Rodney C. Sacks, Chairman and Chief Executive Officer, said: “We are pleased to report continued progress on the strategic alignment of our distribution system with Coca-Cola bottlers, both domestically and internationally. In the United States, we transitioned distribution of Monster Energy® drinks to the Coca-Cola bottlers in Wisconsin early in January 2017, in parts of Minnesota, including Minneapolis and St. Paul, in March 2017 and in a part of North Dakota, including Fargo, in April 2017. We commenced distribution of Monster Energy® drinks with the Coca-Cola bottler in Nigeria as well as in certain other countries during the 2017 first quarter. In China during the first quarter of 2017, we continued with launches in Tianjin, Hebei, Shandong, Henan, Anhui, Zhejiang and Jiangsu. We also extended distribution in the Guangdong province. Further launches are planned in China and in other countries, including a relaunch in India in 2017. We expanded distribution of Monster Energy Ultra Violet™ and launched Full Throttle® Orange in the first quarter of 2017. We have a robust pipeline of new products for 2017.

“Our 2017 first quarter results were adversely impacted by distributor terminations, the strength of the United States dollar and production shortages of our Java Monster® and Muscle Monster® products,” Sacks added.

Note Regarding Use of Non-GAAP Measures

Gross sales is used internally by management as an indicator of and to monitor operating performance, including sales performance of particular products, salesperson performance, product growth or declines and overall Company performance. The use of gross sales allows evaluation of sales performance before the effect of any promotional items, which can mask certain performance issues. We therefore believe that the disclosure of gross sales provides a useful measure of our operating performance. Gross sales is not a measure that is recognized under accounting principles generally accepted in the United States of America (“GAAP”) and should not be considered as an alternative to net sales, which is determined in accordance with GAAP, and should not be used alone as an indicator of operating performance in place of net sales. Additionally, gross sales may not be comparable to similarly titled measures used by other companies, as gross sales has been defined by our internal reporting practices. In addition, gross sales may not be realized in the form of cash receipts as promotional payments and allowances may be deducted from payments received from certain customers.

Caution Concerning Forward-Looking Statements

Certain statements made in this announcement may constitute “forward-looking statements” within the meaning of the U.S. federal securities laws, as amended, regarding the expectations of management with respect to our future operating results and other future events including revenues and profitability. The Company cautions that these statements are based on management’s current knowledge and expectations and are subject to certain risks and uncertainties, many of which are outside of the control of the Company, that could cause actual results and events to differ materially from the statements made herein. Such risks and uncertainties include, but are not limited to, the following: our ability to recognize benefits from The Coca-Cola Company transaction and the American Fruits & Flavors transaction; our ability to introduce and increase sales of both existing and new products; our ability to implement the share repurchase program; unanticipated litigation concerning the Company’s products; the current uncertainty and volatility in the national and global economy; changes in consumer preferences; changes in demand due to both domestic and international economic conditions; activities and strategies of competitors, including the introduction of new products and competitive pricing and/or marketing of similar products; actual performance of the parties
