. In some cases, the Company sells directly to retail grocery and specialty chains, wholesalers, club stores, drug stores, mass merchandisers, convenience chains, foodservice customers and the military.

The Company's Strategic Brands segment primarily generates net operating revenues by selling "concentrates" and/or "beverage bases" to authorized bottling and canning operations. Such bottlers generally combine the concentrates and/or beverage bases with sweeteners, water and other ingredients to produce ready-to-drink packaged energy drinks. The ready-to-drink packaged energy drinks are then sold to other bottlers, full service distributors or retailers, including, retail grocery and specialty chains, wholesalers, club stores, mass merchandisers, convenience chains, foodservice customers, drug stores and the military. To a lesser extent, the Company's Strategic Brands segment generates net operating revenues by selling ready-to-drink packaged energy drinks to bottlers and full service beverage distributors.

(Tabular Dollars in Thousands, Except Per Share Amounts)

Generally, the Monster Energy® Drinks segment generates higher per case net operating revenues, but lower per case gross profit margins than the Strategic Brands segment.

Corporate and unallocated amounts that do not relate to a reportable segment have been allocated to “Corporate and unallocated.” No asset information, other than goodwill and other intangible assets, has been provided for in the Company’s reportable segments as management does not measure or allocate such assets on a segment basis.

The net revenues derived from the Company’s reportable segments and other financial information related thereto for the years ended December 31, 2018, 2017 and 2016 are as follows:

TCCC, through the TCCC Subsidiaries, accounted for approximately 3%, 18% and 41% of the Company’s net sales for the years ended December 31, 2018, 2017 and 2016, respectively. As part of the North America Refranchising, the territories of certain TCCC Subsidiaries have been transitioned to certain independent/non wholly-owned TCCC bottlers/distributors. Accordingly, the Company’s percentage of net sales classified as sales to the TCCC Subsidiaries decreased for the years ended December 31, 2018 and 2017.

CCBCC Operations, LLC accounted for approximately 13%, 13% and 9% of the Company’s net sales for the years ended December 31, 2018, 2017 and 2016, respectively.

Reyes Coca-Cola Bottling accounted for approximately 12%, 6% and 2% of the Company’s net sales for the years ended December 31, 2018, 2017 and 2016, respectively.

Coca-Cola European Partners accounted for approximately 10%, 9% and 9% of the Company’s net sales for the years ended December 31, 2018, 2017 and 2016, respectively.

Net sales to customers outside the United States amounted to \$1.09 billion, \$909.3 million and \$733.7 million for the years ended December 31, 2018, 2017 and 2016, respectively. Such sales were approximately 29%, 27% and 24% of net sales for the years ended December 31, 2018, 2017 and 2016, respectively.

19. RELATED PARTY TRANSACTIONS

TCCC controls approximately 19% of the voting interests of the Company. The TCCC Subsidiaries, the TCCC Related Parties and the TCCC Independent Bottlers, purchase and distribute certain of the Company's products in certain domestic and international markets. The Company also pays TCCC a commission based on certain sales within the TCCC distribution network.

TCCC commissions, based on sales to the TCCC Subsidiaries and the TCCC Related Parties, for the year ended December 31, 2018 were \$48.0 million, and are included as a reduction to net sales. TCCC commissions, based on sales to the TCCC Independent Bottlers for the year ended December 31, 2018 were \$14.8 million, and are included in operating expenses.

TCCC commissions, based on sales to the TCCC Subsidiaries, for the year ended December 31, 2017 were \$9.8 million, and are included as a reduction to net sales. TCCC commissions, based on sales to the TCCC Related Parties and the TCCC Independent Bottlers, for the year ended December 31, 2017 were \$45.0 million, and are included in operating expenses.

Upon adoption of ASC 606, commissions paid to TCCC, based on sales to the TCCC Related Parties, are included as a reduction to net sales. Prior to January 1, 2018, such commissions, based on sales to the TCCC Related Parties, were included in operating expenses.

Net sales to the TCCC Subsidiaries for the years ended December 31, 2018 and 2017 were \$132.5 million and \$594.1 million, respectively. As part of the North America Refranchising, the territories of certain TCCC Subsidiaries have been transitioned to certain independent TCCC bottlers/distributors and/or TCCC Related Parties. Accordingly, the Company's net sales classified as sales to the TCCC Subsidiaries significantly decreased for the year ended December 31, 2018.

The Company also purchases concentrates from TCCC which are then sold to certain of the Company's bottlers/distributors. Concentrate purchases from TCCC were \$27.5 million, \$26.2 million and \$26.2 million for the years ended December 31, 2018, 2017 and 2016, respectively.

Certain TCCC Subsidiaries also contract manufacture certain of the Company's Monster Energy® brand energy drinks. Such contract manufacturing expenses were \$22.8 million, \$11.8 million and \$9.6 million for the years ended December 31, 2018, 2017 and 2016, respectively.
